British Romanticism and the Critique of Political Reason Timothy Michael, 2016 Romantic writers responded to the challenges of reform and revolution by rethinking the scope of political reason What role should reason play in the creation of a free and just society Can we claim to know anything in a field as complex as politics And how can the cause of political rationalism be advanced when it is seen as having blood on its hands These are the questions that occupied a group of British poets philosophers and polemicists in the years following the French Revolution Timothy Michael argues that much literature of the period is a trial or a critique of reason in its political capacities and a test of the kinds of knowledge available to it For Wordsworth Coleridge Shelley Burke Wollstonecraft and Godwin the historical sequence of revolution counter revolution and terror in France and radicalism and repression in Britain occasioned a dramatic reassessment of how best to advance the project of enlightenment The political thought of these figures must be understood Michael contends in the context of their philosophical thought Major poems of the period including *The Prelude* *The Excursion* and *Prometheus Unbound* are in this reading an adjudication of competing political and epistemological claims This book bridges for the first time two traditional pillars of Romantic studies the period's politics and its theories of the mind and knowledge Combining literary and intellectual history it provides an account of British Romanticism in which high rhetoric political prose poetry and poetics converge in a discourse of enlightenment and emancipation Social Change Christopher Chase-Dunn, Bruce Lerro, 2016-01-08 From the Stone Age to the Internet Age this book tells the story of human sociocultural evolution It describes the conditions under which hunter gatherers horticulturalists agricultural states and industrial capitalist societies formed flourished and declined Drawing evidence from archaeology ethnography linguistics historical documents statistics and survey research the authors trace the growth of human societies and their complexity and they probe the conflicts in hierarchies both within and among societies They also explain the macro micro links that connect cultural evolution and history with the development of the individual self thinking processes and perceptions Key features of the text Designed for
