The Buffalo Harvest:

The Buffalo Harvest Frank H. Mayer, Charles B. Roth, 1958 **The Buffalo Harvest** Frank H. Mayer, 2003-01-01

The Buffalo Harvest, 1952 *Buffalo Harvest*, 1961 Indian Agents John L. Steckley, 2016-08-19 Canadians are beginning to learn about the negative effects of residential schools on Aboriginal people in Canada. More hidden in the written record but bearing a similar powerfully destructive role are Indian Agents who were, with very few exceptions, White men who ruled the reserves in Canada from the 1870s to the 1960s. This book is the first to present a discussion of Indian Agents in general. It provides an introductory look at the control Indian Agents exercised over Aboriginal communities throughout the period in question. The primary intent is to spark discussion in Indigenous studies courses. This book is built upon a discussion of the lives and impact of five Indian Agents: Hayter Reed, William Morris Graham, John McIver, William Halliday, and Fred Hall. However, the practices and views of 39 other Indian Agents are interwoven throughout the text. Although there was a readily detectable sameness in the way that Indian Agent power was imposed on Aboriginal communities based on the institutional racism of the Indian Agent System, one of the points to be made is that not all Indian Agents were the same. Some were more oppressive than others. Also frequently pointed out is the fact that Aboriginal peoples were not merely helpless victims to Indian Agent control but resisted that control, sometimes successfully. The book concludes with a chapter comparing the Indian Agent System in Canada with similar systems in the United States, Australia, and New Zealand. **Re-Bisoning the West** Kurt Repanshek, 2019-09-24 A much needed look at the exceptionally fraught relationship between bison and people, engaging and comprehensive. BOOKLIST A fascinating perspective. Re-Bisoning the West demonstrates the complex relationships the species maintains with the earth and humanity itself. FOREWORD

REVIEWS Award winning journalist Kurt Repanshek traces the history of bison from the species near extinction to present day efforts to bring bison back to the landscape and the biological, political, and cultural hurdles confronting these efforts. Repanshek explores Native Americans' relationships with bison and presents a forward thinking approach to returning bison to the West and improving the health of ecosystems. **Historic Tales from Park County** Laura Van Dusen, 2013-11-05

The geographic center of Colorado Park County has long served as a recreational area for Denver and Colorado Springs residents looking to get away. The scene has not always been so idyllic. Marshal Cook was shot while investigating a loud party in Como in 1894, and rumors spread by the Michigan Creek School Board sent Benjamin Ratcliff on a killing spree in 1895. But the county's hardscrabble heritage includes triumphs as well as tragedies. In 1873, county seat Fairplay lost every business on Front Street to a horrific fire. But by 1878, they had rebuilt it all. It still stands today, a true testament to the strength of this old mining town. Journalist Laura Van Dusen shares these stories, outlining the many trials and successes of Park County's earliest settlers. **Running Out** Lucas Bessire, 2022-10-04 Finalist for the National Book Award. An intimate reckoning with aquifer depletion in America's heartland. The Ogallala aquifer has nourished life on the American Great Plains.

for millennia But less than a century of unsustainable irrigation farming has taxed much of the aquifer beyond repair The imminent depletion of the Ogallala and other aquifers around the world is a defining planetary crisis of our times Running Out offers a uniquely personal account of aquifer depletion and the deeper layers through which it gains meaning and force Anthropologist Lucas Bessire journeyed back to western Kansas where five generations of his family lived as irrigation farmers and ranchers to try to make sense of this vital resource and its loss His search for water across the drying High Plains brings the reader face to face with the stark realities of industrial agriculture eroding democratic norms and surreal interpretations of a looming disaster Yet the destination is far from predictable as the book seeks to move beyond the words and genres through which destruction is often known Instead this journey into the morass of eradication offers a series of unexpected discoveries about what it means to inherit the troubled legacies of the past and how we can take responsibility for a more inclusive sustainable future An urgent and unsettling meditation on environmental change Running Out is a revelatory account of family complicity loss and what it means to find your way back home

Dugger, Howard J. Sherman, 2000 Howard Sherman and William M Dugger engage in a dialogue on social evolution from Institutional and Marxist perspectives each representing one side Together they explore the way society develops using the equally radical but very different approaches of Thorstein Veblen and Karl Marx Nourishment Fred Provenza, 2018 Reflections on feeding body and spirit in a world of change Animal scientists have long considered domestic livestock to be too dumb to know how to eat right but the lifetime research of animal behaviorist Fred Provenza and his colleagues has debunked this myth Their work shows that when given a choice of natural foods livestock have an astoundingly refined palate nibbling through the day on as many as fifty kinds of grasses forbs and shrubs to meet their nutritional needs with remarkable precision In *Nourishment* Provenza presents his thesis of the wisdom body a wisdom that links flavor feedback relationships at a cellular level with biochemically rich foods to meet the body's nutritional and medicinal needs Provenza explores the fascinating complexity of these relationships as he raises and answers thought provoking questions about what we can learn from animals about nutritional wisdom What kinds of memories form the basis for how herbivores and humans recognize foods Can a body develop nutritional and medicinal memories in utero and early in life Do humans still possess the wisdom to select nourishing diets Or has that ability been hijacked by nutritional authorities Consumers eager for a quick fix have empowered the multibillion dollar a year supplement industry but is taking supplements and enriching and fortifying foods helping us or is it hurting us On a broader scale Provenza explores the relationships among facets of complex poorly understood ever changing ecological social and economic systems in light of an unpredictable future To what degree do we lose contact with life sustaining energies when the foods we eat come from anywhere but where we live To what degree do we lose the mythological relationship that links us physically and spiritually with Mother Earth who nurtures our lives Provenza's paradigm changing exploration of these questions has implications that could vastly improve our health through a simple change in the way we view our relationships with the plants and animals we eat Our health could be improved by eating biochemically rich foods and by creating cultures that know how to combine foods into meals that nourish and satiate Provenza contends the voices of authority disconnect most people from a personal search to discover the inner wisdom that can nourish body and spirit That journey means embracing wonder and uncertainty and avoiding illusions of stability and
