

### Broca's Area

In 1861 Paul Broca discovered a small region at the brain's surface that is responsible for producing speech.

### Occipital Cortex

Visual information about form and motion gets processed in this area at the back of the brain.

### Fusiform Gyrus

Parts of this structure play a critical role in recognizing faces, among other visual tasks. Damage to it causes face blindness.

### Cerebellum

This mini brainlike structure enables precise motor control. Lesions in part of the cerebellum do not appear to lead to a loss of conscious experiences.

### Brain Stem

Neurons in the brain stem control the level of arousal or wakefulness. If these do not properly function, the patient lapses into stupor or a coma or may die.

## **The Brain In Bits And Pieces:**

*Bits and Pieces* Kenneth B. McAlpine, 2019 *Bits and Pieces* tells the story of chiptune a style of lo fi electronic music that emerged from the first generation of video game consoles and home computers in the late 1970s and early 1980s Through ingenuity and invention musicians and programmers developed code that enabled the limited hardware of those early 8 bit machines to perform musical feats that they were never designed to achieve In time that combination of hardware and creative code came to define a unique 8 bit sound that imprinted itself on a generation of gamers For a new generation of musicians this music has currency through the chipscene a vibrant musical subculture that repurposes obsolete gaming hardware It s performative raw and edgy loaded with authenticity and driven by a strong DIY ethic It s more punk than Pac Man and yet it s part of that same story of ingenuity and invention 8 bit hardware is no longer a retired gaming console but a quirky and characterful musical instrument Taking these consoles to the stage musicians fuse 8 bit sounds with other musical styles drum n bass jungle techno and house to create a unique contemporary sound Analyzing musical structures and technological methods used with chiptune *Bits and Pieces* traces the simple beeps of the earliest arcade games through the murky shadows of the digital underground to global festivals and movie soundtracks

**Language Power** Byron Renz,2013-03-08 The focus of Language Power Dynamic Progression from Word to Message is on words and how they convey meaning and feeling The microscopic focus on the word itself evolves into the logical organization of words into meaningful sentences paragraphs and document sections The focus is on the somewhat divergent nonfiction elements of information and persuasion From an examination of the principles of information and persuasion the book evolves into an examination of specific applications of the informative and persuasive principles in business letter writing the rsum the cover letter the business plan and the grant proposal Language Power gets the serious student of writing away from the glib advice about writing dos and donts or templates that can simply be copied This is a book about the process of thinking that goes into effective informative and persuasive writing The book teaches the writing process Although the discussion of process is illustrated with examples the examples serve not as templates but to help teach the process The books rationale is that solid academics will ultimately outperform the mundane After examining how words convey meaning words are next examined as collective structures to convey information or persuasion Finally language structures are analyzed in specific forms of business writing

**Cosmic Purpose and Human Consciousness** Richard A. Mould,2015-11-10 Scientists have constructed a vast and wonderful objective universe by building on the quantitative features of their experience That universe cannot support cosmic purpose because it is without consciousness it is completely inert However the qualitative features of human experience suggest the existence of an equally vast and wonderful subjective universe that complements

the objective universe in scope and in reality This edifice can and I believe does support a form of cosmic purpose that is determined by its structure and by its relationship to human consciousness Every experience of yours is an amalgam of quantitative and qualitative parts that comprise your own objective and subjective worlds Each one is as real a part of your life as the other and each is as real a part of the wider universe as the other There is no reason to assign reality to one and illusory to the other Using a minimal construction based on qualitative experience the subjective universe is found to have a cosmic purpose that is consequential for humans We look for and find evidence of that purpose in human history
