Social Capital and Poor Communities Susan Saegert, J. Phillip Thompson, Mark R. Warren, 2002-01-10 Neighborhood support groups have always played a key role in helping the poor survive but combating poverty requires more than simply meeting the needs of day to day subsistence Social Capital and Poor Communities shows the significant achievements that can be made through collective strategies which empower the poor to become active partners in revitalizing their neighborhoods Trust and cooperation among residents and local organizations such as churches small businesses and unions form the basis of social capital which provides access to resources that would otherwise be out of reach to poor families Social Capital and Poor Communities examines civic initiatives that have built affordable housing fostered small businesses promoted neighborhood safety and increased political participation At the core of each initiative lie local institutions church congregations parent teacher groups tenant associations and community improvement alliances The contributors explore how such groups build networks of leaders and followers and how the social power they cultivate can be successfully transferred from smaller goals to broader political advocacy For example community based groups often become platforms for leaders hoping to run for local office Church based groups and interfaith organizations can lobby for affordable housing job training programs and school improvement Social Capital and Poor Communities convincingly demonstrates why building social capital is so important in enabling the poor to seek greater access to financial resources and public services As the contributors make clear this task is neither automatic nor easy The book's frank discussions of both successes and failures illustrate the pitfalls conflicts of interest resistance from power elites and racial exclusion that can threaten even the most promising initiatives The impressive evidence in this volume offers valuable insights into how goal formation leadership and cooperation can be effectively cultivated resulting in a remarkable force for change and a rich public life even for those communities mired in seemingly hopeless poverty A Volume in the Ford Foundation Series on Asset Building

Social Capital and Poor Communities Susan Saegert, J. Phillip Thompson, Mark R. Warren, 2005-11-17 Neighborhood support groups have always played a key role in helping the poor survive but combating poverty requires more than simply meeting the needs of day to day subsistence Social Capital and Poor Communities shows the significant achievements that can be made through collective strategies which empower the poor to become active partners in revitalizing their neighborhoods Trust and cooperation among residents and local organizations such as churches small businesses and unions form the basis of social capital which provides access to resources that would otherwise be out of reach to poor families Social Capital and Poor Communities examines civic initiatives that have built affordable housing fostered small businesses promoted neighborhood safety and increased political participation At the core of each initiative lie local institutions church congregations parent teacher groups tenant associations and community improvement alliances The contributors explore how such groups build networks of leaders and followers and how the social power they cultivate can be successfully

transferred from smaller goals to broader political advocacy For example community based groups often become platforms for leaders hoping to run for local office Church based groups and interfaith organizations can lobby for affordable housing job training programs and school improvement Social Capital and Poor Communities convincingly demonstrates why building social capital is so important in enabling the poor to seek greater access to financial resources and public services As the contributors make clear this task is neither automatic nor easy The book s frank discussions of both successes and failures illustrate the pitfalls conflicts of interest resistance from power elites and racial exclusion that can threaten even the most promising initiatives The impressive evidence in this volume offers valuable insights into how goal formation leadership and cooperation can be effectively cultivated resulting in a remarkable force for change and a rich public life even for those communities mired in seemingly hopeless poverty A Volume in the Ford Foundation Series on Asset Building

Social Capital in Poor Communities Carlos Alberto Torres Vitolas,2011 This thesis examines the prospective value of social capital for developmental purposes It contends that the role that social relationships play in poor actors efforts to cope with and move out of poverty needs to be assessed under a dual understanding of social structure as both the medium and outcome of social action The study adopts Bourdieu s theory of practice as its main theoretical approach Actors investments in and uses of relationships were analysed in relation to their objective conditions stocks of capital and associated practices and strategies Social capital was operationalised as both networks of relations local external and vertical and social resources mediated access to assets of local economic relevance This approach was empirically examined via a two year longitudinal study that followed the experiences of residents of two poor rural villages located in the Department of Lambayeque in Northern Peru with regard to their quotidian practices and involvement in a participatory development intervention that conducted basic infrastructure productive and informational investments The study used a mixed method approach comprising in depth and unstructured interviews with residents and project staff household surveys three waves and participatory observation The evidence obtained showed that residents make extensive use of their relationships for economic purposes Most valuable social resources and connections however were unequally accessed by residents according to their levels of poverty This unequal re production of social capital was found to be related to actors material conditions and quotidian practices This social dynamic tended to be reproduced within the participatory intervention examined leading to an unequal expansion of social capital and related benefits among its beneficiaries The study concludes that the structural conditionality of the processes of using and building social capital makes it intimately associated with socioeconomic inequalities The theoretical and practical implications of this work are discussed in the concluding chapter

Putnam, 2001-08-01 Once we bowled in leagues usually after work but no longer This seemingly small phenomenon symbolizes a significant social change that Robert Putnam has identified in this brilliant volume *Bowling Alone* which *The Economist* hailed as a prodigious achievement Drawing on vast new data that reveal Americans changing behavior Putnam shows how we have become increasingly disconnected from one another and how social structures whether they be PTA church or political parties have disintegrated Until the publication of this groundbreaking work no one had so deftly diagnosed the harm that these broken bonds have wreaked on our physical and civic health nor had anyone exalted their fundamental power in creating a society that is happy healthy and safe Like defining works from the past such as *The Lonely Crowd* and *The Affluent Society* and like the works of C Wright Mills and Betty Friedan Putnam's *Bowling Alone* has

identified a central crisis at the heart of our society and suggests what we can do *Bowling Alone* Robert D. Putnam, 2000
Packed with provocative information about the social and political habits of twentieth century Americans *Neoliberalism, Civil Society and Security in Africa* P. Carmody, 2007-10-17
Free market policies have been in operation across Africa for the past 25 years yet they have failed to reverse deepening poverty This book explores with case studies why such policies continue to be implemented and the ways in which they have been reinvented by socialization depoliticization regionalization and securitization *De Gruyter Handbook of Poverty, Disadvantage and Entrepreneurship* Michael H. Morris, Susana C. Santos, 2024-12-16
Is entrepreneurship a pathway out of poverty Does creating a business represent a means for improving one's life circumstances Surprisingly little is known about ventures started by those in circumstances of poverty This pioneering handbook integrates diverse perspectives from around the world regarding the poverty and entrepreneurship interface While the tendency among many scholars economic developers and policymakers is to downplay these ventures arguing they are largely inefficient marginal enterprises that create little innovation and few jobs the chapters in this handbook demonstrate their significant contributions and encourage societies to invest in their development The authors explore a range of factors affecting the ability of the poor to create enterprises that contribute to their well being including the role played by personal capabilities education family support and faith availability of microfinance technology supportive community ecosystems and a munificent institutional environment By shedding light on issues that can help nations realize the potential of these ventures this volume demonstrates how entrepreneurship can serve as a source of empowerment while providing direction regarding ways to surmount the obstacles that stand in the way *Imprisoning Communities* Todd R. Clear, 2009-03-27
In the first detailed empirical exploration of the effects of mass incarceration on poor places *Imprisoning Communities* demonstrates that in high doses incarceration contributes to the very social problems it is intended to solve it breaks up family and social networks deprives siblings spouses and parents of emotional and financial support and threatens the economic and political infrastructure of already struggling neighborhoods Especially at risk are children who research shows are more likely to commit a crime if a father or brother has been to prison Clear makes the counterintuitive point that when incarceration concentrates at high levels crime rates will go up Removal in other words has exactly the opposite of its intended effect it destabilizes the community thus further reducing public safety **Rural Communities** Cornelia Butler Flora, 2018-03-05
Communities in rural America are a complex mixture of peoples and cultures ranging from miners who have been laid off in West Virginia to Laotian immigrants relocating in Kansas to work at a beef processing plant to entrepreneurs drawing up plans for a world class ski resort in California's Sierra Nevada *Rural Communities Legacy and Change* uses its unique Community Capitals framework to examine how America's diverse rural communities use their various capitals natural cultural human social political financial and built to address the modern challenges that face them Each chapter opens with a case study of a community facing a particular challenge and is followed by a comprehensive

discussion of sociological concepts to be applied to understanding the case This narrative topical approach makes the book accessible and engaging for undergraduate students while its integrative approach provides them with a framework for understanding rural society based on the concepts and explanations of social science This fifth edition is updated throughout with 2013 census data and features new and expanded coverage of health and health care food systems and alternatives the effects of neoliberalism and globalization on rural communities as well as an expanded resource and activity section at the end of each chapter

The Community Development Reader James DeFilippis, Susan Saegert, 2012 The Community Development Reader is the first comprehensive reader in the past thirty years that brings together practice theory and critique concerning communities as sites of social change The second edition is significantly updated and expanded to include a section on globalization as well as new chapters on the foreclosure crisis and emerging forms of community

Racial Inequality in New York City since 1965 Benjamin P. Bowser, Chelli Devadutt, 2019-09-01 A comprehensive exploration of racial inequality in New York City since 1965 In the past the study of racial inequality in New York City has usually had a narrow focus examining particular social problems affecting ethnic racial groups In contrast this book provides a comprehensive overview of racial inequality in the city's economy housing and education sectors over the last half century A collection of original

essays by some of New York's most well known and emerging urban experts *Racial Inequality in New York City since 1965* explores what city government has done and failed to do to address racial inequality. It examines the changes in circumstances of Asian, Latino, West Indian and African American New Yorkers, outlining how theirs have either improved or deteriorated relative to their white counterparts. The contributors also analyze how practices and policies in policing, public housing, public health and community services have maintained racial inequality and discuss how political participation can increase social capital among city residents in order to reduce racial inequality. The book concludes by offering a compendium of practical recommendations and actions that can be implemented to address racial inequality in the city. This book provides a broad and up to date survey of social and demographic trends in New York City. Unlike many other works it crosses policy arenas and is not shy in advocating community action. J. Phillip Thompson, New York City Deputy Mayor for Strategic Policy Initiatives.

Attacking Poverty, 2000. At the start of each decade the World Development Report focuses on poverty reduction. The World Development Report now in its twenty third edition proposes an empowerment security opportunity framework of action to reduce poverty in the first decades of the twenty first century. It views poverty as a multidimensional phenomenon arising out of complex interactions between assets, markets and institutions. This Report shows how the experience of poverty reduction in the last fifteen years has been remarkably diverse and how this experience has provided useful lessons as well as warnings against simplistic universal policies and interventions. It shows how current global trends present extraordinary opportunities for poverty reduction but also cause extraordinary risks including growing inequality, marginalization and social explosions. The World Development Report 2000/2001 explores the challenge of managing these risks in order to make the most of the opportunities for poverty reduction.

Islamic Radicalism and Multicultural Politics, Tahir Abbas, 2011-03-01. The expression of an Islamic political radicalism in Britain has been one of the most dramatic developments in recent decades. *Islamic Radicalism and Multicultural Politics* explores the nature of this phenomenon by analysing the origins of Islam and its historical contact with Western Europe and Britain and the emergence of Islamic political radicalism in the Muslim world and in the West. Tahir Abbas draws on historical analysis and contemporary case studies to explore the post war immigration and integration of Muslim groups, the complex relations that exist between a secular liberal Britain and a diverse but multifaceted Islam and the extent of social and economic inequalities that affect Muslims as individual citizens and in local area communities. He shows how violent extremism among British Muslims is in reality influenced by a range of issues including the factors of globalisation and contemporary politics, media and culture. Analysing and dissecting public policy, Abbas offers suggestions for tackling the major social, political and economic questions facing British Muslims in the post 7/7 era. An important contribution to the study of religion, race and ethnicity in modern Britain, this accessible work will be of interest to anyone working in the field of Islamic studies, sociology and political radicalism. Rural Inequality in Divided Russia

Stephen Wegren, 2013-07-24 This book examines economic and political polarisation in post Soviet Russia and in particular analyses the development of rural inequality It discusses how rural inequality has developed in post Soviet Russia and how it differs from the Soviet period and goes on to look at the factors that affect rural stratification and inequality using human and social capital profession gender and village location as independent variables The book uses survey data from rural households and fieldwork in Russia in order to highlight the multiplicity of divisions that act as fault lines in contemporary rural Russia

Adaptation to Climate Change and Variability in Rural West Africa Joseph A. Yaro, Jan Hesselberg, 2016-04-12 This book presents conceptual and empirical discussions of adaptation to climate change variability in West Africa Highlighting different countries experiences in adaptation by different socio economic groups and efforts at building their adaptive capacity it offers readers a holistic understanding of adaptation on the basis of contextual and generic sources of adaptive capacity Focusing on adaptation to climate change variability is critical because the developmental challenges West Africa faces are increasingly intertwined with its climate history Today climate change is a major developmental issue for agrarian rural communities with high percentages of the population earning a living directly or indirectly from the natural environment This makes them highly vulnerable to climate driven ecological change in addition to threats in the broader political economic context It is imperative that rural people adapt to climate change but their ability to successfully do so may be limited by competing risks and vulnerabilities As such elucidating those vulnerabilities and sources of strength with regard to the adaptive capacities needed to support successful adaptation and avoid maladaptation is critical for future policy formulation Though the empirical discussion is geographically based on West Africa its applicability in terms of the processes structures needs strategies and recommendations for policy transcends the region and provides useful lessons for understanding adaptation broadly in the developing world
