behavior **The Oxford Handbook of Justice in the Workplace** Russell Cropanzano, Maureen L. Ambrose, 2015-06-18
 Justice is everyone's concern. It plays a critical role in organizational success and promotes the quality of employees' working lives. For these reasons, understanding the nature of justice has become a prominent goal among scholars of organizational behavior. As research in organizational justice has proliferated, a need has emerged for scholars to integrate literature across disciplines. Offering the most thorough discussion of organizational justice currently available, *The Oxford Handbook of Justice in the Workplace* provides a comprehensive review of empirical and conceptual research addressing this vital topic. Reflecting this dynamic and expanding area of research, chapters provide cutting-edge reviews of selection, performance management, conflict resolution, diversity management, organizational climate, and other topics integral for promoting organizational success. Additionally, the book explores major conceptual issues such as interpersonal interaction, emotion, the structure of justice, the motivation for fairness, and cross-cultural considerations in fairness perceptions. The reader will find thorough discussions of legal issues, philosophical concerns, and human decision making, all of which make this the standard reference book for both established scholars and emerging researchers. **Self-related Cognitions in Anxiety and Motivation** R. Schwarzer, 2013-08-21
 Research on anxiety and motivation has witnessed substantial progress in recent years in developing innovative perspectives and applying advanced psychometric tools. The most important contributions were made by cognitively oriented psychologists who have related the information processing view to anxiety and motivation. The organized knowledge about oneself and the storage, processing, and retrieval of information concerned with one's attitude and behavior strongly influences the way people think, feel, and act. Therefore, self-referent thoughts play a major role as a cognitive component in anxiety and motivation. It is the idea of this book to integrate different lines of thinking in the field of anxiety and motivation by relating both topics to self-focused attention, self-concept, and self-evaluation in achievement contexts as well as in social contexts. **The Psychology of Justice and Legitimacy** D. Ramona Bobocel, Aaron C. Kay, Mark P. Zanna, James M. Olson, 2011-02-25
 In response to the international turmoil, violence, and increasing ideological polarization, social psychological interest in the topics of legitimacy and social justice has blossomed considerably. This integrative volume illustrates the diversity and richness of research in the field, explaining how and why people make sense of injustice at all levels of analysis. **Conflict and Complexity** Philip Vos Fellman, Yaneer Bar-Yam, Ali A. Minai, 2014-12-09
 This book follows the methodologies of complex adaptive systems research in their application to addressing the problems of terrorism, specifically terrorist networks, their structure, and various methods of mapping and interdicting them, as well as exploring the complex landscape of network-centric and irregular warfare. A variety of new models and approaches are presented here, including Dynamic Network Analysis, DIME, PMESII models, percolation models, and emergent models of insurgency. In addition, the analysis is informed by practical experience with analytical and policy guidance from authors who have served within the U.S. Department of Defense, the British Ministry of Defence, as well as those who have served in a

civilian capacity as advisors on terrorism and counter terrorism

Values, Achievement, and Justice Norman T. Feather, 2005-12-02 When we say that a person deserves a positive or negative outcome we are making a judgment that is influenced by a number of variables We would certainly take into account whether the person was responsible for the outcome or whether the outcome could be attributed to other sources We would also consider whether the actions that led to the positive or negative outcome were actions that we would value or

tion that would meet with our disapproval We might also be influenced by the person's own positive or negative characteristics by our knowledge of what kinds of groups or social categories the person belonged to and by whether we like or dislike the person Information about these different variables has to be considered and integrated in some way and our judgment of deservingness follows that psychological process a process that involves the cognitive affective system Values Achievements and Justice is about deservingness and about the variables that affect the judgments we make I use the term deservingness although I could equally have referred to deservedness or desert The terms are all virtually equivalent in meaning although dictionaries may separate them by using fine distinctions I assume that the sorts of variables I have just described will affect our judgments of deservingness and I further assume that a judgment of deservingness is most likely to occur when these variables fit together in a consistent harmonious and balanced way
