The Bunce Michael De Larrabeiti,1980 Centerport David C. Clemens and Suzanne Johnson,2019 Once known as Little Cow Harbor the coastal community of Centerport on Long Island s north shore is rich in natural resources including a beautiful harbor with several freshwater streams surrounded by wooded hills Centerport was originally the site of several important mills but in the late 19th century it became a summer retreat for both the rich and the not so rich Youth camps most notably the Franciscan Brothers Camp Alvernia guesthouses and resorts as well as popular restaurants dotted the shoreline In the early 20th century large estates were established by the Vanderbilt Van Iderstine Burling Morse DeBrabant Whitney and Corbin families on the Little Neck peninsula As the 20th century progressed modest and generously sized houses replaced the small farms and many of the large estates The unspoiled natural beauty and rich history has for centuries drawn residents whose love of Centerport continue to make our village a great place to live **Classification of Nuclear C*-Algebras. Entropy in Operator Algebras** M. Rordam,E. Stormer,2013-04-18 to the Encyclopaedia Subseries on Operator Algebras and Non Commutative Geometry The theory of von Neumann algebras was initiated in a series of papers by Murray and von Neumann in the 1930 s and 1940 s A von Neumann algebra is a self adjoint unital subalgebra M of the algebra of bounded operators of a Hilbert space which is closed in the weak operator topology According to von Neumann s bicommutant theorem M is closed in the weak operator topology if and only if it is equal to the commutant of its commutant A factor is a von Neumann algebra with trivial centre and the work of Murray and von Neumann contained a reduction of all von Neumann algebras to factors and a classification of factors into types I II and III C algebras are self adjoint operator algebras on Hilbert space which are closed in the norm topology Their study was begun in the work of Gelfand and Naimark who showed that such algebras can be characterized abstractly as involutive Banach algebras satisfying an algebraic relation connecting the norm and the involution They also obtained the fundamental result that a commutative unital C algebra is isomorphic to the algebra of complex valued continuous functions on a compact space its spectrum Since then the subject of operator algebras has evolved into a huge mathematical endeavour interacting with almost every branch of mathematics and several areas of theoretical physics Annual Report of the Commissioner of Health of the Commonwealth of Pennsylvania Pennsylvania.
