stature as one of the world's leading graphic designers is incontestable. For half a century his pioneering work in the field of advertising design and typography has exerted a profound influence on the design profession; he almost single-handedly transformed commercial art from a practice that catered to the lowest common denominator of taste to one that could assert its place among the other fine arts. Among the numerous clients for whom he has been a consultant and/or designer are the American Broadcasting Company, IBM Corporation, and Westinghouse Electric Corporation. In this witty and instructive book, Paul Rand speaks about the contemporary practice of graphic design, explaining the process and passion that foster good design and indicting faddism and trendiness. Illustrating his ideas with examples of his own stunning graphic work as well as with the work of artists he admires, Rand discusses such topics as the values on which aesthetic judgments are based, the part played by intuition in good design, the proper relationship between management and designers, the place of market research, how and when to use computers in the production of a design, choosing a typeface, principles of book design, and the thought processes that lead to a final design. The centerpiece of the book consists of seven design portfolios with diagrams and ultimate choices that Rand used to present his logos to clients such as Next IDEO and IBM. **Arts Review**, 1984

How do photographs compel belief and endow knowledge? To understand the impact of photography in a given era, we must study the adjacent forms of visual persuasion with which photographs compete and collaborate. In photography's early days, magic shows, scientific demonstrations, and philosophical games repeatedly put the visual credulity of the modern public to the test in ways that shaped and were shaped by the reality claims of photography. These venues invited viewers to judge the reliability of their own visual experiences. Photography resided at the center of a constellation of places and practices in which the task of visual discernment of telling the real from the constructed became an increasingly crucial element of one's location in cultural, political, and social relations. In *Disillusioned: Victorian Photography and the Discerning Subject*, Jordan Bear tells the story of how photographic trickery in the 1850s and 1860s participated in the fashioning of the modern subject. By locating specific mechanisms of photographic deception employed by the leading mid-century photographers within this capacious culture of discernment, *Disillusioned* integrates some of the most striking and puzzling images of the Victorian period into a new and expansive interpretive framework. **The Visual Worlds of Life Writing** Kerstin Maria Pahl, 2025-01-04. An Open Access edition is available. *The Visual Worlds of Life Writing* brings into conversation the two most popular genres in long eighteenth-century
