It also explores methodological considerations when conducting disability sport research including social, cultural and political reflections of the research process from disabled and non-disabled academics. This much-needed resource supports disability sport scholars in developing a conceptual grounding in the subject and establishes a space for intersectional accounts of sport and physical activity which challenge homogenous understandings of disability. This book is essential reading for any student or researcher working in disability sport, adapted physical activity or adapted physical education and a valuable reference for anybody with an interest in the sociology of sport, disability studies, cultural studies, the body or research methodology.

[Unleash Different](#) Rich Donovan, 2018-09-04 If you discovered a new market comprising 53% of the world's population would you act to invest in it? There are 1.3 billion people around the world who identify as having a disability. When you include friends and family, the disability market touches 53% of all consumers. It is the world's largest emerging market. *Unleash Different* illustrates how companies like Google, PepsiCo and Nordstrom are attracting people with disabilities as customers and as employees. Replacing 'nice to do' with return on investment allows market forces to take over and the world's leading brands to do what they do best: serve a market segment. In this case, the disability market. Business managers will come to understand how taking a charity-oriented approach to people with disabilities has failed; what action is required to capitalize on the world's biggest emerging market; and how their organizations can grow revenue and cut costs by attracting people with disabilities as customers and talent. Rich gives the reader a peek into how he rose from a Canadian school for crippled children to manage 6 billion for one of Wall Street's leading firms. He makes it easy to relate to the business goal of serving disability because he has actually done it. *Sports* Tim Delaney, Tim Madigan, 2009-05-16 Why do billions of people around the world love sports? The popular media is increasingly dedicated to the heated rivalries of sports teams; academic institutions are held in its thrall; sports metaphors are commonplace in our language; and most individuals participate in athletics or follow a team sport in some variation. This entertaining and informative book attempts to find out why by examining sports in all its facets. The authors provide an overview of the history of sports with a constant focus upon the social conditions through which sport arises and by which it continues to thrive.

Theology and Down Syndrome Amos Yong, 2007 While the struggle for disability rights has transformed secular ethics and public policy, traditional Christian teaching has been slow to account for disability in its theological imagination. Amos Yong crafts both a theology of disability and a theology informed by disability. The result is a Christian theology that not only connects with our present social, medical and scientific understanding of disability but also one that empowers a set of best practices appropriate to our late modern context.
