offers a strong helping hand and invaluable guidance to the vast numbers of family and friends who are left behind by the more than thirty thousand people who commit suicide each year struggling to make sense of an act that seems to them senseless and to pick up the pieces of their own shattered lives And perhaps most important for the first time in any book she allows survivors to see that they are not alone in their feelings of grief and despair *Living, Dying, Grieving* Dixie Dennis,2009 Taking a life education approach this resource offers helpful tips and techniques for mastering a fear of death suggests helpful ideas for taking care of the business of dying and encourages students to live longer by adding excitement into their lives *Program Perspectives on Suicide Prevention* ,1991 **Death, Dying, and Bereavement** Judith M. Silverman,Bruce Michael Bongar,2000-08-10 Multidisciplinary and comprehensive in scope this volume serves as an authoritative overview of scientific knowledge about suicide and its prevention providing a foundation in theory research and clinical applications Issues relevant to clinical case management are highlighted and various treatment modalities are discussed in light of the latest research findings **Personal Care in an Impersonal World** John Morgan,2020-11-25 The purpose of this volume is to ask and propose a positive answer to the question Can we attend to the personhood of individuals within systems and cultures which are mass oriented One of the most interesting changes in contemporary thinking has been the emphasis on the unique person While the distinction between a person a unique rational being and individual one of several similar things has long existed it is in the twentieth century that we seem to have become fully conscious of this distinction There is good reason for such as emphasis today Repeatedly in this century the case of the person was deemed less important than some policy Innocent persons slaughtered in the name of some ism political bombings and kidnappings and mass unemployment to name but a few The cause of our dehumanization seems to be the reduction of the individual person to a part of the political economic or religious system **Counseling Addicted Families** Gerald A. Juhnke,W. Bryce Hagedorn,2013-08-16 In Counseling Addicted Families Gerald A Juhnke and William Bryce Hagedorn recognize that even those treatment providers who understand the importance of the familial context of addiction are often stymied by the variety of family treatment theories and their often imperfect fit for cases of addiction In this book Juhnke and Hagedorn provide a truly integrated model for assessment and treatment Based upon the authors combined twenty three years of experience in clinical and treatment supervision the Integrated Family Addictions Model consists of six progressive treatment tiers which organize the relevant family treatment theories into a graduated and coherent sequence beginning with the briefest and least costly forms of therapy **Reducing the Toll of Suicide** Diego De Leo,Vita Poštuvan,2019-10-15 The carefully selected chapters in this volume provide food for thought to practitioners researchers students and all those who come into contact with the tragedy of suicide with the hope of stimulating new ideas and interventions in the difficult fight against suicidal behaviours This is the second book based on the Intuition Imagination and

Innovation TRIPLE i in Suicidology international conferences which are organised annually by the Slovene Center for Suicide Research in memory of the late Prof Andrej Maru ic with the aim of promoting intuition imagination and innovation in the research and prevention of suicide and suicidal behaviour In five parts the internationally renowned team of authors summarises the research looking at Understanding individuals assessing risk in older adults and psychotherapy with suicidal patients Understanding the groups at risk of suicide including youth people in prison men and people with mood disorders Understanding the role of community including the Papageno effect technology based and collaborative approaches to prevention as well as bereavement Models of understanding suicide including the integrated motivational volitional model of suicidal behaviour and the hot air balloon model of risk factors for suicide and Understanding the unique ethical and methodological issues associated with research in this field

Suicide Science Thomas Joiner,M. David Rudd,2007-05-08 Suicide kills and maims victims traumatizes loved ones preoccupies clinicians and costs health care and emergency agencies fortunes It should therefore demand a wealth of theoretical scientific and fiduciary attention But in many ways it has Why Although the answer to this question is multi faceted this volume not supposes that one answer to the question is a lack of elaborated and penetrating theoretical approaches The authors of this volume were challenged to apply their considerable theoretical wherewithal to this state of affairs They have risen to this challenge admirably in that several ambitious ideas are presented and developed If ever a phenomenon should inspire humility it is suicide and the volume s authors realize this Although several far reaching views are proposed they are pitched as first approximations with the primary goal of stimulating still more conceptual and empirical work A pressing issue in suicide science is the topic of clinical interventions and clinical approaches more generally Here too this volume contributes covering such topics as therapeutics and prevention comorbidity special populations and clinical risk factors
