Former Soviet Union Cem Mete, 2008-01-01 A significant portion of the population in the Eastern Europe and Central Asia region are either in poor health or disabled This research shows that the linkages between disability and economic and social outcomes of interest tend to be stronger in transition countries when compared with industrialized countries Reasons for this trend include the prevalence of a large informal sector in many developing countries relatively weak targeting performance of social assistance programs especially in poor transition countries and unavailability of broad based insurance mechanisms

to protect individuals against loss of income due to unexpected illness *Handbook of Socioeconomic Determinants of Occupational Health* Töres Theorell, 2020-08-12 This anthology provides readers of scientific literature on socioeconomic factors and working conditions with the newest knowledge in this field Since our world is subjected to constant change in accelerating speed scientific reviews and updates are needed Fortunately research methodology in epidemiology physiology psychology and sociology is also developing rapidly and therefore the scientific community can provide politicians and policy makers with increasingly sophisticated and exact descriptions of societal factors in relation to work The anthology starts in the macro level sphere with international perspectives and reviews related to working conditions in relation to political change the fall of the Soviet Union gender age precarious employment national economy and retirement Two chapters relate to national policies and activities in international organizations The second part of the book relates to the meso level sphere with reviews on social patterns in distributions of psychosocial and physical risks at work in general as well as reviews on noise shift work under overemployment occupational physical activity job intensity which may be a particularly important problem in low income countries digitization in modern work climate change childhood determinants of occupational health in adult years and theoretical models currently used in occupational epidemiology demand control effort reward organizational justice psychosocial safety climate conflicts bullying harassment This part of the book ends with two chapters on interventions one chapter on the use of cultural interventions and one on interventions and their evaluation in general and two chapters on financial aspects of poor good work environments and evaluations of interventions In the third part of the book the micro level is addressed Here mechanisms translating working conditions into physiology are discussed This starts in general theory relating basic theories regarding energy storage and release to psychosocial theory extension of demand control theory It also includes regeneration physiology autonomic nervous system function immunology and adverse behaviour Sections in the Handbook Macro level determinants of occupational health Akizumi Tsutsumi Meso level determinants of occupational health Morten Wahrendorf and Jian Li Micro level determinants of occupational health Bradley J Wright *Naturbilder und Lebensgrundlagen* Waltraud Ernst, 2006 [Promoting Healthy Aging Across the Lifespan](#) Elena Carrillo-Alvarez, Miriam Rodriguez-Monforte, Jordi Vilaró, Katherine Simone McGilton, 2024-12-26 Worldwide there is a generalized trend toward aged societies Between 2015 and 2050 the proportion of the world's population over 60 years will nearly double from 12% to 22% As life expectancy continues to increase and natality rates lower not only the composition of countries will change but also its health landscape However an increased life expectancy does not necessarily mean a healthy life In most high income countries more than 20% of those years are lived in ill health due to chronic conditions caused by non communicable diseases which compromises functional ability and well being key components of healthy aging In this way not only people's lives but also societal structures are being affected Based on the life course approach to healthy aging aging starts from conception In this regard the promotion of healthy aging requires preventive strategies that enhance

capacities during growth and development maintain them for as long as possible after maturity and slow down their rate of decline. Moreover, considering healthy aging across the lifespan entails focusing on different factors: life opportunities and choices that might significantly influence health status; lifestyle as well as health and social inequalities in older age; and challenges the focus of most research on the topic, which exclusively investigates the effect of influences operating in the later stages of life.

Health Disparities in the US and China Yingru Li, 2025-08-29 This book provides a comprehensive insight into health disparities in both the United States and China. It offers valuable perspectives on public health and policy through an examination of the spatial, social, and environmental dimensions of health disparities. Through comparative analysis of two distinct healthcare systems, economic conditions, and cultural contexts, the book offers a thorough assessment of how policies and social structures influence public health outcomes. It examines factors such as socioeconomic status, social capital, community, social and physical environments, healthcare systems, and health policies. The book adopts an interdisciplinary approach, drawing on key theoretical frameworks such as the socio-ecological model, social determinants of health, SDOH, and social capital theory. It integrates geospatial statistical and survey analyses and includes a series of case studies to explore health disparities. This book will be of interest to students and researchers in medical geography, medical sociology, and public health, as well as professionals and policy makers who address spatial, social, and environmental disparities.

Trust with Asian Characteristics Takashi Inoguchi, Yasuharu Tokuda, 2017-03-14 This volume, edited by a political scientist and a practicing medical doctor, is organized into two parts: interpersonal and institutional trust. To gauge trust, both interpersonal and institutional, in 29 Asian societies, the AsiaBarometer survey, the best and only available such data source in the world, was used. The survey, focusing on the quality of life in Asia, was carried out in the 2000s in 29 Asian societies in East, Southeast, South, and Central Asia, and in the United States, Australia, and Russia for comparative analysis. Trust is a key intermediate variable linking an individual and a broader society. Yet, systematically and scientifically assembled data have tended to be narrowly focused on Western societies. In the 2000s, non-Western data on the quality of life have steadily increased. The AsiaBarometer survey, however, is the instrument that best examines the quality of life in a large number of Asian societies with nationwide random sampling and face-to-face interviewing, with the number of samples ranging from 1,000 to 3,000. In gauging interpersonal trust, the question, "Generally, do you think people can be trusted, or do you think that you can't be too careful in dealing with people, i.e., that it pays to be wary of people," is asked, along with additional questions. In measuring institutional trust, the question is asked, "How much confidence do you place in the following institutions?" Listed are the central government, the courts, the military, the police, political parties, the parliament, mass media, business companies, medical hospitals, and other institutions. In examining interpersonal and institutional trust, Asia-wide special attention is paid to historical and geo-cultural backgrounds of the societies being surveyed. Examination of the link between trust of mass media and individual health, and between trust in medical care and individual health, focuses on Japan.

Among the 12 chapters 9 are reprints of journal articles published in the 2000s and the introduction and 2 other chapters were written especially for this book to reflect the latest progress in the field This work provides a rich source to be consulted by a wide range of readers interested in comparative politics quality of life and Asia in general **East-West Life Expectancy Gap in Europe** C. Hertzman, Shona Kelly, Martin Bobak, 1996-08-31 This volume presents the proceedings of an Advanced Research Workshop held under the auspices of the NATO International Scientific Exchange Programme on the Environmental and Non environmental Determinants of the East West Life Expectancy Gap in Europe The workshop brought together individuals from Eastern and Western Europe and North America who had a common interest in understanding the evolution of the relative declines in life expectancy in Central and Eastern Europe compared to the West over the past 30 years Between 1989 and 1993 I carried out a series of investigations into the effects of environmental pollution on human health in Central and Eastern Europe at first under the auspices of the World Bank and later under a broader multilateral multi agency arrangement known as the Environment for Europe Process These investigations provided unparalleled access to environmental health data from the region and offered a glimpse of what the contribution of pollution to health status was and what it was not At the same time the Program in Population Health of the Canadian Institute for Advanced Research CIAR and the International Centre for Health and Society ICHS at University College London were embarking upon multi disciplinary inquiries into the broad determinants of health in modern societies The work of the CIAR provided a framework for conceptualizing the East West life expectancy gap and its potential determinants the work of the ICHS provided specific insights into the relative contributions of these determinants Health and Social Change in Russia and Eastern Europe William C. Cockerham, 2002-05-03 Examines the social causes of the decline in life expectancy in Russia and Eastern Europe Countries discussed include Russia Poland Hungary Romania Bulgaria the Czech Republic and East Germany Book Review Index , 2003 Every 3rd issue is a quarterly cumulation **Baltic Suicide Paradox** Airi Värnik, Merike Sisask, Peeter Värnik, 2010 Connecting Paradigms of Motor Behaviour to Sport and Physical Education presents recent articles that examine theoretical and empirical research on the learning and teaching of motor skills The development of the book is based on the effect of synergism a phenomenon whereby the cooperative interaction of multiple psychological pedagogical and biological ideas drawn from the systemic model produces an outcome that is superior to that which could be expected from knowledge derived from the independent contributions of these disciplines For students researchers and teachers working in the fields of sports and physical education this book should promote a deeper understanding of previous knowledge and provide exposure to ideas that frame new perspectives related to the acquisition of skills and motor learning **Arab Immigrants in Metropolitan Detroit** Sawsan Hilmi Abdulrahim, 2005 *BMJ* , 2001 *Role of Health Economic Data in Policy Making and Reimbursement of New Medical Technologies* Mihajlo (Michael) Jakovljevic, Tetsuji Yamada, 2017-11-23 This Research Topic was focused on provision of novel medical technologies worldwide keeping in mind

financial sustainability challenge An exemplary area certainly are oncology pharmaceuticals where prices have increased 10 fold in recent years leading to concerns on affordability The objective of this collection of studies was to reveal some of the hidden underlying causes of unequal access to the medicines Another core issue is the growing proportion of out of pocket health spending in many world regions In line with the joint efforts of the editors and authors we received an exceptionally high response worldwide This E Book attracted a total of 37 self standing research submissions out of which 32 ultimately passed external peer review and got published Base affiliations of the authors spread across academia pharmaceutical and medical device industry governmental authorities and clinical medicine Their home institutions were situated in fifteen different countries inclusive of Japan Israel Russia USA Germany Italy Netherlands Austria Spain Malta Serbia Poland Bulgaria Hungary and Malaysia We frankly believe that authors succeeded to cover important literature gaps referring to these world regions We solicit global professional audience to put our efforts to the test and read this contribution to the health economics literature
