Documenting the Cultural Heritage Robin Thornes,John Bold,1998-01-01 This publication presents three internationally agreed standards for the documentation of the cultural heritage the Core Data Index to Historic Buildings and Monuments of the Architectural Heritage the International Core Data Standard for Archaeological Sites and Monuments and the core data standard for identifying cultural objects Object ID The standards have been brought together in a single publication to provide a readily accessible guide for use by those responsible for documenting the archaeological architectural and movable heritage

Archaeological Resource Management John Carman,2015-09-09 Archaeological Resource Management provides an international comparison of the main practices involved in managing archaeological remains especially their identification and recording their evaluation for significance their preservation and their presentation to the public **Archaeology** Hannah Cobb,Kevin Greene,Tom Moore,2024-03-19 This fully updated sixth edition of a classic classroom text is essential reading for core courses in archaeology Archaeology An Introduction explains how the subject emerged from an amateur pursuit in the eighteenth century into a serious discipline and explores changing trends in interpretation in recent decades

The authors convey the excitement of archaeology while helping readers to evaluate new discoveries by explaining the methods and theories that lie behind them. In addition to drawing upon examples and case studies from many regions of the world and periods of the past, the book incorporates the authors' own fieldwork research and teaching. It continues to include key reference and further reading sections to help new readers find their way through the ever-expanding range of archaeological publications and online sources, as well as colour illustrations and boxed topic sections to increase comprehension. Serving as an accessible and lucid textbook and engaging students with contemporary issues, this book is designed to support students studying Archaeology at an introductory level. New to the sixth edition: Inclusion of the latest survey and imaging techniques such as the use of drones and extended reality; Updated material on developments in dating DNA analysis, isotopes and population movement, including consideration of the ethical considerations of these techniques; Coverage of new developments in archaeological theory such as the material turn, ontological turn and work on issues of equality, diversity and inclusion; A whole new chapter covering archaeology in the present, including new sections on heritage and public archaeology and an updated consideration of archaeology's relationship with the climate crisis; A revised glossary with over 200 new additions or updates.

Archaeology And Geographic Information Systems Gary R Lock, Zoran Stancic, 2022-03-26

Geographic information systems (GIS) applications are viewed with increasing interest by the archaeology community, and this book, with its diversity of topics and authorship, should be a useful resource. Complementing the volume *Interpreting Space* (Taylor), it is apparent that there are fundamental differences between North American and European archaeological uses of GIS. Primarily, these differences lie in the types of evidence for past landscapes that are available for study in the two continents, and secondly, in the different approaches to archaeology and, specifically, the theory and practice of landscape archaeology. This title centres on the role of archaeological theory in cultural resource management (CRM) and in GIS applications generally. It showcases the important debate which takes the emphasis away from the technology of GIS and places it back within the central concerns of archaeology, and particularly European archaeology. Archaeology and GIS includes material on such concerns as CRM applications, landscape archaeology, intra-site applications and, explicitly, theoretical concerns, thus representing the state of GIS applications in European archaeology. Contributions come from countries such as France, Italy, Hungary, UK, USA, the Netherlands, the Czech Republic, Spain, Slovenia and Finland.

Directorate of Culture and Cultural Heritage, Council of Europe. Technical Co-operation and Consultancy Programme, 2009-01-01

Improved heritage management and the inclusion of heritage in planning and sustainable development processes necessitate inventory and documentation. More than mere scientific tools recommended.

in international agreements inventory and documentation play a strategic role The complexity of the heritage items that now have to be inventoried and their interaction with our everyday living environment require the clear definition and harmonisation of practices at the European level Through its work in the 1960s the Council of Europe helped to lay the methodological bases for inventorying architectural archaeological and movable heritage The efforts to systematise the process came in answer to the broadening meaning of heritage and today new considerations lead us to address such notions as heritage groups The guidelines proposed in this book reflect the work done so far and provide a basis for future research It is part of a series produced under the Technical Co operation and Assistance Programme to present the experience derived from the projects implemented by the Council of Europe Science and Technology in Historic Preservation Ray A. Williamson, Paul R. Nickens, 2012-12-06 Technology transfer has played an increasingly important role in historic preservation during the latter half of the twentieth century a situation attested to by the undertaking of an important congressional study in 1986 that assessed the role of federal agencies in the field In this book leading researchers update the earlier findings and contribute state of the art reviews and evaluations of technological progress in their areas of expertise
