Hybrid Fictions Daniel Grassian, 2015-09-11 Since the 1960s academics have theorized that literature is on its way to becoming obsolete or at the very least has lost part of its power as an influential medium of social and cultural critique This work argues against that misconception and maintains that contemporary American literature is not only alive and well but has grown in significant ways that reflect changes in American culture during the last twenty years In addition this work argues that beginning in the 1980s a new allied generation of American writers born from the late 1950s to the early 1970s has emerged whose hybrid fiction blend distinct elements of previous American literary movements and contain divided social cultural and ethnic allegiances The author explores psychological philosophical ethnic and technological hybridity The author also argues for the importance of and need for literature in contemporary America and considers its future possibilities in the realms of the Internet and hypertext David Foster Wallace Neal Stephenson Douglas Coupland Sherman Alexie William Vollmann Michele Serros and Dave Eggers are among the writers whose hybrid fictions are discussed

The Control of Biblical Meaning George Aichele, 2001-02-01 This provocative book pursues a series of questions associated with canons of the Bible Aichele draws deeply on the insights of poststructuralist literary theory as he pursues these questions He also engages in close readings of specific biblical and nonbiblical texts to demonstrate ways that canon controls the meanings of its texts

Reading Matters Joseph Tabbi, Michael Wutz, 2018-05-31 The convergence of twentieth century narrative and technology is one of the most important developments in current literary study A decade after the founding of the Society for Literature and Science and the appearance of such influential books as Kathleen Woodward s Culture of Information and William Paulson s The Noise of Culture Joseph Tabbi and Michael Wutz have edited a landmark volume to summarize this still emerging field Twelve original essays and the editors introductory overview show how these theoretical concerns can contribute to the practical study of narrative Reading Matters covers the range of contemporary literature from the canonical novels of high modernism and postmodernism through subjects new to the academic agenda such as cyberpunk and hypertext fiction In an age that has proclaimed the death of the novel many times over the contributors argue persuasively for the continued vitality of literary narrative By responding in ingenious ways to the capabilities of other media they assert the novel has enlarged and redefined its territory of representation and its range of techniques and play while maintaining its viability in the new media

assemblage **Infectious Rhythm** Barbara Browning, 2013-06-17 Barbara Browning follows the trail of infectious rhythm from the ecstatic percussion of a Brazilian carnival group to the eerily silent video image of the LAPD beating a man like a drum Throughout she identifies the metaphoric strain of contagion which both celebrates the diasporic spread of African culture and serves as the justification for its brutal repression The essays in this book examine both the vital and violent ways in which recent associations have been made between the AIDS pandemic and African diasporic cultural practices including religious worship music dance sculpture painting orature literature and film While pointing to the lengthy and complex history of the metaphor of African contagion Browning argues that in its politicized life affirming embodiment the figure might actually teach us to respond to epidemic humanely **Constructing Objectivity: Emotions in Legal**

Cyberculture, Cyborgs and Science Fiction William S. Haney, 2006 Addressing a key issue related to human nature this book argues that the first person experience of pure consciousness may soon be under threat from posthuman biotechnology In exploiting the mind s capacity for instrumental behavior posthumanists seek to extend human experience by physically projecting the mind outward through the continuity of thought and the material world as through telepresence and other forms of prosthetic enhancements Posthumanism envisions a biology machine symbiosis that will promote this extension arguably at the expense of the natural tendency of the mind to move toward pure consciousness As each chapter of this book contends by forcibly overextending and thus jeopardizing the neurophysiology of consciousness the posthuman condition could in the long term undermine human nature defined as the effortless capacity for transcending the mind s conceptual content Presented here for the first time the essential argument of this book is more than a warning it gives a direction far better to practice patience and develop pure consciousness and evolve into a higher human being than to fall prey to the Faustian temptations of biotechnological power As argued throughout the book each person must choose for him or herself between the technological extension of physical experience through mind body and world on the one hand and the natural powers of human consciousness on the other as a means to realize their ultimate vision **The Cambridge History**
