## **The Building Business:**

**Starting and Managing a Small Building Business** John R. Immer, 1962      **Building Business-Government Relations** Anna Ya Ni, Montgomery Van Wart, 2015-08-20 This book introduces business government relations in the institutional context of the United States from a practitioner's perspective. It provides the historical descriptive and comparative accounts of the public and private sectors, the different roles government plays with business including several conceptual models to understand the social interactions between the two sectors and various economic policies associated with business. Business government relations are framed into three different social economic contexts. The sociopolitical arena in which government's role as agent of business interest groups and government's limited role as social architect are introduced. The local economic development in which government acts as a promoter of partner with and buyer from business. The global market where government mainly plays a role as promoter of domestic business. In the course of discussion, a set of skills such as searching government jobs, starting a business, analyzing stakeholders, ethical reasoning, advancing a business agenda, leveraging public resources, contracting with government, interpreting global trends, doing business abroad, and leveraging international resources are introduced and exercised.      *Building Business in Post-Communist Russia, Eastern Europe, and Eurasia* Dinissa Duvanova, 2013-02-18 Prior to 1989, the communist countries of Eastern Europe and the USSR lacked genuine employer and industry associations. After the collapse of communism, industry associations mushroomed throughout the region. Duvanova argues that abusive regulatory regimes discourage the formation of business associations and poor regulatory enforcement tends to encourage associational membership growth. Academic research often treats special interest groups as vehicles of protectionism and non-productive collusion. This book challenges this perspective with evidence of market-friendly activities by industry associations and their benign influence on patterns of public governance. Careful analysis of cross-national quantitative data spanning more than 25 countries and qualitative examination of business associations in Russia, Ukraine, Kazakhstan, and Croatia shows that postcommunist business associations function as substitutes for state and private mechanisms of economic governance. These arguments and empirical findings put the long-standing issues of economic regulations, public goods, and collective action in a new theoretical perspective.      **Bulletin**, 1930      **Buying and Selling a Business** Robert F. Klueger, 2004-09-02 A twenty-first century update to the modern business classic.
