The Collection of Alfred Stieglitz Metropolitan Museum of Art (New York, N.Y.), Weston J. Naef, 1978 *The Global Flows of Early Scottish Photography* Anthony W. Lee, 2019-05-30 Almost immediately after the invention of photography Scottish photographers took their clunky cameras on the road to capture the stories of peoples and communities touched by the forces of British imperialism For the next thirty years their journeys would take them far from their homes in the Lowlands to the Canadian wilderness and the treaty ports and rivers of China The Global Flows of Early Scottish Photography is about the interplay between these photographers ambitions and the needs and desires of the people they met Anthony Lee tracks the work of several famous innovators of the art form including the pioneering team of D O Hill and Robert Adamson in Edinburgh Canada's first great photographers the Scottish immigrants William Notman and Alexander Henderson in Montreal the globetrotting John Thomson in Hong Kong and Lai Afong the first widely known Chinese photographer Lee reveals their pictures in the context of migration and the social impact wrought by worldwide trade and competing nationalisms A timely book it tells of an era when cameras emerged to give shape and meaning to some of the most defining moments brought about by globalization in the nineteenth century Beautifully written and richly illustrated in full colour The Global Flows of Early Scottish Photography weaves stories together to show that even the earliest pictures were sites of fierce historical struggle The Photographic Experience, 1839-1914: Images and Attitudes, 1994 **The Cinematic Footprint** Nadia Bozak, 2011-10-28 Film is often used to represent the natural landscape and increasingly to

communicate environmentalist messages Yet behind even today's green movies are ecologically unsustainable production distribution and consumption processes Noting how seemingly immaterial moving images are supported by highly durable resource dependent infrastructures *The Cinematic Footprint* traces the history of how the hydrocarbon imagination has been central to the development of film as a medium Nadia Bozak's innovative fusion of film studies and environmental studies makes provocative connections between the disappearance of material resources and the emergence of digital media with examples ranging from early cinema to Dziga Vertov's prescient eye from Chris Marker's analog experiments to the digital work of Agnès Varda James Benning and Zacharias Kunuk Combining an analysis of cinema technology with a sensitive consideration of film aesthetics *The Cinematic Footprint* offers a new perspective on moving images and the natural resources that sustain them
