Paradigm Shift in International Economic Law Rule-Making Julien Chaisse, Henry Gao, Chang-fa Lo, 2017-11-13 The TPP was negotiated among 12 economically diverse countries including some most highly developed and rich countries i e the United States Japan Australia Canada New Zealand and Singapore some newly industrialized countries i e Mexico and Malaysia and some less developed countries i e Peru Chile and Vietnam A new paradigm created in this context is that countries with vastly different economic developments can actually agree on a set of very high standards to regulate their economic activities to liberalize their trade and to protect intellectual property and foreign investment The contents of the TPP also reflect its status of being a new paradigm as the 21st Century Trade Agreement and being a pioneer in rule making in many key regulatory areas These include not only the improved and enhanced rules on traditional issues already covered by the WTO such as goods services and IP rights but also the carefully designed rules in areas that have never been addressed in the WTO or comprehensively covered in other FTAs such as state owned enterprises electronic commerce and labor and environmental issues Although the United States has withdrawn from the TPP the remaining countries are still putting efforts into establishing a TPP without the United States or a TPP with China Economically speaking the current 11 parties account for about 20 % of the global economy If such agreement is put into force there will be significant implications for the region for the multilateral system and even for other FTAs The book addresses the potential of the TPP to change the ways trade and investments are conducted and argues for its potential to be the start of an international trade economic law revolution The book elaborates the relationship between the TPP and other existing trade agreements such as the WTO and other FTAs and explains how the TPP is to deal with traditional and new issues Taken together the authors argue that the implications of the TPP go beyond its current membership It is hoped that

the book will make an important contribution to the field of international economic law **Locating India in the Contemporary International Legal Order** Srinivas Burra,R. Rajesh Babu,2018-06-26 This book brings together disparate views which attempt to locate India in the contemporary international legal order The essays endeavour to explore critically India s role and attitude towards international law in various fields and its influence and contribution in the development of the latter The contributions are also of historical value as they analyse the present as part of a historical trajectory Drawing upon the current and historical practices from their respective fields the authors attempt to highlight some critical aspects involving India and international law These aspects broadly underline India s drift from its traditional role as an ally and proponent of the third world towards the pragmatism of self interest behaviour that is often compelled by internal political and economic conditions as well as the dictates of external forces *The Protection of Geographical Indications in China* Xinzhe Song,2021-11-23 For some time now there has been conflict concerning the role in the global marketplace of certain agricultural or handcrafted products of specific geographical origin whether they should come under trademark law as favoured by common law countries such as the United States or under the geographical indications GI system developed in France and subsequently promoted by the European Union EU At this moment China is in the eye of the storm Taking fully into account the legislative and judicial gaps in China s compromised embrace of the GI concept this book shows how the Chinese case brings to prominence fundamental issues relating to the functional dissimilarity between trademarks and GIs the treatment of the terroir concept the role of GIs in rural development and the challenges of adopting the French and European model in other countries especially in East Asia Providing detailed information on how GIs are registered protected and managed in China France and the EU the book includes such practical analysis as the following comparison between the Chinese and European GI systems to highlight differences in essential elements for GI registration and protection mistakes and errors arising from forcing the GI function into trademark law the increasingly larger scope of EU GI protection protection of collective marks containing GIs and the extension of GI protection to handicrafts who is responsible for the protection of each registered name and who can sue for infringement and legislative options for future GI protection in China Recognizing not only that GIs protect consumers against fraud and producers against unfair competition but also that the goals include the preservation of rural development cultural heritage and traditional knowledge as well as environmental and ecological protection this book provides a comprehensive reference on legal tools available for policymakers legal practitioners researchers and local producers concerned with GI or trademark issues in China France or the EU It will prove greatly helpful to corporate lawyers filing international registration applications and taking legal action It will also be of inestimable value to officials in a variety of countries that are considering developing or improving systems to enhance the value of terroir products and to academics interested in intellectual property law trademark law agriculture policy GI legislation or World Trade Organization WTO rules The Indigenous Paradox Jonas Bens,2020-06-12 An investigation into

how indigenous rights are conceived in legal language and doctrine In the twenty first century it is politically and legally commonplace that indigenous communities go to court to assert their rights against the postcolonial nation state in which they reside But upon closer examination this constellation is far from straightforward Indigenous communities make their claims as independent entities governed by their own laws And yet they bring a case before the court of another sovereign subjecting themselves to its foreign rule of law According to Jonas Bens when native communities enter into legal relationships with postcolonial nation states they become indigenous Indigenous communities define themselves as separated from the settler nation state and insist that their rights originate from within their own system of laws At the same time indigenous communities must argue that they are incorporated in the settler nation state to be able to use its judiciary to enforce these rights As such they are simultaneously included into and excluded from the state Tracing how the indigenous paradox is inscribed into the law by investigating several indigenous rights cases in the Americas from the early nineteenth century to the early twenty first Bens illustrates how indigenous communities have managed and continue to manage to navigate this paradox by developing lines of legal reasoning that mobilize the concepts of sovereignty and culture Bens argues that understanding indigeneity as a paradoxical formation sheds light on pressing questions concerning the role of legal pluralism and shared sovereignty in contemporary multicultural societies *Handbook of Trends and Innovations Concerning Library and Information Science* Barbara Jane Holland, 2025-06-02 The field of library and information science LIS is constantly evolving and adapting to the changing needs and expectations of users society and technology This book provides trends and innovations that are emerging in library and information science with a multidisciplinary approach

Esterling,2023-10-23 Examining the restitution of cultural property to Indigenous Peoples in human rights law this book offers a detailed analysis of the opportunities and constraints of international law as a tool of resistance and social transformation for marginalized groups In accordance with an increasing insistence on respect for diverse cultures and through their own international mobilization Indigenous Peoples have participated in the construction of a distinct human rights framework Significant academic inquiry has focused on the substantive gains made by Indigenous Peoples in this context along with its impact on a body of law that had previously denied Indigenous Peoples a basis for claims to their own cultural materials and practices Accordingly this book acknowledges that Indigenous Peoples as non state actors have generated greater substantive and procedural legitimacy in human rights law making Offering normative insights into the participation of non state actors in international law making however it also demonstrates that despite their significant role in constructing the legal framework of human rights in the 21st century the participation of Indigenous Peoples continues to be structurally limited With its interdisciplinary approach to the field this book will appeal to scholars and students in the fields of law politics anthropology and indigenous studies **From Dual to Cooperative Federalism** Robert
