Suicide Explained The Australian Experience:

Suicide Explained Riaz Hassan,1995 Suicide explained the Australian experience Undeserved Death: A Study on Suicide of Farmers in Andhra Pradesh (2000 - 2005) K.S. Bhat,S. Vijaya Kumar,2006-07-12 The multi dimensional nature of farmers distress in several states of India is pushing farmers to commit suicides The deficiencies in institutional factors those related to credit insurance supply of inputs such as seeds fertilizers pesticides and marketing are becoming serious Social factors such as the non empowerment of elected local bodies the exploitative attitude of moneylenders and merchants and gender discrimination are aggravating the deprivation of small and marginal farmers and landless agricultural labourers Compounding the crumbling institutional and social support systems are the other factors such as disconnection between research education and extension organizations and rural realities land degradation unsustainable exploitation of groundwater and consecutive droughts All these resulted in the agrarian crisis more particularly in Andhra Pradesh Karnataka Kerala Tamilnadu Maharashtra Madhya Pradesh Orissa Gujarat and Punjab Analyzing some of these factors pertaining to agrarian crisis and farmer s suicides a pilot study and other articles in this book analytically bring out the prevailing situation in Andhra Pradesh A few articles in the book also highlight the situation in Karnataka Maharashtra and Punjab Some of the implications discussed by the academicians activists researchers and others will definitely help the policy makers in their future programme to safeguard and strengthen the livelihood security of the families of resource poor small and marginal farmers The book will be of immense use both for the scholars and the government authorities **Suicide and Society in India** Peter Mayer,2010-10-18 In India about 123 000 people take their own lives each year the second highest total in the world There is a suicide death in India almost every 4 minutes and it is the leading cause of death for rural Indians especially women in early adulthood This book presents a comprehensive analysis of suicide in India based on original research as well as existing studies and looks at the issue in an international sociological and historical context The author looks at the reliability of suicide data in India and goes on to discuss various factors relating to suicide including age gender education and marriage Among its findings the book exposes a hidden youth suicide crisis in India which is argued to be far more serious than the better known crisis of farmer suicides The book dispels many myths that are commonly associated with suicide and highlights a neglected public health problem Suicide in the region of Pondicherry is looked at in detail as well as in the Indian Diaspora This book is a useful contribution to South Asian Studies as well as studies in Mental Health and Sociology *Policing and the Mentally Ill* Duncan Chappell,2013-06-13 In countries with democratic traditions police interactions with the mentally ill are usually guided by legislative mandates giving police discretion and possibly resulting in referrals for assistance and treatment But all too frequently the outcome of these interactions is far less therapeutic and leads to a cycle of arrests and ultimately incarceration Stemming from an initiative in Memphis Tennessee two decades ago police departments in many parts of the world have set up specific programs with crisis intervention teams

to facilitate police contact with the mentally ill Policing and the Mentally Ill International Perspectives examines how these types of programs have fared in jurisdictions across the world The book begins with developments in North America and Europe traditionally the locus of much of the innovation and change in policing and related areas It demonstrates how a number of jurisdictions in Europe have only recently begun to recognize therapeutic intervention with the mentally ill as a priority issue and still frequently suffer from a lack of significant resources The largest section of the book focuses on Australia where local law enforcement agencies have displayed a remarkable enthusiasm for and commitment to change in their management of interactions with citizens with mental illness Finally the book examines the particular challenges of providing humane and effective policing for persons with mental illnesses in parts of the developing world These challenges often involve dealing with entrenched cultural beliefs and practices based on superstition fear and prejudice regarding persons thought to be mentally ill Interactions between police and persons with mental illnesses comprise an important and sensitive aspect of everyday policing The 16 chapters in this book offer a wide range of cross cultural perspectives on this essential aspect of policing enabling police practitioners to develop a best practices approach to managing their interactions with this vulnerable segment of the community
