**The Handbook of Social Capital** Dario Castiglione, Jan W. van Deth, Guglielmo Wolleb, 2008-04-17 Social capital is a relatively new concept in the social sciences In the last twenty or so years it has come to indicate that networks of social relationships represent a resource for both the individual and society since they provide support for the individual and facilitate collective action Although this is not an entirely new idea the more systematic way in which social capital captures such an intuition has created a new theoretical paradigm and helped to develop a series of innovative research programmes in politics economics and the study of human well being The concept has gained currency beyond academia extending its influence to political and policy making circles at local national and international levels It has also affected the way in which social surveys are conceived and public policies assessed As the idea of social capital has spread the literature about it has increased exponentially After twenty years of rapid expansion it is time for a more considered and critical assessment of how the original concept has been adapted and refined and how successful its application has been The Handbook of Social Capital intends to do precisely that It offers a state of the art view of discussions about the concept of social capital and the way in which it has been applied in empirical research The organization of the Handbook reflects this intention by focusing on conceptual development and analysis in the first part by identifying two main areas of research in which social capital has favoured the development of new and influential research programmes political participation in democratic societies and economic development and by exploring the more normative and policy oriented consequences of social capital All chapters comprising the volume were specifically written for the Handbook by some of the main experts in the fields The book provides authoritative and innovative introduction to the study of social capital

**Social Capital** John Field, 2004-06-02 The term social capital is a way of conceptualizing the intangible resources of community shared values and trust upon which we draw in daily life It has achieved considerable currency in the social sciences through the very different work of Bourdieu in France and James Coleman and Robert Putnam in the States and has been taken up within politics and sociology as a means of explaining the decline of social cohesion and community values in many Western societies This concise introduction the only one currently available explains the theoretical underpinning of the subject the empirical work that has been done to explore its operation and the effect that it has had on policy making particularly within such international governmental bodies as the World Bank and the European Commission With genuine cross disciplinary appeal this exceptional book will be of great interest to students of sociology politics and social policy

Gouda, 2016 Water resources development Egypt social aspects history      Organ Donation and Transplantation Gurch Randhawa, 2012-02-08

Transplantation has succeeded in prolonging the lives of those fortunate enough to have received the gift of a body organ. Alongside this life saving development there lies another sadder side to the story: there are not enough organs to meet the ever increasing demand. This not only places an increasing emotional and physical burden among the waiting patients and families but heaps a great financial burden upon health services. This book provides an analysis and overview of public policy developments and clinical developments that will hopefully ensure an increased availability of organs and greater graft survival. Medical policy and academic experts from around the world have contributed chapters to the book.

**Values in Public Life** Patrick Riordan, 2007. The unifying theme of the papers in this volume is the human good analyzed from the perspectives of different disciplines. Their guiding intuition is that the topic of the human good is neglected. They draw attention to values which are present and operative in public life and attempt to strengthen the intellectual resources available for talking about them. The disciplines of theology, philosophy, politics, sociology, economics and aesthetics are engaged in a conversation about a shared concern and strengthen the literacy for appreciating the values which are aspects of our common goods.
