New Developments in Pathways Towards Diversity and Inclusion in STEM: A United States Perspective Alexander Gates, Juan Gilbert, Chris Botanga, Kim Nguyen, Bonita London, 2022-10-17 The Louis Stokes Alliances for Minority Participation LSAMP program of the US National Science Foundation has been a primary force for raising the success and graduation of minority students in STEM for 30 years Increasing the number of underrepresented students earning baccalaureate degrees and entering graduate school in STEM is the goal of LSAMP This goal has been nearly achieved through the formation of alliances of degree granting institutions of higher learning varying from community colleges to major research institutions Currently there are 59 alliances including more than 400 institutions LSAMP is responsible for more than 650 000 bachelor s degrees earned by minority students in STEM The papers for this Research Topic should focus on the use of LSAMP activities programs and collaborations to develop pathways to success and graduation of STEM majors from minority groups that underrepresented in STEM These pathways can include any segment from pre college through graduate school Areas of special interest include mentoring research experiences transitions between levels and novel approaches for retention The studies should be research based and rigorous They can be pure research studies curriculum and design or literature reviews but they must be at a cutting edge level and be subject to detailed review and assessment

Routledge Handbook of the Sociology of Higher Education James E. Côté, 2016-06-03 This is the first handbook to cover the sociological approaches to higher education It is timely because of global expansions of mass higher educational systems especially as these systems come under scrutiny by a variety of stakeholders Questions are being raised about the value of traditional pedagogies along with calls for efficiency accountability and cost reduction but above all job training Within this neoliberal context each chapter examines different sociological aspects of and debates about educational institutions as status conferring organizations with myriad positional characteristics experiences and outcomes Many current debates concern the legitimacy of the statuses conferred including the continuing debate regarding the role of universities in legitimating social class reproduction as well as more recent concerns about standards in mass systems This handbook puts these issues and debates in focus in ways that will be of interest to a variety of stakeholders within academia as well as in policy circles The Unofficial, Unbiased Guide to the 331 Most Interesting Colleges 2005 Kaplan, Inc, 2004-06-22 Engaging

and informative The Unofficial Unbiased Guide to the 331 Most Interesting Colleges 2005 is a must read reference for every college bound student Readin' + Writin' for the Hard-hat Crowd Susan R. Merrifield, 2005 Readin Writin for the Hard Hat Crowd explores the history of an urban public university from its conception in 1964 to the dawn of the twenty first century The reader views this place in time through the lens of the evolving nature of freshman English an introductory curriculum that began as four semesters of Great Books The author herself among those once labeled the hard hat crowd received an undergraduate education similar to that experienced by her contemporaries at elite private colleges Yet while this school

once considered a poor man's Harvard was founded with a mission to provide academic equity the curriculum evolved to one that responded to pressure for relevancy and practicality **Completing College** Vincent Tinto, 2012-04-15 Even as the number of students attending college has more than doubled in the past forty years it is still the case that nearly half of all college students in the United States will not complete their degree within six years It is clear that much remains to be done toward improving student success For more than twenty years Vincent Tinto's pathbreaking book *Leaving College* has been recognized as the definitive resource on student retention in higher education Now with *Completing College* Tinto offers administrators a coherent framework with which to develop and implement programs to promote completion Deftly distilling an enormous amount of research Tinto identifies the essential conditions enabling students to succeed and continue on within institutions Especially during the early years he shows that students thrive in settings that pair high expectations for success with structured academic social and financial support provide frequent feedback and assessments of their performance and promote their active involvement with other students and faculty And while these conditions may be worked on and met at different institutional levels Tinto points to the classroom as the center of student education and life and therefore the primary target for institutional action Improving retention rates continues to be among the most widely studied fields in higher education and *Completing College* carefully synthesizes the latest research and most importantly translates it into practical steps that administrators can take to enhance student success *School-college Collaboration* Nancy Carriuolo, 1996
