Suicide And Its Prevention The Role Of Attitude And Imitation:

Suicide and Its Prevention Rene F. W. Diekstra, Ronald Maris, Stephen Platt, Armin Schmidtke, Gernot Sonneck, 2023-10-20 In many countries of the world the number of persons that commit or attempt suicide has risen considerably over the past two decades Particularly among young people suicide rates have increased dramatically suicide now ranking as the second or third cause of death among them The causes of this development have been questioned by health care workers scientists and policy makers Although much still remains unknown it has become increasingly clear that one way in which a society affects the probability that an individual will die by his or her own hand is through the attitudes it adopts towards suicide Modern society confronts people more and more often with attitudes and models such as in the mass media that express a permissive stance towards voluntary death in a variety of circumstances Evidence suggest that imitation might indeed play a significant role in the frequency of suicide A related aspect is the attitudes care givers entertain themselves towards suicide This affects both the way in which they approach and treat individuals in suicidal crisis as well as the readiness of these individuals to look for professional help The present volume presents an overview of important recent work on the influences of societal and care givers attitudes on suicide as well provoking premature suicidal deaths

Suicide and Its Prevention René F. W. Diekstra, 1989 In many countries of the world the number of persons that commit or attempt suicide has risen considerably over the past two decades Particularly among young people suicide rates have increased dramatically suicide now ranking as the second or third cause of death among them The causes of this development have been questioned by health care workers scientists and policy makers Although much still remains unknown it has become increasingly clear that one way in which a society affects the probability that an individual will die by his or her own hand is through the attitudes it adopts towards suicide Modern society confronts people more and more often with attitudes and models such as in the mass media that express a permissive stance towards voluntary death in a variety of circumstances Evidence suggest that imitation might indeed play a significant role in the frequency of suicide A related aspect is the attitudes care givers entertain themselves towards suicide This affects both the way in which they approach and treat individuals in suicidal crisis as well as the readiness of these individuals to look for professional help The present volume presents an overview of important recent work on the influences of societal and care givers attitudes on suicide as well provoking premature suicidal deaths *Preventive Strategies on Suicide* Diekstra, Gulbinat, Kienhorst, Leo, 2023-07-31 Recent estimates by The World Health Organisation and The World Bank indicate that throughout the world each and every year more than 800 000 persons die as a consequence of suicide This means that the death toll of suicide equals and in many countries even exceeds that of road traffic accidents In addition to the number of suicidal deaths at least ten times as many persons make non fatal attempts to take their lives or harm themselves often seriously enough to require medical attention and not infrequently resulting in irreversible disability But still these figures inadequately describe the magnitude of human

loss and suffering caused by suicide If one assumes that for every suicidal death there are at least five persons whose lives are profoundly and often for many years affected by the event emotionally socially and economically by the event then each year millions of survivor victims are added to the tens of millions already out there Hence suicide is an ever recurring catastrophe of the first degree It is not a phenomenon that first and foremost forms a dubious privilege of the so called highly developed countries Suicide also occurs in the developing countries and there is more than suggestive evidence that in several of these countries the suicide rate equals or even surpasses the highest national rates shown by official statistics It follows that suicide is an extremely important public health problem It is however a problem that is painfully neglected Throughout the world resources devoted to the prevention of suicide are only a tiny fraction of those devoted to the prevention of comparable problems such as road traffic accidents or to problems of lesser magnitude at least in the industrialized countries such as HIV infection and Aids This volume produced under the supervision and auspices of the World Health Organization brings together for the first time information on epidemiological clinical and preventive intervention aspects regarding suicide that have global significance and applicability After a detailed description of the epidemiology of suicide and suicidal behaviour on an international scale a large part of the book is devoted to the how to s of developing and organizing suicide prevention programs and services in different national and cultural settings both at clinical and community level In addition a wealth of practical information for health care workers and volunteers is provided on how to evaluate and deal with acute suicide risk Examples of successful preventive intervention programs and projects from the developed as well as the developing world are provided Legal and ethical problems involved in suicide prevention are also discussed Finally both cultural and biological aspects of suicidal behaviour as well as their clinical practice relevance are examined

Suicide Prevention D. de Leo, Armin Schmidtke, René F.W. Diekstra, 2007-05-08 Suicide Prevention A Holistic Approach contains the selected and edited papers that were presented during the congress Suicide Disease Disadvantage A Holistic Approach organized by the International Association for Suicide Prevention which was held in June 1995 in Venice Suicide prevention is still sadly neglected by governments and public health authorities despite the fact that in several Western countries suicide has become the primary cause of death among younger age groups The selected papers express the need for a holistic viewpoint in suicide management The subjects range from parasuicide to the role of the media from the special type of psychotherapeutic approach required to the most recent guidelines in pharmacological treatment from a homage to the memory of Erwin Ringel to the presentation of specific national prevention schemes The book will be of interest to public health workers doctors psychologists and social workers as well as voluntary staff and their organizations and to all those who make suicide prevention one of their primary interests

The International Handbook of Suicide and Attempted Suicide Keith Hawton, Kees van Heeringen, 2000-11-21 Recent research in the area of suicidology has provided significant new insights in the epidemiological psychopathological and biological characteristics of suicidal behaviour The

International Handbook of Suicide and Attempted Suicide is the first book to bring together this expertise and translate it into practical guidelines for those responsible for policy issues and for those involved in the treatment and prevention of suicidal behaviour. Leading international authorities provide a truly comprehensive and research based reference to understanding treating and preventing suicidal behaviour. They explore concepts and theories which best guide work within this field and detail key research which has supported conceptual developments preventive interventions and clinical treatment. No self respecting worker in deliberate self harm and suicide prevention either clinical or research can afford to be without access to this comprehensive handbook. Possession and regular use may well become a marker of serious involvement in the subject. This is the most comprehensive up to date informative and well written source of information on suicide and suicidal behaviour an invaluable work of reference which will be essential for clinicians and researchers for many years to come. Handbook of Cultural Health Psychology Shahe S. Kazarian, David R. Evans, 2001-08-24 The Handbook of Cultural Health Psychology discusses the influence of cultural beliefs norms and values on illness health and health care. The major health problems that are confronting the global village are discussed from a cultural perspective. These include heart disease cancer HIV AIDS pain and suicide. The cultural beliefs and practices of several cultural groups and the unique health issues confronting them are also presented. The cultural groups discussed include Latinos Aboriginal peoples people of African heritage and South Asians. The handbook contributes to increased personal awareness of the role of culture in health and illness behavior and to the delivery of culturally relevant health care services. Many societies are culturally diverse or becoming so the cultural approach is a unique and necessary addition to the health psychology area. Satisfies the ever increasing appetite of health psychologists for cultural issues in health and women s health issues. Major and global health concerns are covered including heart disease cancer HIV AIDS pain suicide and health promotion. The health beliefs and practices of Latinos people of African heritage Aboriginal peoples and South Asians are presented without stereotyping these cultural groups. The handbook provides excellent information for health care researchers practitioners students and policy makers in culturally pluralistic communities. References are thorough and completely up to date.

Suicide Nils Retterstøl, 1993-06-17 A sensitive and enlightening account of the problem of suicide and attempted suicide in today s societies.

Contemporary Perspectives on Rational Suicide James L. Werth, 2013-06-17 This text brings together spokespersons from several different disciplines who can present their arguments for or against rational suicide as a viable concept and consequently a realistic option. The pros and cons of the discussion format bring the readers to search for their beliefs and the final decision of acceptance or rejection of the concept is left to each individual reader.

To Die in Cuba Louis A. Pérez Jr., 2012-12-01 For much of the nineteenth century and all of the twentieth the per capita rate of suicide in Cuba was the highest in Latin America and among the highest in the world a condition made all the more extraordinary in light of Cuba's historic ties to the Catholic church In this richly illustrated social and cultural history of suicide in Cuba Louis A Perez Jr explores the way suicide passed from the unthinkable to the unremarkable in Cuban society In a study that spans the experiences of enslaved Africans and indentured Chinese in the colony nationalists of the twentieth century republic and emigrants from Cuba to Florida following the 1959 revolution Perez finds that the act of suicide was loaded with meanings that changed over time Analyzing the social context of suicide he argues that in addition to confirming despair suicide sometimes served as a way to consecrate patriotism affirm personal agency or protest injustice The act was often seen by suicidal persons and their contemporaries as an entirely reasonable response to circumstances of affliction whether economic political or social Bringing an important historical perspective to the study of suicide Perez offers a valuable new understanding of the strategies with which vast numbers of people made their way through life if only to choose to end it To Die in Cuba ultimately tells as much about Cubans lives

culture and society as it does about their self inflicted deaths **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1990 Handbook of Adolescent Development Sandy Jackson,Luc Goossens,2020-01-29

Handbook of Adolescent Development fills a gap in the literature on adolescent development and behaviour all of the authors of the various chapters were invited to include as many findings on European adolescents as possible Through this specific emphasis the handbook provides a complement to other reviews of the literature that are mostly based on North American samples The contributors are all eminent researchers in the field and the individual chapters cover their specific areas of expertise Theories of adolescence along with emotional physical and cognitive issues are explored Topics covered include families peer relations school and leisure time as well as problem areas such as depression drug consumption and delinquency Handbook of Adolescent Development also incorporates a comprehensive review of the literature in the area and considers avenues for future research This multidisciplinary text will be of interest to those studying and researching in the fields of developmental psychology sociology demography epidemiology and criminology **Life Span Perspectives of**

Suicide A.A. Leenaars,2013-06-29 In recent years a great deal of interest has been focused on suicide in the elderly and in the young However in line with modern trends in psychology sociology psychiatry anthropology and other human health fields interest has now shifted to suicide across the life span from childhood through adulthood to old age This book has been conceptualized within this developing tradition There are various ways in which life s timelines can be conceptualized Developmental theory we believe should be open ended This has widened and will continue to widen our understanding of many complicated human acts including suicide Though suicide is in many ways the same across the entire life span understanding the time lines in the suicidal process is imperative To do so however is we believe challenging In this volume we attempt to engage in the process of understanding suicide from a developmental perspective To do this we have been fortunate to obtain the cooperation of a highly competent group of contributors One interesting footnote to our list of authorities is that they represent suicidologists from across the life span a few who are at the beginning of their careers a large number in their middle years and a few who are in the Indian summer of their professional lives **Suicide and**

Culture 2.0 Erminia Colucci,David Lester,2025-03-24 **BOLD TEXT** Integrating the role of culture is critical in preventing suicide Written by leading suicide researchers Explores suicide in different cultural contexts Highlights how to conduct culturally sensitive studies Building on the seminal work of Colucci and Lester 2013 this volume examines the unique perspective of the role culture plays in suicide research and prevention With the current domination of individual and largely biomedical approaches in the field these leading social scientists and suicide researchers carefully show how important integrating sociocultural factors is in helping to prevent people from dying by suicide and support those who live with suicidality The first section addresses the fundamental issues of why culture is of vital importance in understanding and preventing suicidal behavior what the cultural meaning of suicide is and where current research and theory are taking us It

concludes with a thought provoking perspective on suicide as a staged performance The second section features a mixed methods cross cultural study on the meanings of suicide in Australian Indian and Italian cultures Additional chapters explore a culturally specific form of suicide i e sati in India suicide among Roma and Irish Travellers and a community based suicide prevention strategy for different populations including migrants and refugees and people from low and middle income Asian countries The authors conclude with insightful recommendations for conducting culturally sensitive and meaningful studies This volume is essential reading for anyone involved in suicide research and prevention and more broadly to those interested in the sociocultural and political contexts of mental health

Oxford Textbook of Suicidology and Suicide Prevention Danuta Wasserman,2021 Part of the authoritative Oxford Textbooks in Psychiatry series the new edition of the Oxford Textbook of Suicidology and Suicide Prevention remains a key text in the field of suicidology fully updated with new chapters devoted to major psychiatric disorders and their relation to suicide

The Evolution of Suicide C A Soper,2018-07-23 A fascinating read Contrary to what the title might suggest this is an upbeat exploration of suicide with a positive message Jeanine Connor Therapy Today December 2018 This thought provoking volume offers a distinctly human evolutionary analysis of a distinctly human phenomenon suicide Its pain and brain model posits animal adaptations as the motivator for suicidal escape and specific human cognitive adaptations as supplying the means while also providing a plausible explanation for why only a relatively small number of humans actually take their own lives The author hypothesizes two types of anti suicide responses active and reactive mechanisms prompted by the brain as suicide deterrents Proposed as well is the intriguing prospect that mental disorders such as depression and addiction long associated with suicidality may serve as survival measures Among the topics covered Suicide as an evolutionary puzzle The protection against suicide afforded to animals and young children Suicide as a by product of pain and human cognition Why psychodynamic defenses regulate the experiencing of painful events Links between suicidality and positive psychology The anti suicide role of spiritual and religious belief In raising and considering key questions regarding this most controversial act *The Evolution of Suicide* will appeal to researchers across a range of behavioral science disciplines At the same time the book s implications for clinical intervention and prevention will make it useful among mental health professionals and those involved with mental health policy
