This book is an accessible and practical guide to all of the key issues and practices in mental health care for children and young people aimed at all health and social care professionals working with this age group and partner agencies who work alongside child and adolescent mental health services. Written by an expert in the field, the book brings clarity to practice by exploring and explaining the context, role and processes involving child and adolescent mental health services. It also sets out the specific mental health difficulties young people and their families present to services, as well as how to make good health assessments, plans and interventions used in the treatment of children and young people, including managing risk and safeguarding. Features of the book include Questions to encourage your reflection on different key issues in your own practice. Up to date information on current policy. Key points summaries and suggested further reading at the end of each chapter. This text will be an invaluable tool for all students and practitioners working with children and young people in a health context. This book should become a key textbook of choice for a wide range of health care professionals and students. It encourages autonomous learning and helps develop critical analytical skills. Each chapter follows a logical progression using key objectives which relate to a range of activities and up to date evidenced based sources of information. The range of depth and breadth of material is contemporary and as such should meet the academic, managerial and clinical background of the reader. Helen Matthews, Senior Lecturer in Health and Community Care, University of West London, UK. This book is a fantastic tool for students, CAMHS Practitioners who are new in the field and professionals from partner agencies. It provides a comprehensive overview of CAMHS. A Study of Suicide in Rural China Yanwu Liu, 2023-03-03. This book identifies and analyzes the significant regional differences in suicide rates of various age groups and different sexes among Chinese rural residents. It goes beyond the analytic dichotomy in traditional Western suicide studies and argues that the phenomena of suicide among Chinese farmers are the result of a combination of social structure and social action rather than being determined by either of these two factors alone. This study analyses suicide rates among young married women in rural areas as well as those of elderly people in rural areas. The responsive trend for the near future is also projected. The underlying dynamics and causal mechanisms of these phenomena are carefully analyzed using an innovative structure action theory framework.
