Feltwell,1982 The literature is still one of our biggest frustrations to day There is in one sense too much of it and in another not enough for there are insufficient and inadequate published guidelines through this jungle Last year two excellent books for students of ecological chemistry were published one in France and one in England The concordance of the references was a mere overall 3% rising to 7% in the chapters on pheromones Even in the computer age the channel remains a formidable barrier to the rapid exchange of biological information At the present time we are in urgent need of compilations similar to John Feltwell s The Large White Butterfly since the literature has become virtually unmanageable This insect is now a demonstration object in the sixth form schoolroom an experimental rabbit in the University laboratory a test animal in virus and bacterial research projects a tool for the study of flight mechanisms migration plant biochemistry hormones genetics allergies pigments mimicry etc etc John Feltwell has by this massive compilation rendered us a great service in fact he has given us a present of 4 000 hours of library time spent in 50 different libraries in seven countries In the process he has collected 8000 references to the Large White Of these 4000 have been selected and we are given a brief indication of their contents **Monitoring Butterflies for Ecology and Conservation** E. Smoking Privileges Laura D. Hirshbein, 2015-01-31 Current public health literature suggests that the mentally ill may represent as much as half of the smokers in America In Smoking Privileges Laura D Hirshbein highlights the complex problem of mentally ill smokers placing it in the context of changes in psychiatry in the tobacco and pharmaceutical industries and in the experience of mental illness over the last century Hirshbein a medical historian and clinical psychiatrist first shows how cigarettes functioned in the old system of psychiatric care revealing that mental health providers long ago noted the important role of cigarettes within treatment settings and the strong attachment of many mentally ill individuals to their cigarettes Hirshbein also relates how as the sale of cigarettes dwindled the tobacco industry quietly researched alternative markets including those who smoked for psychological reasons ultimately discovering connections between mental states and smoking and the addictive properties of nicotine However Smoking Privileges warns that to see smoking among the mentally ill only in terms of addiction misses how this behavior fits into the broader context of their lives Cigarettes not only helped structure their relationships with other people but also have been important objects of attachment Indeed even after psychiatric hospitals belatedly instituted smoking bans in the late twentieth century smoking remained an integral part of life for many seriously ill patients with implications not only for public health but for the ongoing treatment of psychiatric disorders Making matters worse well meaning tobacco control policies have had the unintended consequence of further stigmatizing the mentally ill A groundbreaking look at a little known public health problem Smoking Privileges illuminates the intersection of smoking and mental illness and offers a new perspective on public policy regarding cigarettes
