Snow Calf Vesta M. Rundle, 1993-11 A family finds itself stranded in their farm home in western Oklahoma in a record breaking snow storm **Effects of Grazing by Wild Ungulates in Yellowstone National Park** Francis J. Singer, 1996

The Ecology of Large Mammals in Central Yellowstone Robert A. Garrott, Patrick J. White, Fred G.R. Watson, 2008-11-25 This book is an authoritative work on the ecology of some of America's most iconic large mammals in a natural environment and of the interplay between climate, landscape and animals in the interior of the world's first and most famous national park. Central Yellowstone includes the range of one of the largest migratory populations of bison in North America as well as a unique elk herd that remains in the park year round. These populations live in a varied landscape with seasonal and often extreme patterns of climate and food abundance. The reintroduction of wolves into the park a decade ago resulted in scientific and public controversy about the effect of large predators on their prey, a debate closely examined in the book. Introductory chapters describe the geography, geology and vegetation of the ecosystem. The elk and bison are then introduced and their population ecology described both pre and post wolf introduction, enabling valuable insights into the demographic and behavioral consequences for their ungulate prey. Subsequent chapters describe the wildlife-human interactions and show how scientific research can inform the debate and policy issues surrounding winter recreation in Yellowstone. The book closes with a discussion of how this ecological knowledge can be used to educate the public both about Yellowstone itself and about science, ecology and the environment in general. Yellowstone National Park exemplifies some of the currently most hotly debated and high profile ecological, wildlife management and environmental policy issues, and this book will have broad appeal not only to academic ecologists but also to natural resource students, managers, biologists, policy makers, administrators and the general public. Unrivalled descriptions of ecological processes in a world famous ecosystem based on information from 16 years of painstaking field work and collaborations among 66 scientists and technical experts and 15 graduate studies. Detailed studies of two charismatic North American herbivore species, elk and bison. Description of the restoration of wolves into central Yellowstone and their ecological interactions with their elk and bison prey. Illustrated with numerous evocative colour photographs and stunning maps.

Generations Laura Thibodeau Jones, 2011 This book documents the life of August Reekast from Prussia, Christina McKinnon Reekast from Nova Scotia and three generations of lives living on Calf, Outer Middle and Great Brewster Islands in the Boston Harbor from 1891 to the 1940s. August Reekast was a very well known lobster fisherman who lived and worked his trade off Outer Brewster Island; also was a boat Captain for Julia Arthur. Ms. Arthur, an actress in the late 1800s to early 1900s and her husband Benjamin P. Cheney were the owners of Calf Island and a beautiful Mansion which overlooked the Harbor. In 1908 the Reekast family lost everything in the Chelsea Massachusetts Fire, having no other option moved their eight children to the Islands where they rebuilt their lives. In the mid 1900s their son Gus Reekast became caretaker of Calf Island where he and his wife raised their daughter Augusta.
