respectively. In general, most AI MPPF techniques are efficient in handling PFC and tracking the GP efficiently and accurately at all times but a small difference occurs between them in some evaluation parameters such as convergence speed, complexity, hardware implementation and initialization parameters determination and makes the difference in their total evaluation as shown in Fig. 10. Both PFC and ANN have the same total evaluation points but, optimization and improvements that have been done on PFC may put it in high arrangement with PPA and PA.

On the other hand, the most effective and efficient soft computing MPPF techniques based AI with PFC are IC, ANNs followed by GA but they may not provide convergence to the GP in some cases of PFC (Shamsy and Shamsy, 2017). Although, both IC and ANNs have the same total evaluation points but, the improvements that have been done on IC may put it in high ranking with MPPF techniques based IC. Both PFC and ANN are not able to track the GP separately and fail to handle the PFC since training ANN needs data which is not available from the random nature of PFC. In addition, the membership function and control variables of PFC are static more defined, while PFC is dynamic and tracking the varying GP is not a direct task (Shamsy et al., 2017). Also, they require high computation controller ability for training in addition to extensive information required about the PV system for training and tracking roles (Shamsy and Shamsy, 2017). Therefore, they should be optimized and combined with other MPPF techniques to improve their performance and convergence to the GP with PFC. Finally, although conventional MPPF techniques cannot be applied with PFC, they are efficient in tracking the unique MPPF under random conditions. Both IC and PFC have good performance with the same total evaluation points followed by IC and CV techniques. This conclusion matches with the finding that some modifications and improvements on PFC put it in the same performance level with IC.

6. Conclusions

This paper introduced a comparative and comprehensive review for the IT most famous MPPF techniques to track the GP instead of LPs and alleviate the PFC effects. The IT MPPF techniques are divided into three groups which are conventional, soft computing (SC, SI) and Hybrid based MPPF techniques. One of the most significant findings introduced in this study is the technical and economical assessment for the IT most famous and efficient MPPF techniques based on IT evaluation parameters. In addition, a novel evaluation index has been introduced to rank these IT techniques based on the 9 most important key issues with total evaluation by 90 points for these MPPF techniques. Ranking of these IT MPPF techniques will help researchers, scientists, and industrial sector to pick up the most effective and appropriate MPPF techniques easily. Based on these evaluations, both IC and PFC have the same total evaluation points followed by IC and CV techniques. This conclusion matches with the previous literature finding revealed that optimized PFC can have nearly the same efficiency as IC. Also, conventional MPPF techniques are not applicable with PS where they can track the unique peak efficiently and accurately but, they fail to track the GP and stuck at the first MPPF whenever it is GP or LP. Whereas, MPPF techniques based AI are efficient and accurate to track the unique peak under random condition compared to conventional techniques and mitigate their shortcomings related to tracking speed and oscillations around MPPF at steady state. The most effective and efficient AI based MPPF techniques with PFC are IC, ANNs followed by GA. Although, both IC and ANNs have the same total evaluation points but, optimization and improvements that have been done in recent years on IC may put it in high ranking with MPPF techniques based IC. Both PFC and ANN are not able to track the GP separately and fail to handle the PFC. Therefore, it should be optimized and combined with

With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Summary Of Evaluation Findings For 30 Meter Handheld And Mo books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Summary Of Evaluation Findings For 30 Meter Handheld And Mo books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a nonprofit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer

academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Summary Of Evaluation Findings For 30 Meter Handheld And Mo books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Summary Of Evaluation Findings For 30 Meter Handheld And Mo books and manuals for download and embark on your journey of knowledge?
