however it was the top secret headquarters of Britain's Government Code and Cypher School and the site where Germany's legendary Enigma code was finally cracked. There the nation's most brilliant mathematical minds including Alan Turing whose discoveries at Bletchley would fuel the birth of modern computing toiled alongside debutantes, factory workers and students on projects of international importance. Until now little has been revealed about ordinary life at this extraordinary facility. Drawing on remarkable first hand interviews, *The Secret Lives of Codebreakers* reveals the entertainments, pastimes and furtive romances that helped ease the incredible pressures faced by these covert operatives as they worked to turn the tide of World War II.

A Literary Smorgasbord Migel Jayasinghe, 2019. There was no question that this author looked up to the United Kingdom as his mother country where he emigrated to at the age of 26. Although Ceylon his actual birthplace gained independence from the British Empire when he was just 12 years old in 1948. At secondary school he regularly won the class prize for English and contributed stories and essays not only to the college magazine but also to the children's pages of local daily newspapers. Under the title *Rudderless Living* the author paints a succinct autobiographical picture of the main events of his nomadic life. *Overland* describes not only a trio's trip by car to Mumbai, India starting from Cambridge, UK but also refers to important background events in the author's life. Over the years he had been writing short stories merely as a hobby and the reader can expect a wide variety of real life events as well as futuristic fables in this collection. His poems were mostly written after he retired to Spain and reflect his daily life there. A few of his poems won recognition as Honorable Mentions at various competitions. *A Literary Smorgasbord* is the product of his literary heritage exhibiting an undoubted mastery of the English language. Although he did not succeed in attending the then one and only University of Ceylon he later gained academic qualifications from the University of London and worked as an occupational psychologist until retirement age. As assessed by British Mensa he has an IQ falling within the top 3% of the population. There is no question that this is reflected in the essays, stories and poems so uniquely presented in this volume. *A Literary Smorgasbord* A worthy read c. 280 words.

Plastic Surgery in Wars, Disasters and Civilian Life Anthony Roberts, 2023-04-20. The specialty of plastic surgery was developed and named by Sir Harold Gillies following his work between the two world wars reconstructing severely damaged servicemen from the First World War. Sir Harold went on to inspire and train other surgeons from around the world. Among them was his cousin Sir Archibald McIndoe who in the Second World War set up the unit at East Grinstead Hospital which looked after severely burned airmen and some other servicemen. The airmen themselves set up the famous Guinea Pig Club which gave enormous social and often financial support to the severely injured. After the Second World War specialized burn units were created throughout the UK including one at Stoke Mandeville Hospital where Anthony Roberts served. After the number of war injuries had reduced the burn unit for all three services was set up at RAF Halton a few miles from Stoke Mandeville. A close relationship between the hospitals developed which led to military surgeons being posted to Stoke Mandeville for training in the care of burns and an introduction to plastic surgery. Most doctors will never be involved

in a disaster during their working lives Anthony Roberts was involved in treating casualties from the Bradford City football stadium fire in 1985 that claimed 56 lives and resulted in hundreds more being injured many of them with severe burns It had a major effect on him and on all those involved It started his appearances on the media and his overseas visits to other countries to talk about it And subsequently he was asked to join and to lead other international efforts to provide help He led the first British team from Stoke Mandeville that gave aid in Sarajevo during the war He returned several times and has also given aid in three other war zones and six major disasters Because of this involvement in all these situations Professor Roberts taught junior trainee surgeons from the three British services and those of several foreign countries As well as his military involvement Anthony Roberts spent sixteen years working with the Royal Protection Group at State occasions and thirty years working as a motor racing track doctor including at Formula One level providing immediate and vital treatment to drivers who suffered serious injuries and burns following accidents on the track and to spectators There have been enormous changes in the specialty over the past fifty years and a detailed view of these is given in an absorbing account of this life enhancing surgery by one who served on the frontline in difficult and dangerous situations around the world

A Handbook for the Sustainable Use of Timber in Construction Jim Coulson,2020-12-21 There is a growing interest in the use of wood in new building not least because it has low embodied energy and it is an infinitely renewable resource Despite a great deal of innovation in the use of wood in construction in recent years the fundamentals of using this natural material have not really changed the different types of wood have different properties and differing responses to the environment in which they are used When used correctly wood is an excellent building material but when inappropriately specified or used it may cause problems Poor understanding of the properties of wood and the many species and grades that are commercially available can result in this versatile material performing below expectation and certainly less well than could have been achieved with greater understanding about how

best to use it How Wood Works is a combination of the author's two previous books into one comprehensive volume Revised and updated material to deal with the essentials of structural design and building in timber in a sustainable manner while reflecting on changes in Standards and other Regulations and expanding on certain technical areas such as more detailed wood science and wood structure
