Risk Management with Suicidal Patients Bruce Bongar, Alan L. Berman, Ronald W. Maris, Morton M. Silverman, Wendy Packman, Eric A. Harris, 1999-07-16

How does the law define reasonable care in the treatment of suicidal patients What are the most clinically and legally appropriate procedures for evaluating and managing suicide risks And what forms of precautionary planning and documentation are recommended for minimizing the likelihood of malpractice actions Drawing upon years of clinical experience as well as extensive malpractice claims data and relevant case law this book outlines effective assessment management and treatment procedures that balance the need for high quality care with the requirements of court determined and statutory standards Three widely cited papers on standards of care are accompanied by four new chapters on clinical and legal risk management and issues surrounding pharmacotherapy Offering frank balanced coverage of an extremely challenging clinical situation *Risk Management with Suicidal Patients* helps psychologists psychiatrists and other practitioners develop their own clinically and legally informed strategies for providing the best possible care It is also an invaluable resource for legal professionals and may serve as a text in psychology and psychiatry ethics courses and courses on mental health law **Treatment Of Suicidal People** Robert A. Neimeyer, John T. Maltzberger, Antoon A.

Leenaars, 2013-02-01 *Treatment of suicidal people* takes three forms prevention strategies to avert conditions leading to suicide intervention treatment and care during the crisis and postvention response after the event has occurred Unlike other current literature here the focus is on the state of the art of intervention This type of examination is essential because suicidal people themselves are in need of such treatments crisis intervention psychotherapy psychopharmacology and hospitalization Written by professionals in the field the *Treatment of Suicidal People* allows readers to participate in a learning experience First is a case presentation of an individual Arthur Inman and his long road toward suicide as chronicled in his personal diary The second section puts forth guidelines for the evaluation of suicide risk and crisis intervention A focus on more sustained efforts in psychotherapy is next a theme which is continued in the fourth part by addressing psychiatric issues that are essential for treatment of highly disturbed and lethal patients The following section examines a number of clinical and legal issues that transcend any one population of suicidal people and any particular treatment approach or context And lastly the volume returns to Arthur Inman with case consultations providing alternative perspectives and recommendations on his treatment Suicide and related forms of self injurious behaviour can be circumvented if the involved professionals are sufficiently trained in assessment and prevention **Review of Navy Investigation of U.S.S. Treating Suicidal Behavior M. David Rudd,Thomas E. Joiner,M. Hasan Rajab,2004-07-26 This manual provides an empirically supported approach to treating suicidality that is specifically tailored to today's managed care environment. Structured yet flexible, the model is fully compatible with current best practice standards. The authors establish the empirical and theoretical foundations for time-limited treatment and describe the specific tasks involved in assessment and intervention. The book then details effective ways to conduct a rapid case conceptualization and outpatient risk assessment, determine and implement individualized treatment targets, and monitor treatment outcomes. Outlined are clear-cut intervention techniques that focus on symptom management, restructuring the patient's suicidal belief system, and building such key skills as interpersonal assertiveness, distress tolerance, and problem solving. Other topics covered include the role of the therapeutic relationship, applications to group work and longer-term therapy, the use of medications, patient selection, and termination of treatment. Illustrated with helpful clinical examples, the book features numerous tables, figures, and sample handouts, some of which may be reproduced for professional use. **The American Psychiatric Association**

Publishing Textbook of Psychosomatic Medicine and Consultation-Liaison Psychiatry, Third Edition James L. Levenson, M.D.,2018-08-06 Preceded by American Psychiatric Publishing textbook of psychosomatic medicine, psychiatric care of the medically ill, edited by James L. Levenson, 2nd ed., 2011. **Suicide Risk Assessment and Prevention** Maurizio Pompili,2022-12-19 This book explores suicide prevention perspectives from around the world, considering both professionals' points of view as well as first-person accounts from suicidal individuals. Scholars around the globe have puzzled over what makes a person suicidal and what is in the minds of those individuals who die by suicide. Most often, the focus is not on the motives for suicide nor on the phenomenology of this act, but on what is found from small cohorts of suicidal individuals. This book offers a tentative synthesis of a complex phenomenon and sheds some light on models of suicide that are less frequently encountered in the literature. Written by international experts, it makes a valuable contribution to the field of suicidology that appeals to a wide readership, from mental health professionals to researchers in suicidology and students.

Beutler, John Clarkin, Bruce Bongar, 2000-02-03 From initial consultation to termination of treatment psychologists and other mental health practitioners make a series of crucial decisions to determine the progress and therapy of the patient These decisions have varied implications such as the clinical course of the patient the efficacy and efficiency of the treatment and the cost of the sessions Thus the decisions made by mental health professionals need to be accurate and consistent respecting a series of guidelines that will ultimately benefit the patient This is the first in a series of guidebooks that is designed to do just that by providing practitioners with some structure in the development of treatment programs Previous guidelines have been based on consensus panels of experts or on the opinions of membership groups causing guidelines to be very far off from the findings of empirical research Here guidelines are presented in terms of treatment principles rather than in terms of specific treatment models or theories and they do not favor one theory of psychotherapy over another Instead they define strategies and considerations that can be woven into comprehensive treatment programs The entire series of guidebooks will cover numerous topics including anxiety disorders drug abuse alcohol abuse and treatment of serious mental disorders This volume will cover in detail the nature of depression issues in treatment research contemporary treatments and implications for education and training It is ideal for postgraduates and professionals in the mental health field and is intended to provide important background on treatment of non bipolar depressive disorders *The American Psychiatric Publishing Textbook of Psychosomatic Medicine* James L.
