## Sun Storm Other Stories:

*Hidden Lies and Other Stories* Vivian Gilbert Zabel, 2005-06-01 Vivian Gilbert Zabel and Holly Jahangiri offer a collection of 21 original short stories spanning a variety of themes and genre many crime or mystery based **British Working Class women authors (born before 1962) a list** Stefan Szczelkun ,2025-06-07 A collection of Wikipedia articles edited reformatted and with additions In chronological order References and sections on non literary activity are sometimes omitted hopefully not to the point of misrepresenting the author which might include feminist or political activism To my surprise the biographical material on Wikipedia was sometimes mesmerising although it was uneven Where there were gaps I have tried to fill them from other sources Refer back to the wikipedia articles for more context and references in some cases and if you have a verified source of information please update the Wikipedia article Wikipedia is published under a creative commons licence So this compilation also carries a creative commons licence Introduction Looking through Sarah Richardson s *Writing on the Line* 1996 I was struck by how many of the working class women writers were from North America and how many more were poets Howard Slater had made a list of British working class male novelists and I selected British woman writers from *Writing on the Line* and found that most of them now have Wikipedia pages I first made a list of links Wanting to take this further I first looked to focus on novels and short story writers but this category started to break up as many writers wrote in many idioms producing fact fiction poetry plays screenwriting and journalism I decided on an arbitrary cut off point of writers born before 1962 When I first made the list I was thinking how few working class women novelists had been published in this period But then the lists of books by each author started to stack up and there s plenty to read and much that I missed even really hearing about Of course it focuses on the most successful others who produced a community published autobiography or self published novel did not get a Wikipedia page and they should really be included every life counts Others only published an autobiography perhaps in the last years of life but were extraordinary writers and people We could also discuss discuss the genre snobbery in literary circles that puts crime young peoples literature romantic and fantasy fiction and perhaps historical based narratives in a lower category than the novel *Dwight's House and Other Stories* Meredith Sue Willis, 2004 **The Baum Plan for Financial Independence and Other Stories** John Kessel, 2008 A literary collection of astonishing stories from an award winning science fiction writer and satirist **Ambiguity Machines and Other Stories** Vandana Singh, 2018-02-13 After the success of her collection *The Woman Who Thought She Was a Planet* Vandana Singh returns to the short story in *Ambiguity Machines* Her deep humanism interplays with her scientific background in stories that consider and celebrate this world and others with characters who try to make sense of the people they meet what they see and the challenges they face An eleventh century poet wakes to find he is an artificially intelligent companion on a starship A woman of no account has the ability to look into the past And in *Requiem* a major new novella a woman goes to Alaska to try and make sense of her aunt s disappearance Examining the revolutionary potential of

speculative fiction Singh dives deep into the vast strangeness of the universe without and within to explore the ways in which we move through space and time together yet always apart The Sun We Share Kristine Larsen,2024-11-21 As the dominant star in our sky the Sun has been alternately worshipped as a god and viewed as a threat over the course of human history Despite significant advances in astronomy the Sun continues to surprise us most notably in its production of so called space weather that impacts technology here on Earth This unique mixture of familiarity and mystery has made the Sun a main character in popular media over the past three centuries This book examines how popular media have adapted to our ever changing understanding of the inner workings of the Sun It provides a valuable way to observe the inherent problems of communicating science to a non technical audience Chapters cut through the widespread hype found on the Internet and instead explore our ever improving scientific exploration of the Sun the persistent misconceptions surrounding it the fate of the Sun and its relation to the fate of the Earth and why despite comments to the contrary by Oscar Wilde the average person should care about sunspots **The Calming Sounds of Storms.
