Summary Justice Judges Address Juries:

Summary Justice Paul Robertshaw, 1998-07-01 This is a study of the practice of judicial summing up to juries and of the language of persuasion and rhetoric in the English criminal process The book examines those statements normally occurring in criminal courts but also in the High Court in defamation trials and in civil liberty torts in the county courts The text of these summaries can vary in length and are significant in that they break the flow between advocates turn taking especially their final speeches In addition to its linguistic concerns the book considers the practice of summing up as a legal problem as unrecognized advocacy and examines alternatives such as the North American and Scottish minimalist legal model and a reformed summing up of patterned structure

Syntactic Analysis and Description David Lockwood, 2005-12-07 This book is designed to teach undergraduate and beginning graduate students how to understand analyse and describe syntactic phenomena in different languages The book covers every aspect of syntax from the basics to more specialised topics such as clitics which have grammatical importance but cannot be used in isolation and negation in which a construction contradicts the meaning of a sentence The approach taken combines concepts from different theoretical schools which view syntax differently These include M A K Halliday s systemic functional linguistics the stratificational school advocated by Sydney Lamb and Kenneth L Pike s tagmemic model The emphasis of the book is on syntactic structures rather than linguistic meaning and the book stresses the difference between a well formed sentence and a meaningful one The final chapter brings these two aspects together to show the connections between syntax and semology Each chapter concludes with exercises from a diverse range of languages and a list of major technical terms The book also includes a glossary as an essential resource for students approaching this difficult subject for the first time

National Criminal Justice Thesaurus , 1992

Classroom Discourse Analysis Frances Christie, 2005-01-01 This book offers a model of classroom discourse analysis that uses systemic functional linguistic theory and associated genre theory to develop a view of classroom episodes as curriculum genres some of which operate in turn as part of larger unities of work called curriculum macrogenres Drawing on Bernstein s work Christie argues that two registers operate in pedagogic discourse a regulative register to do with the goals and directions of the discourse and an instructional register to do with the particular content or knowledge at issue Each can be shown to be realized in distinctive clusters of choices in the grammar The operation of the regulative register determines the initiation pacing sequencing and evaluation of the overall pedagogic activity The book sets out the its methodology in detail by reference to a number of classroom texts and a range of school subjects Overall schools emerge as sites of symbolic control in a culture

Language, Education and Discourse Joseph Foley,2005-12-05 This collection of essays by leading functional linguists presents the latest perspectives on language and discourse in educational settings The book questions the idea of discourse to reveal that the social processes of learning are imbued with the ideologies of the society and education system within which learning takes place The contributors take into account the historical and cross cultural perspectives of both classroom practices and the student's own awareness of the ideological meanings of language activities Language Education and Discourse is divided into two sections Part one covers early childhood and the growing development of a language system from the basic semiotic system of the infant This is followed by an analysis of the beginnings of literacy in kindergarten the introduction to writing in primary school and the ideological content of reading material Part two furthers this analysis by looking at discourse in secondary and tertiary education The contributors pose questions about the role and importance of teaching grammar in the school system and finally examine how to refine the discourse of education This book will be useful to academics interested in the latest functional perspectives on language as it is used in education

Images in Law William Pencak,2016-05-13 What does the law look like While numerous attempts have been made to examine law and legal action in terms of its language little has yet been written that considers how visual images of the law influence its interpretation and execution in ways not discernible from written texts This groundbreaking collection focuses on images in law featuring contributions that show and discuss the perception of the legal universe on a theoretical basis or when dealing with visual semiotics dress ceremony technology etc It also examines language in action analyzing jury instructions police directives and how imagery is used in conjunction with contentious social and political issues within a country such as the image of family in Ireland or the image of racism in France

Brain, Mind and the Signifying Body Paul Thibault,2006-09-17 *Brain Mind and the Signifying Body* is an exploration of a multimodal theory of cognitive science Using linguistic theories first developed by Saussure and more latterly by M A K Halliday Paul Thibault analyses how social and biological systems interact to produce meaning This fascinating study will be of interest to undergraduates and academics researching cognitive linguistics and advanced semiotics The book engages with the current dialogue between the human and life sciences to ask questions about the relationship between the physical biological aspects of a human being and the sociocultural framework in which a human being exists Paul J Thibault argues that we need to understand both the semiotic discursive nature of meaning making and the physical context in which this activity takes place The two are inseparable and hence the only way we can understand our subjective experience of our environment and our perceptions of our inner states of mind is by giving equal weight to both frameworks This ecosocial semiotic theory engages with linguistics semiotics activity theory biology and psychology In so doing the book produces a new way of looking at how a human being makes sense of his or her environment but also how this environment shapes such meanings
