Nutritionism Gyorgy Scrinis, 2013-06-18 Popularized by Michael Pollan in his best selling *In Defense of Food* Gyorgy Scrinis's concept of nutritionism refers to the reductive understanding of nutrients as the key indicators of healthy food an approach that has dominated nutrition science dietary advice and food marketing Scrinis argues this ideology has narrowed and in some cases distorted our appreciation of food quality such that even highly processed foods may be perceived as healthful depending on their content of good or bad nutrients Investigating the butter versus margarine debate the battle between low fat low carb and other weight loss diets and the food industry's strategic promotion of nutritionally enhanced foods Scrinis reveals the scientific social and economic factors driving our modern fascination with nutrition Scrinis develops an original framework and terminology for analyzing the characteristics and consequences of nutritionism since the late nineteenth century He begins with the era of quantification in which the idea of protective nutrients caloric reductionism and vitamins curative effects took shape He follows with the era of good and bad nutritionism which set nutricentric dietary guidelines and defined the parameters of unhealthy nutrients and concludes with our current era of functional nutritionism in which the focus has shifted to targeted nutrients superfoods and optimal diets Scrinis's research underscores the critical role of nutrition science and dietary advice in shaping our relationship to food and our bodies and in heightening our nutritional anxieties He ultimately shows how nutritionism has aligned the demands and perceived needs of consumers with the commercial interests of food manufacturers and corporations Scrinis also offers an alternative paradigm for assessing the healthfulness of foods the food quality paradigm that privileges food production and processing quality cultural traditional knowledge and sensual practical experience and promotes less reductive forms of nutrition research and dietary advice

Escape From The Obesity Trap Dr Bruce Miller, 2016-01-01 Obesity is not simply weight gain nor is it a cosmetic or fitness issue Your goal is to reduce the hazardous and ugly fats that surround your abdomen and organs deep within your belly that put you at risk for degenerative diseases such as heart attack stroke high blood pressure diabetes sleep apnea cancer gout osteoarthritis and others There is no quick fix to fat loss only prevention as obesity is a lifestyle disease It took you years of poor eating habits and a sedentary lifestyle to make you fat Fat loss is therefore not an event a program dieting nor merely a number you see on the weighing scale or your BMI A pair of loose pants is a better indicator of fat loss In essence if you lost weight without reducing your waist circumference you haven't done much for yourself To escape from the obesity trap counting calories dieting or cutting fat out of your diet or starvation will not help Instead to lose fat you need to know how the body stores and burns fat You need to incorporate certain lifestyle changes to mobilize your hormones to co operate with the body to burn fat to overcome your body's resistance to permanent fat loss That is what this book is all about

Just Eat Barry Estabrook, 2021-02-02 The New York Times bestselling author of *Tomatoland* test drives the most popular diets of our time investigating the diet gurus contradictory advice and science behind the programs to reveal how we should and shouldn't be dieting Essential reading This will completely change your ideas about what you should be eating Ruth Reichl author of *Save Me the Plums* Investigative journalist Barry Estabrook was often on the receiving end of his doctor's scowl Realizing he had two options take more medication or lose weight Estabrook chose the latter but was paralyzed by the options Which diet would keep the weight off What program could he maintain over time What diet works best or even at all Over the course of three years Estabrook tried the regimens behind the most popular diets of the past forty years from paleo keto gluten free and veganism to the Master Cleanse Whole30 Atkins Weight Watchers examining the people claims and science behind the fads all while recording his mental and physical experience of following each one Along the way he discovered that all the branded programs are derived from just three diets There are effective scientifically valid takeaways to be cherry picked and the rest is just marketing Perhaps most alarming Estabrook uncovered how short term weight loss can do long term health damage that may go undetected for years Estabrook contextualizes his reporting with an analysis of our culture's bizarre dieting history dating back to the late 1800s to create a thorough and thoroughly entertaining look at what specific diets do to our bodies why some are more effective than others and why our relationship with food is so fraught Estabrook's account is a relatable pragmatic look into the ways we try to improve our health through dieting revealing the answer may be to just eat
