Guidelines for the Systematic Treatment of the Depressed Patient Larry E. Beutler, John Clarkin, Bruce Bongar, 2000-02-03 From initial consultation to termination of treatment psychologists and other mental health practitioners make a series of crucial decisions to determine the progress and therapy of the patient These decisions have varied implications such as the clinical course of the patient the efficacy and efficiency of the treatment and the cost of the sessions Thus the decisions made by mental health professionals need to be accurate and consistent respecting a series of guidelines that will ultimately benefit the patient This is the first in a series of guidebooks that is designed to do just that by providing practitioners with some structure in the development of treatment programs Previous guidelines have been based on consensus panels of experts or on the opinions of membership groups causing guidelines to be very far off from the findings

of empirical research Here guidelines are presented in terms of treatment principles rather than in terms of specific treatment models or theories and they do not favor one theory of psychotherapy over another Instead they define strategies and considerations that can be woven into comprehensive treatment programs The entire series of guidebooks will cover numerous topics including anxiety disorders drug abuse alcohol abuse and treatment of serious mental disorders This volume will cover in detail the nature of depression issues in treatment research contemporary treatments and implications for education and training It is ideal for postgraduates and professionals in the mental health field and is intended to provide important background on treatment of non bipolar depressive disorders

Therapeutic and Legal Issues for Therapists

Who Have Survived a Client Suicide Kayla Weiner, 2014-06-03 The death of a patient is every therapist's worst nightmare Even more frightening is the debilitating silence that surrounds a therapist after the death of a client What do you do How do you proceed with your personal and professional life Until now advice on surviving a patient's suicide has been scarce This book examines this much overlooked topic to help you continue to live and practice confidently The authors of this courageous book mix first person narratives with professional strategies to help therapists deal with the emotional and legal consequences that follow the loss of a client Therapeutic and Legal Issues for Therapists Who Have Survived a Client Suicide provides you with models of coping strategies for clinicians after a client completes a suicide an examination of factors that compound the trauma for the therapist survivor examples for dealing with a client's family suggestions for developing curricula for training institutions recommendations for supervisory guidelines explanations of and means of mitigating legal liability This practical book describes various ways of dealing with clinician and supervisory responsibilities after a client's self-inflicted death It will show you how to minimize the legal risks of working with suicidal clients and help you regain your sense of professional competence if a suicide occurs New methods of screening and treatment assistance are offered With about 30 000 suicides occurring in the United States annually and many of those people in treatment at or near the time they commit suicide thousands of clinicians face this trauma yearly The clear specific therapeutic and legal guidelines you'll find in the book as well as the philosophical discussions make it a vital read for therapists counselors social workers nurses supervisors and educators in mental health training institutions

The Oxford Handbook of Behavioral Emergencies and Crises

Phillip M. Kleespies, 2016-09-19 The Oxford Handbook of Behavioral Emergencies and Crises includes the most up to date and valuable research on the evaluation and management of the most challenging patients or clients faced by mental health providers individuals who are at high risk of suicide of other directed violence or of becoming the victims of interpersonal violence These are cases in which the outcome can be serious injury or death and there can be negative consequences not only for the patient but also for the patient's family and friends for the assessing or treating clinician and for the patient's clinic or medical center Virtually all mental health clinicians with an active caseload will see individuals with such issues This Handbook is comprised of chapters by leading clinicians researchers and scholars in this area of practice It presents a framework for learning the skills needed for assessing and working competently with such high risk individuals Chapters draw a distinction between behavioral emergencies and crises and between emergency intervention and crisis intervention The book examines the inter related aspects of the major behavioral emergencies that is for example the degree to which interpersonal victimization may lead an individual on a pathway to later suicidal or violent behavior or the degree to which suicidal individuals and violent individuals may share certain cognitive characteristics This resource is not simply a knowledge base for behavioral emergencies it also presents a method for reducing stress and acquiring skills in working with high risk people

Legal Issues in Mental Health Care

B.A. Weiner, R. Wettstein, 2013-06-29 I OVERVIEW Legal Issues in Mental Health Care is aimed at the mental health clinician who provides services on either an inpatient or an outpatient basis It is written for psychiatrists psychologists social workers nurses and other therapists to help them understand and manage legal issues in their daily practice The issues covered apply to therapists who work for an agency or hospital as well as those who work independently The book is meant to serve as a handbook but it also provides a quick resource as legal questions arise which are related to the obligations of the therapist It addresses the legal issues that confront the clinician It is not aimed at the clinician who specializes in forensic mental health issues because the information provided does not reach that level of detail or sophistication Nor is it aimed at the scholar because our goal is to provide practical information in a clear and concise format We have not addressed the wide array of laws protecting the mentally disabled from discrimination

most notably the Americans with Disabilities Act 1990 and the Fair Housing Act Most states also have laws that prohibit discrimination in employment services and housing These issues are beyond the scope of this book because we are addressing the legal issues that arise in providing care rather than the rights of mentally disabled persons

11 ORGANIZATION OF THE BOOK

The book consists of eleven chapters and a Glossary of Legal Terms

Oxford Handbook of Personality Assessment James N. Butcher, 2009-07-14 One of the oldest of all psychological disciplines the field of personality assessment has seen no shortage of scientific study or scientific literature This Oxford Handbook provides a comprehensive perspective on the contemporary practice of personality assessment including its historical developments underlying methods applications contemporary issues and assessment techniques The Oxford Handbook of Personality Assessment details both the historical roots of personality assessment and the evolution of its contemporary methodological tenets This provides the foundation for the handbook's other major focus the application of personality assessment in clinical personnel and forensic assessments This handbook will serve as an authoritative and field encompassing resource for researchers and clinicians from across the medical health and psychology disciplines i.e. clinical psychology psychiatry social work etc and would be an ideal text for any graduate course on the topic of personality assessment

Suicide Risk Assessment and Prevention Maurizio Pompili, 2022-12-19 This book explores suicide prevention perspectives from around the world considering both professionals' points of view as well as first person accounts from suicidal individuals Scholars around the globe have puzzled over what makes a person suicidal and what is in the minds of those individuals who die by suicide Most often the focus is not on the motives for suicide nor on the phenomenology of this act but on what is found from small cohorts of suicidal individuals This book offers a tentative synthesis of a complex phenomenon and sheds some light on models of suicide that are less frequently encountered in the literature Written by international experts it makes a valuable contribution to the field of suicidology that appeals to a wide readership from mental health professionals to researchers in suicidology and students
