*Philosophy and the City* Keith Jacobs, Jeff Malpas, 2019-03-15 Philosophy has its origins in the city and in the context of our own highly urbanised modes of living the relationship between philosophy and the city is more important than ever The city is the place in which most humans now play out their lives and the place that determines much of the cultural social economic and political life of the contemporary world Towards a Philosophy of the City explores a wide range of approaches and perspectives in a way that is true to the city's complex and dynamic character The volume begins with a comprehensive introduction that identifies the key themes and then moves through four parts examining the concept of the city itself its varying histories and experiences the character of the landscapes that belong to the city and finally the impact of new technologies for the future of city spaces Each section takes up aspects of the thinking of the city as it develops in relation to particular problems contexts and sometimes as exemplified in particular cities This volume provides an invaluable resource for students and scholars in Philosophy Geography Sociology and Urban Studies *Unbuilt Utopian Cities 1460 to 1900: Reconstructing their Architecture and Political Philosophy* Tessa Morrison, 2016-03-09 Bringing together ten utopian works that mark important points in the history and an evolution in social and political philosophies this book not only reflects on the texts and their political philosophy and implications but also their architecture and how that architecture informs the

political philosophy or social agenda that the author intended Each of the ten authors expressed their theory through concepts of community and utopian architecture but each featured an architectural solution at the centre of their social and political philosophy as none of the cities were ever built they have remained as utopian literature Some of the works examined are very well known such as Tommaso Campanella's *Civitas Solis* while others such as Joseph Michael Gandy's *Designs for Cottages* are relatively obscure However even with the best known works this volume offers new insights by focusing on the architecture of the cities and how that architecture represents the author's political philosophy It reconstructs the cities through a 3 D computer program ArchiCAD using Artlantis to render Plans sections elevations and perspectives are presented for each of the cities The ten cities are Filarete Sforzina Albrecht Dürer Fortified Utopia Tommaso Campanella The City of the Sun Johann Valentin Andreae Christianopolis Joseph Michael Gandy An Agricultural Village Robert Owen Villages of Unity and Cooperation James Silk Buckingham Victoria Robert Pemberton Queen Victoria Town King Camp Gillette Metropolis and Bradford Peck The World a Department Store Each chapter considers the work in conjunction with contemporary thought the political philosophy and the reconstruction of the city Although these ten cities represent over 500 years of utopian and political thought they are an interlinked thread that had been drawn from literature of the past and informed by contemporary thought and society The book is structured in two parts The Courtesan Queen Anna
