Furry Tales Fred Patten, 2019-09-06 Tales featuring anthropomorphic animals have been around as long as there have been storytellers to spin them from Aesop's Fables to Reynard the Fox to Alice in Wonderland The genre really took off following the explosion of furry fandom in the 21st century with talking animals featuring in everything from science fiction to fantasy to LGBTQ coming out stories In his lifetime Fred

Patten 1940 2018 one of the founders of furry fandom and a scholar of anthropomorphic animal literature authored hundreds of book reviews that comprise a comprehensive critical survey of the genre This selected compilation provides an overview from 1784 through the 2010s covering such popular novels as Watership Down and Redwall along with forgotten gems like The Stray Lamb and Where the Blue Begins and science fiction works like Sundiver and Decision at Doona Startide Rising David Brin,2010-07-21 David Brin's Uplift novels are among the most thrilling and extraordinary science fiction ever written Sundiver Startide Rising and The Uplift War a New York Times bestseller together make up one of the most beloved sagas of all time Brin's tales are set in a future universe in which no species can reach sentience without being uplifted by a patron race But the greatest mystery of all remains unsolved who uplifted humankind The Terran exploration vessel Streaker has crashed in the uncharted water world of Kithrup bearing one of the most important discoveries in galactic history Below a handful of her human and dolphin crew battles armed rebellion and a hostile planet to safeguard her secret the fate of the Progenitors the fabled First Race who seeded wisdom throughout the stars **Humanity's End** Nicholas Agar,2010-08-20 An argument that achieving millennial life spans or monumental intellects will destroy values that give meaning to human lives Proposals to make us smarter than the greatest geniuses or to add thousands of years to our life spans seem fit only for the spam folder or trash can And yet this is what contemporary advocates of radical enhancement offer in all seriousness They present a variety of technologies and therapies that will expand our capacities far beyond what is currently possible for human beings In Humanity's End Nicholas Agar argues against radical enhancement describing its destructive consequences Agar examines the proposals of four prominent radical enhancers Ray Kurzweil who argues that technology will enable our escape from human biology Aubrey de Grey who calls for anti aging therapies that will achieve longevity escape velocity Nick Bostrom who defends the morality and rationality of enhancement and James Hughes who envisions a harmonious democracy of the enhanced and the unenhanced Agar argues that the outcomes of radical enhancement could be darker than the rosy futures described by these thinkers The most dramatic means of enhancing our cognitive powers could in fact kill us the radical extension of our life span could eliminate experiences of great value from our lives and a situation in which some humans are radically enhanced and others are not could lead to tyranny of posthumans over humans **The Uplift Project** R. Robert Holson,2016-03-04 In this book the author puts forward an agenda to enhance intelligence and longevity in humans select animal species including dogs dolphins and elephants and machines This effort would extend over 1 000 years or 40 human generations Enhancements of IQ and longevity in humans would involve both environmental and genetic improvements in membership IQ and longevity The goal would be a mean IQ of 145 and an average longevity of 100 years in human Uplift Project members by the end of these 1 000 years Given that Uplift Project members will probably at project outset have better than average IQ and life expectancy this could involve as little as a two standard deviations increase in IQ 30 points and one standard deviation increase in longevity 20 years over these 1 000 years The Uplift Project would also

expand human animal and machine membership not only across the planet but to the moon Mars and space colonies
