**Recreational Uses of Coastal Areas** P. Fabbri,2012-12-06 Human clustering in coastal areas The coastal zone has gained a solid reputation as a place vocated for recreational activities and this is generally related to the presence of the sea The relationship however does not appear univocal or simple the sea can be perceived as a hostile element by humans and the more general question of whether the presence of the shore is in itself a favourable repulsive or irrelevant factor to settlement is a debatable point at least for pre industrial societies Back in the early part of the 19th century Friedrich Hegel regarded oceans and rivers as unifying elements rather than dividing ones thus implying a trend towards the concentration of human settlements along them The sea he wrote stimulates 1 courage and conquest as well as profit and plunder although he realized that this did not equally apply to all maritime peoples In Hegel s view different approaches to the sea were mainly the results of cultural factors and in fact he recognized that some people living in coastal areas perceive the sea as a dangerous and alien place and the shore as aftnis terrae

**The Australian Experience** R. L. Heathcote,1988 The 26th International Geographical

Congress the first to be held in Australia was held in Sydney in August 1988 and provided the initial stimulus for this book In it twenty six geographers have contributed essays to illustrate the scope of the unique processes of land settlement and resource management which have taken place on the continent over the last two hundred years The essays cover a wide range of themes from the roles of international political theory international capital and international relations on the one hand to the roles of federal and state governments and the conservation lobby on the other from the attempts to come to terms with the environmental constraints of this wide brown land to the environmental impacts of intensive often destructive resource management and finally from demography to the social role of cricket and the future role of the nation in its region The scope of these essays is a reminder not only of the complex linkages which have created the current Australian landscape but also of the geographers role in interpreting those linkages for contemporary society p 4 of cover **Who's who of Australian Writers** ,1995 **Australian Books** National Library of Australia,1983
