Social Conflict And Educational Change In England And France 1789 1848:

Social Conflict and Educational Change in England and France 1789-1848 Michalina Vaughan, Margaret Scotford Archer, 2010-06-24 This book analyses the processes of educational change in England and France by relating political social economic and ideological trends to the changing pattern of educational institutions from the time of the Industrial and French revolutions The authors first assess the relevance of major sociological theories for the interpretation of the main trends in education in both countries in the first half of the nineteenth century They then put forward an alternative approach derived from Weber which links educational change with social conflict This theory of domination and assertion of groups competing for control over formal instruction before the emergence of the state system is applied to England and France in this period The main part of the book is devoted to a more detailed analysis of the competing groups in both countries and of their ideologies which served as blueprints for educational reform

Social Conflict and Educational Change in England and France 1789-1848. By Michalina Vaughan and Margaret Scotford Archer Michalina Vaughan, Margaret Scotford Archer, 1971

Social Origins of Educational Systems Margaret Scotford Archer, 2013 First published in 1979 this now classic text presents a major study of the development of educational systems focusing in detail on those of England Denmark France and Russia chosen because of their present educational differences and the historical diversity of their cultures and social structures Professor Archer goes on to provide a theoretical framework which accounts for the major characteristics of national education and the principal changes that such systems have undergone Now with a new introduction *Social Origins of Educational Systems* is vital reading for all those interested in the sociology of education Previously published reviews A large scale masterly study this book is the most important contribution to the sociology of education since the second world war as well as being a substantial contribution to the consolidation of sociology itself The Economist I cannot improve on her own statement of what she is trying to do The sociological contribution consists in providing a theoretical account of macroscopic patterns of change in terms of the structural and cultural factors which produce and sustain them Unquestionably this book is an impressive work of scholarship well planned conceptually and uniting its theoretical base with a set of four thoroughly and interestingly researched case studies of the history of the educational systems of Denmark England France and Russia British Journal of the Sociology of Education This magnificent treatise seriously explores many of the most recalcitrant questions about institutional systems Journal of Curriculum Studies A gargantuan and impressive socio historical enterprise Encounter a major achievement New Society

Schools, Teachers and Teaching (RLE Edu N) Len Barton, Stephen Walker, 2012-04-27 This volume considers how various sociological approaches to the exploration of the conditions of teachers might be co ordinated so as to produce a more penetrating and reliable understanding of the main dimensions of teachers work Three dimensions are selected for special attention historical institutional and interactional contexts in which teachers operate In different way the papers in this collection explore the

contribution such an investigation of these contexts can make to our understanding of wider educational concerns

Communicating Physics Josep Simon, 2016-09-12 The textbooks written by Adolphe Ganot 1804 1887 played a major role in shaping the way physics was taught in the nineteenth century Ganot's books were translated from their original French into more than ten languages including English allowing their adoption as standard works in Britain and spreading their influence as far as North America Australia India and Japan Simon's Franco British case study looks at the role of Ganot's two textbooks *Traite elementaire de physique experimentale et appliquee* 1851 and *Cours de physique purement experimentale* 1859 and their translations into English by Edmund Atkinson The study is novel for its international comparison of nineteenth century physics its acknowledgement of the role of book production on the impact of the titles and for its emphasis on the role of communication in the making of science The People's Science Noel W.

Thompson, 2002-05-02 The work details the emergence in the post Napoleonic War period of a growing popular interest in the critical potentialities of political economy It considers why this occurred and discusses how the conceptual and analytical tools of political economy were utilised to formulate a critique of early industrial capitalism The book examines the theories of labour exploitation and capitalist crisis which represented the essence of that critique both as they were elaborated by early nineteenth century British anti capitalist and socialist writers and as they were popularised by writers in the working class press of the period 1816 34 The book argues that by 1834 in consequence of the efforts of writers such as Hodgskin Thompson Gray Owen and their popularisers the foundations of a distinctively anti capitalist and socialist political economy had been established and widely disseminated But these foundations were theoretically flawed They were flawed by an overconcentration on the sphere of exchange which derived from a particular conception of the determination of exchange value under capitalism an overconcentration which led on to the suggestion of remedies for the problem of working class poverty and distress which were necessarily doomed to failure World Yearbook of Education 2005 David Coulby, Evie

Zambeta, 2005-01-14 This volume deals with two major and apparently opposing forces within education and society globalization and nationalism Globalization is often considered in economic terms of continued growth of international trade and a concentration of wealth in corporate hands yet it also encompasses technological political and cultural change The *World Yearbook of Education 2005* explores the role of the education sector in our globalized knowledge economy and considers the political implications of this in terms of monopolarity and the cultural consequences of homogenization and Americanization The other strand of this study nationalism remains a persistent force within education and society in all parts of the world and this volume examines the extent to which it can fuel conflict at all levels through prejudice and intolerance Concentrating on the epistemological consequences of nationalism leading international thinkers examine the extent to which it is reflected in the curricula of schools and universities around the world Finally the complex relationship between globalization and nationalism is explored and contributors explore the part that educational institutions and

practices play in forming both agendas A wide range of perspectives are employed including post colonial discourse classical economics and sociological theory Nationalism and globalization are both ongoing processes and this volume makes a case for the central role of education in both through its potential to influence change and to act as benevolent force in shaping a global community

Empires of Knowledge in International Relations Anna Wojciuk, 2018-03-20 This volume offers the first systematic account of how education and science have become sources of power for the states in international relations and what factors have effected this development Drawing together extensive empirical data on the USA the EU Japan Korea Singapore and China Wojciuk explores the factors and mechanisms through which education and science translate into the international position of different states highlighting how they continue to contribute to the reproduction of the centre periphery system in global politics Written in an accessible style the author argues that these factors increase the likelihood of success for states in international relations even if in themselves they cannot guarantee it Specifying the ways in which education and science contribute to the power of a state in international relations Wojciuk focuses on mechanisms involved in state building processes and economic development and invokes cases of successful competitive strategies involving education and science This work will be of interest to scholars in a wide range of subjects including education research international relations and international political economy

The Child and the State in India Myron Weiner, 1991 India has the largest number of non schoolgoing working children in the world Why has the government not removed them from the labor force and required that they attend school as have the governments of all developed and many developing countries To answer this question this major comparative study first looks at why and when other states have intervened to protect children against parents and employers By examining Europe of the nineteenth century the United States Japan and a number of developing countries Myron Weiner rejects the argument that children were removed from the labor force only when the incomes of the poor rose and employers needed a more skilled labor force Turning to India the author shows that its policies arise from fundamental beliefs embedded in the culture rather than from economic conditions Identifying the specific values that elsewhere led educators social activists religious leaders trade unionists military officers and government bureaucrats to make education compulsory and to end child labor he explains why similar groups in India do not play the same role

Educational Theory and Its Foundation Disciplines Paul Heywood Hirst, 2011-12-08 At the time this book was first published the disciplines of philosophy of education educational psychology sociology of education and the history of education had developed rapidly The papers in this volume outline the developments that took place The first paper analyses the nature of a theory concerned with determining practice and the place of academic disciplines within that What emerges is the crucial role of these disciplines but also the need to develop much more adequately a domain of practical principles assessed and critically reformulated in the light of those disciplines The following papers are concerned with the contributions four of those disciplines are now making

Green, 2013-10-23 Education has always been a key instrument of nation building in new states National education systems have typically been used to assimilate immigrants to promote established religious doctrines to spread the standard form of national languages and to forge national identities and national cultures They helped construct the very subjectivities of citizenship justifying the ways of the state to the people and the duties of the people to the state In this second edition of his seminal and widely acclaimed book on the origins of public education in England France Prussia and the USA Andy Green shows how education has also been used as a tool of successful state formation in the developmental states of East Asia While human capital theories have focused on how schools and colleges supply the skills for economic growth Green shows how the forming of citizens and national identities through education has often provided the necessary condition for both economic and social development

The University in Society, Volume I Lawrence Stone, 2019-01-29 The essays in this book seek to establish a true sociology of education Their primary concern is the relationship between formal education and other social forces through the ages Thus the book combines the history of higher education with social history in order to understand the process of historical change To ascertain the responses of the universities to such broad social changes as the Renaissance the Reformation and the Industrial Revolution the authors ask such questions as who were the students and how many were there how did they get to the university and why did they come how did they spend their time and what did they learn what jobs did they fill and how did what they learned help them in later life how have faculty members viewed their roles over the years Lawrence Stone is Dodge Professor of History at Princeton University Chairman of the History Department and Director of the Shelby Cullom Davis Center for Historical Studies Originally published in 1974 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton

University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
