The Browning High Power Automatic Pistol:

The Browning High-Power Pistol Leroy Thompson, 2020-04-30 Making its debut in 1935 the Browning High Power was the world's most widely used military pistol for much of the 20th century. Military and law enforcement agencies in more than 90 countries have issued the High Power and it has seen combat in conflicts from World War II through to the War on Terror. After conquering Belgium, Nazi Germany produced more than 300,000 High Powers for use by the Waffen SS Fallschirmjäger and others, and after 1945 the High Power became standard for most NATO armed forces as well as scores of others. Chambered for the 9.19mm Luger cartridge, John Browning's High Power improved on the classic Colt M1911 design, especially in its use of a far simpler takedown system. The pistol's innovative 13-round magazine, designed by Dieudonné Saive, staggered the cartridges for higher capacity without unduly increasing the grip size. During its 82-year production run at Fabrique Nationale FN in Belgium, the design evolved slightly, but a 2017 High Power was still easily recognizable as a descendant of the original model. Packed with gripping material, including detailed technical specifications, contemporary photographs, and highly accurate artist's renditions, this title is a comprehensive and informative guide to the world's most iconic semi-automatic pistol.

temporarily The need for efficient self defense shows no signs of lessening and the rise in shooting for sport particularly with the revolver has sharpened the quest for efficiency The never ending search for advanced production techniques shows that the handgun has as much a future in the twenty first century as it had in the heyday of the Wild West or in the trenches of Passchendaele
