Su-25 Frogfoot in Action Hans-Heiri Stapfer, Don Greer, Tom Tullis, 1992-01-01 **Sukhoi Su-25 Frogfoot** Yefim Gordon, 2004-09-30 The Sukhoi Su 25 Frogfoot is one of the world's most effective close air support aircraft and is the only true armored attack aircraft still in production. The State trials of the aircraft were completed in December 1980 and it became operational in the following year. During the production run a number of improvements were incorporated derived from experience gained during operations in the Russian campaign against Afghanistan. Throughout the entire Afghan campaign Su 25s launched a total of 139 guided missiles of all types against Mujahideen positions. On average each aircraft performed 360 sorties per year which was considerably higher than any other combat type in Afghanistan. By the end of the war the number of Su 25s deployed to Afghanistan had reached around 50 and they had carried out a total of 60 000 sorties.

Sukhoi Su-25 Frogfoot Alexander Mladenov, 2013-09-20 A fully illustrated technical guide to the Sukhoi Su 25 Frogfoot. The Sukhoi Su 25 Frogfoot was the Soviet Air Force's first mass produced jet purposely designed for the close air support CAS role and was a simple effective and durable attack aircraft that by 2012 had seen combat in no fewer than 40 conflicts. Some 630 Su 25s were built between 1979 and 1991 as well as 185 export Su 25Ks. 70 Su 25UB UBK Frogfoot B two seaters that rolled off the production line at the aviation plant in Ulan Ude, UUP, Russia. The Frogfoot is known as the most cost effective ground attack aircraft available to the Russian Air Force, RuAF, and between the RuAF and the Russian Navy's aviation assets there are some 200-220 Su 25s still in operation. Illustrated throughout with photographs and colour artwork, this title examines the development, history, evolution and combat performance of the Su 25 Frogfoot and details its effectiveness and reliability. Such is the reputation the Su 25 has earned 19 of the 25 nations to have deployed a Frogfoot variant continue to operate them today. Sukhoi Su-25: Famous Russian Aircraft Yefim Gordon, E. Gordon, Dmitriy Komissarov, 2020 The Su 25 ground attack aircraft made its first flight on February 22, 1972. After five years of tests the aircraft reached its definitive configuration with new engines, a revised airframe and new armament entering certification trials which were completed in 1981. A year earlier, however, the initial production Su 25 had received its baptism of fire in the Afghan War. Gradually the Su 25 became the progenitor of a family. The Su 25UB combat trainer came first, the single seater and two seater were also built for export as the Su 25K, Su 25UBK. A new line of development began in 1979 with a series of single seat tank buster variants based on the Su 25UB's airframe but featuring more advanced sighting systems and weapons. The first of these was the Su 25T of 1984 followed by Su 25TM, Su 39 of 1993 making the Su 25 in the end the sole Russian light attack aircraft. The Su 25 has been widely exported serving with air forces in Europe, Asia, the Middle East, Africa and South America. Apart from the Afghan War it has seen action in Iraq, Angola, Congo, Eritrea, Ethiopia, Macedonia, Cote d'Ivoire, Sudan and in conflicts between the former Soviet republics. More recently the Frogfoot has been used in the Russian participation in the civil war in Syria. War. The book describes the full development and service history of the Su 25 featuring

fleet lists and a design descriptions It is illustrated throughout with numerous photos and color profiles Su-25 'Frogfoot' Units In Combat Alexander Mladenov,2015-04-20 This volume details the technical features and operational performance of the Soviet Su 25 Frogfoot which proved itself as a durable and versatile attack aircraft in a variety of theatres such as Afghanistan Georgia and Ossetia Today it is widely accepted as the true successor to the types of specialised ground attack aircraft that emerged during World War II This book illuminates the service history of the Frogfoot in over 30 years of combat using first hand accounts and revealing archive photographs The awkward looking Su 25 has often been underrated but the faithful Frogfoot is now slated to remain in service with most of its current operators across the globe until at least 2020 This study explores the successes of the Frogfoot in full demonstrating its strengths as a formidably armed armoured and very agile attack aircraft *Sukhoi Su-25 Frogfoot* Robert Pied,Nicolas Deboeck,2021-06 Walk around and action photography of the Su 25 **Sukhoi Su-25 Frogfoot** Yefim Gordon,2007-07 Detailed coverage of the Sukhoi Su 25 one of the most well known and popular Russian combat aircraft types **Sukhoi Su-24** Yefim Gordon,E. Gordon,2004-10 Illustrates the Sukhoi Su 24 s development and service history including operations in Russia the Ukraine Iran and Iraq To this day the Su 24 remains the principal Russian tactical bomber Contains approximately 200 black white and color photos with detailed captions **Sukhoi Su-25** E. Gordon,Yefim Gordon,Dmitriy Komissarov,2011 Following on from the collection of successful Famous Russian Aircraft titles Yefim Gordon has teamed up with Keith Dexter and Dmitriy Komissarov to produce this insight into the Sukhoi fighter bomber family In the early 1950s the reborn aircraft design bureau headed by Pavel O Sukhoi started its renewed activities by creating two aircraft sharing the same fuselage design and powerplant the delta wing T 3 and the swept wing S 1 The former became the progenitor of several interceptors starting with the Su 9 the other aircraft became the Su 7 tactical fighter but soon evolved into the Su 7B fighter bomber Known to the West as the Fitter the Su 7B and its

improved Su 7BM and Su 7BKL versions formed the backbone of the Soviet fighter bomber aviation. They were also exported to many friendly nations first and foremost to some Warsaw Pact member states Poland and Czechoslovakia as well as to non aligned nations like India Algeria Egypt Iraq and others. The Fitter saw action in quite a few wars the Indo Pakistani border conflict of 1971 the Arab Israeli wars. The initial Su 7 Fitter A was superseded by the Su 17 which differed primarily in having variable geometry wings. The prototype made its maiden flight in 1966 the production version completely supplanted the original Su 7 in Soviet Air Force service in the 1980s. The swing wing Su 17 proved highly efficient in the Afghan War earning the affection of the pilots who flew it. Its high combat capabilities were duly recognized abroad apart from the Warsaw Pact Poland Czechoslovakia East Germany Hungary and Bulgaria the Su 20 and Su 22 export variants were delivered to Egypt Iraq Peru Yemen Afghanistan and other nations. Iraq used its Su 22s against Iran in the war of 1980-88 and the ultimate Su 22M4 is still in service with the Polish Air Force albeit with upgrades to make it compatible with NATO operational standards. This new title written by 3 aviation enthusiasts including expert in the field Yefim Gordon and is illustrated with a whole host of unpublished photos as well as numerous line drawings and colour side views which will undoubtedly be of interest to aviation enthusiasts and scale modellers alike. The in service and operators chapters feature insignia and unit badges nose art worn by individual aircraft making this a must have for any aviation and scale model enthusiast's collection. Russia

Soviet and Russian Military Aircraft in the Americas Yefim Gordon, Dmitriy Komissarov, 2016-11-01 The first recipient of Soviet military hardware in the Americas was Cuba in 1959. Since then the Cuban Air Force has operated the MiG 15 to the MiG 29 An 26 and Il 76MD transports and more Cuban combat aircraft have seen action against the ships and aircraft used by the CIA in its subversive activities against Cuba. Other Latin American nations have also ordered Russian military aircraft based on common sense and economic expediency rather than political affiliations. These include Mexico Brazil neighboring Colombia the Argentina Air Force and Bolivia which is among the latest customers for the Mi 17 with plans to use for drug busting operations. Another major customer for Soviet aircraft was Peru which ordered An 26 and An 32 transports MiG 29 fighters Su 20 Su 22 fighter bombers and Su 25 attack aircraft. Peruvian Su 22s have been involved in the border conflict with neighboring Ecuador and Soviet aircraft notably Mi 17 and Mi 24 helicopters have been actively used by the Sandinista regime in Nicaragua against the US backed Contras insurgents during the civil war. More recently Venezuela another country noted for its anti US stance purchased a large batch of Su 30MKV multi role fighters as well as Mi 17 and Mi 26 helicopters. Written by the acknowledged experts in the field and illustrated throughout with photographs and color artwork this is the definitive record of Soviet and Russian military aircraft and their combat operations in this region. **Sukhoi Su-27** Yefim Gordon, 2007 In the late 1960s the Soviet Union became aware that the U S was developing a new generation of jet fighters

that had an exceptional range heavy armor and great agility in the air These U S aircraft the F 14 Tomcat F 15 Eagle F 16 Fighting Hornet and F A 18 Hornet dominated U S air power for three decades In the context of the Cold War the Soviets could not be seen to be lagging behind the Americans Their response to these new U S aircraft was the Sukhoi Su 27 Flanker which was designed as a long range air superiority aircraft and interceptor The first of the modified pre production aircraft appeared in 1981 but it was not until 1984 that significant numbers of the Su 27 started to enter service Eventually some 680 Su 27 were built for the Soviets of which 400 remain in service with the Russian Tactical Air Force today Outside of Russia the Su 27 is also in service with the Chinese and on the inventories of the air forces of Vietnam Malaysia Ethiopia Indonesia Syria and Angola This book describes in depth the development operational career history and variants within the Su 27 family The book incorporates color and black and white photos to portray some of the various camouflage schemes carried by the type in Soviet Russian and other air forces over the past two decades [Rooks in Afghanistan Volume 1](#) Andrey
