The Burma Delta Economic Development And Social Change On An Asian Rice Frontier 1852 1941:

The Burma Delta Michael Adas,2005 *The Burma Delta* Michael Adas,2011-04-20 In the decades following its annexation to the Indian Empire in 1852 Lower Burma the Irrawaddy Sittang delta region was transformed from an underdeveloped and sparsely populated backwater of the Konbaung Empire into the world's largest exporter of rice This seminal and far reaching work focuses on two major aspects of that transformation the growth of the agrarian sector of the rice industry of Lower Burma and the history of the plural society that evolved largely in response to rapid economic expansion The Rice Economy of Asia Randolph Barker,Robert W. Herdt,Beth Rose,1985 The purpose of this book is to present a comprehensive picture of the role of rice in the food and agricultural sectors of Asian nations *Burma's Economy in the Twentieth Century* Ian Brown,2013-11-07 An incomparable introduction to Burma's political and economic history written by one of the premier economic historians of Southeast Asia **Resource Abundance and Economic Development** R. M. Auty,2001-06-28 Since the 1960s the per capita incomes of the resource poor countries have grown significantly faster than those of the resource abundant countries In fact in recent years economic growth has been inversely proportional to the share of natural resource rents in GDP so that the small mineral driven economies have performed least well and the oil driven economies worst of all Yet the mineral driven resource rich economies have high growth potential because the mineral exports boost their capacity to invest and to import Resource Abundance and Economic Development explains the disappointing performance of resource abundant countries by extending the growth accounting framework to include natural and social capital The resulting synthesis identifies two contrasting development trajectories the competitive industrialization of the resource poor countries and the staple trap of many resource abundant countries The resource poor countries are less prone to policy failure than the resource abundant countries because social pressures force the political state to align its interests with the majority poor and follow relatively prudent policies Resource abundant countries are more likely to engender political states in which vested interests vie to capture resource surpluses rents at the expense of policy coherence A longer dependence on primary product exports also delays industrialization heightens income inequality and retards skill accumulation Fears of Dutch disease encourage efforts to force industrialization through trade policy to protect infant industry The resulting slow maturing manufacturing sector demands transfers from the primary sector that outstrip the natural resource rents and sap the competitiveness of the economy The chapters in this collection draw upon historical analysis and models to show that a growth collapse is not the inevitable outcome of resource abundance and that policy counts Malaysia a rare example of successful resource abundant development is contrasted with Ghana Bolivia Saudi Arabia Mexico and Argentina which all experienced a growth collapse The book also explores policies for reviving collapsed economies with reference to Costa Rica South Africa Russia and Central Asia It demonstrates the importance of initial conditions to successful economic reform *Africa, Asia, and South America Since 1800* A.
