Social And Economic Impacts Of Coronary Artery Disease:

Social and Economic Impacts of Coronary Artery Disease Edgar D. Charles, Jennie J. Kronenfeld, 1980 **Coronary Heart Disease Epidemiology** Michael Marmot, M. G. Marmot, Paul Elliott, 2005 Coronary heart disease is the leading cause of death worldwide affecting millions of people in both developed and developing countries The dual aims of this book are to review the well established and emerging risk factors in coronary heart disease and to apply this knowledge to public health approaches to disease prevention The book includes authoritative accounts of studies within a single population and international studies important areas of methodological development trials to test preventive strategies and the application of epidemiological and other knowledge to the development of public health policy for the prevention of widespread disease It is an all encompassing work containing contributions from the world authorities in the field The book is divided into four sections The introduction reviews advances in the understanding of and the current status of risk factors for CHD Section 2 looks at recent global trends and emerging patterns of CHD morbidity and mortality in several countries and includes chapters on work done under the auspices of WHO on the global burden of disease in relation to smoking and blood pressure Section 3 focuses on advances in understanding the aetiology of CHD with each chapter focused on a particular risk factor Section 4 explores measures of prevention and intervention in terms of public health policy with specific examples from around the world Cardiac therapy Michael R. Rosen, Brian F. Hoffman, 2012-12-06 Cardiac therapy has become ever more complex during the past quarter century For example 25 years ago the therapy of cardiac failure was largely limited to digitalis a very few diuretics salt restriction and general supportive measures Antiarrhythmic therapy involved in the main quinidine procainamide and digitalis and questions such as which arrhythmia to treat and how to measure drug efficacy had been addressed in elementary fashion only Cardiac surgery was limited largely to congenital and valvular heart disease the areas of cardiac pacemaker therapy defibrillation and other forms of electrical diagnosis and therapy were rudimentary The expansion of support of cardiovascular research by the National Institutes of Health as well as by institutional sources following World War II has led to major successes in clinical health care delivery and improved technology made available to clinical investigators In reviewing progress over the past 25 years we have been particularly impressed by one observation this is the important interaction that has developed between studies of pathophysiology and the delivery of appropriate cardiac therapy Coronary Artery Disease Gregory W. Barsness, David R. Holmes, 2011-12-06 Coronary Artery Disease is directed towards individuals with an interest in the clinical treatment of patients with unrevascularizable angina It explores a variety of treatment options in the setting of a sound scientific background and provide guidance and predictions for future direction in this rapidly developing field It fulfills an unmet need and is greeted with significant enthusiasm by the practicing internal medicine family practice and cardiovascular clinicians It also provides a reliable reference for clinical and basic researchers interested in this topic as well as affected patients and their families **Cardiological Society of India:**

Area of residence and risk of cardiovascular disease and mortality among adults with type 1 diabetes mellitus in Stockholm County Ratib Mawa, 2018-01-16 Master's Thesis from the year 2016 in the subject Health Public Health grade B course Department of public health sciences Epidemiology language English abstract Cardiovascular disease CVD remains a major public health problem in Sweden Area of residence has been suggested to increase the risk of CVD and CVD specific mortality in the general population but less investigated in adults with type 1 diabetes mellitus The aim is to deepen knowledge on health inequalities at area level by assessing whether the risk of incident CVD and CVD specific mortality among adults with type 1 diabetes mellitus living in disadvantaged areas differed from those in other areas of Stockholm County Therefore a cohort study in which 7544 adults

with type 1 diabetes mellitus aged 40-80 years living in disadvantaged and other areas of Stockholm County in 2006 were followed from 2006-2011. Crude and adjusted hazard ratios for incident CVD and CVD specific mortality were calculated using Cox proportional hazard regression. All models were adjusted for age, gender, education, country of birth, social allowance, disability allowance and disposable income. Results: Adjusted hazard ratios for CVD, stroke, peripheral vascular disease, myocardial infarction and CVD specific mortality were 1.2 [95% CI 0.5-2.0], 1.2 [95% CI 0.6-3.1], 1.0 [95% CI 0.5-2.9], 1.9 [95% CI 1.0-3.6] and 1.3 [95% CI 0.5-4.5] respectively for subjects in disadvantaged areas compared to other areas of Stockholm County. **Research Awards Index**, 1989.
