*The Critical Theory of Axel Honneth* Danielle Petherbridge,2013-09-05 The Critical Theory of Axel Honneth provides a comprehensive study of the work of Axel Honneth tracing the theoretical trajectory from his earliest writings on philosophical anthropology to the development of a theory of recognition The book argues that Honneth s early work provides important insights for the reconstruction of the normative project of critical theory and the articulation of a conceptual framework for analyzing social relations of power and domination Danielle Petherbridge contends however that these aims are not fully realized in Honneth s more mature project and that central insights recede as his project develops Petherbridge seeks to demonstrate that the basis for an alternative theory of intersubjectivity that can account for both an adequate theory of power and normative forms of subject formation can be immanently reconstructed from within Honneth s own work By contextualizing Honneth s project in relation to its theoretical influences The Critical Theory of Axel Honneth provides a critical study and excellent entry point that will be essential reading for both students and scholars who work in the areas of European philosophy critical theory social and political philosophy or social and political theory

[A Case for Teaching Literature in the Secondary School](#) Janet Alsup,2015-04-17 Taking a close look at the forces that affect English education in schools at the ways literature cognitive science the privileging of the STEM disciplines and current educational policies are connected this timely book counters with a strong argument for the importance of continuing to teach literature in middle and secondary classrooms The case is made through critical examination of the ongoing culture wars between the humanities and the sciences recent research in cognitive literary studies demonstrating the power of narrative reading and an analysis of educational trends that have marginalized literature teaching in the U S including standards based and scripted curricula The book is distinctive in presenting both a synthesis of arguments for literary study in the middle and high school and sample lesson plans from practicing teachers exemplifying how literature can positively influence adolescents intellectual emotional and social selves

**The Real Mound Builders of North America** A. Martin Byers,2018-02-02 The Real Mound Builders of North America takes the standard position that the cultural communities of the Late Woodland period hiatus when little or no transregional monumental mound building and ceremonialism existed were the

linear cultural and social ancestors of the communities responsible for the monumental earthworks of the unique Mississippian ceremonial assemblage and further these Late Woodland communities were the direct linear cultural and social descendants of those communities responsible for the great Hopewellian earthwork mounds and embankments and its associated unique ceremonial assemblage Byers argues that these communities persisted largely unchanged in terms of their essential social structures and cultural traditions while varying only in terms of their ceremonial practices and their associated sodality organizations that manifested these deep structures This continuist historical trajectory view stands in contrast to the current dominant evolutionary view that emphasizes abrupt social and cultural discontinuities with the Hopewellian ceremonial assemblage and earthworks mounds and embankments *Max Weber & Democratic Politics* Peter Breiner,1996 Breiner demonstrates the tension between the subjective and objective dimensions of Weber s logic of rationality and describes how Weber exploits this tension in judging the feasibility of social and political forms such as socialism radical democracy capitalism and the nation *Economic Growth and Development in Africa* Horman Chitonge,2015-01-09 In recent years Africa has undergone the longest period of sustained economic growth in the continent s history drawing the attention of the international media and academics alike This book analyses the Africa Rising narrative from multidisciplinary perspectives offering a critical assessment of the explanations given for the poor economic growth and development performance in Africa prior to the millennium and the dramatic shift towards the new Africa Bringing in perspectives from African intellectuals and scholars many of whom have previously been overlooked in this debate the book examines the construction of Africa s economic growth and development portraits over the years It looks at two institutions that play a vital role in African development providing a detailed explanation of how the World Bank and the IMF have interpreted and dealt with the African challenges and experiences The insightful analysis reveals that if Africa is rising only 20 30 per cent of Africans are aboard the rising ship and the main challenge facing the continent today is to bring on board the majority of Africans who have been excluded from growth This book makes the complex and sometimes confusing debates on Africa s economic growth experience more accessible to a wide range of readers interested in the Africa story It is essential reading for students and researchers in African Studies and will be of great interest to scholars in Development Studies Political Economy and Development Economics **Rural Development Theory and Practice** Malcolm J.
