Atlas of British Social and Economic History Since c.1700 Mr Rex Pope,Rex Pope,2002-03-11 All students of history use maps This atlas is designed specifically to enhance the understanding of British history since 1700 as well as emphasizing social as well as economic change The contributors are all subject specialists who have taught in higher education institutions and a large proportion of both maps and text is based on their own original research The combination of maps and text is intended to illustrate not only historical developments such as the spread of agriculture or the growth of an integrated transport system but also regional contrasts at points in time The end product offers support for those historians who question the usefulness of thinking in terms of national economic histories

The Decline of the British Motor Industry (Routledge Revivals) Peter Dunnett,2013-09-05 First published in 1980 this book considers the British motor industry over the period between 1945 and 1979 analysing the ways in which the industry suffered a considerable decline in the post war era when compared to motor industries of other countries or to most other British industries Rather than blaming labour and management as has frequently been the case the author argues that the decline can be traced back to poor government policy Tracing how when and where government policies affected the industry the book examines policies clearly directed at the motor industry such as transport legislation and motor taxation In addition the work considers the consequences of many policies which were targeted only indirectly at the motor industry as the author argues that whilst government policy may have succeeded in its aim e g improving employment for the balance of payments the motor industry may have suffered as a consequence Written in non technical language the reissue will be of interest to those concerned with post war UK economic development the UK motor industry in particular and the history of government policy in general

The British Motor Industry James Foreman-Peck,Sue Bowden,Alan McKinlay,1995 The story is taken back to the beginnings of the motor car Labour relations and management policy are analysed in detail as is the impact of government policy Particular attention is paid to national demand conditions and to demand shocks as formative influences Book jacket

Stephanie Jones, 2016-07-27 [The British Working Class 1832-1940](#) Andrew August, 2014-06-11 In this insightful new study Andrew August examines the British working class in the period when Britain became a mature industrial power working men and women dominated massive new urban populations and the extension of suffrage brought them into the political nation for the first time Framing his subject chronologically but treating it thematically August gives a vivid account of working class life between the mid nineteenth and mid twentieth centuries examining the issues and concerns central to working class identity Identifying shared patterns of experience in the lives of workers he avoids the limitations of both traditional historiography dominated by economic determinism and party politics and the revisionism which too readily dismisses the importance of class in British society [The British Communist Party and the Trade Unions, 1933-1945](#) Nina Fishman, 2021-02-27 This is a pathbreaking book essential reading for students of interwar political and social history Previous histories of the period have underestimated the crucial role which Communists played in trade union organisation from top to bottom Despite its relatively small size the Communist Party occupied a strategic place in the trade union movement the leaders of the movement notably Ernest Bevin refused to acknowledge this at the time Thanks to her extensive research and numerous interviews and to the opening of the books of the Communist Party Nina Fishman has been able to

uncover a fascinating story one which official Communist historians have never told and which other historians could only recount in fragments The main protagonists are the Communist Party General Secretary Harry Pollitt and the Editor of the Daily Worker Johnny Campbell The book brings to vivid life the work of activists on the shop floor and in the coalmines during the Depression and the Second World War The book includes the first comprehensive analysis of Communist activity in key sectors of the British economy notably in engineering shop stewards movements and among London busmen It concludes with an authoritative review of Communists part in the British war economy and a vigorous challenge to the conventional wisdom about the effect of Communist Party changes of line on the war on activists abilities to incite and lead strikes
