

Vietnamese Calendar

- ▶ The Vietnamese calendar (*âm lịch*, 陰曆) is a lunisolar calendar largely based on the Chinese calendar
- ▶ Although the official calendar of Viet Nam since 1954 is the Gregorian calendar, the Vietnamese calendar is **still used** to celebrate major events like Tết Nguyên Đán (節元旦) and Tết Trung Thu (節中秋)
- ▶ Historically, Vietnamese dynasties like the Lê (李) and Nguyễn (阮) created their own calendars, with the Khâm Thự (欽授) calendar used until the 19th century. This calendar differed from the Chinese one, such as the use of a **cat** (mèo, mèo, 喵) **instead of a rabbit** in the Vietnamese zodiac

Additionally, a time zone change in Viet Nam in 1967 affected Tết celebrations, leading to different dates for Northern and Southern Viet Nam

The Calendrical Systems Of Mainland Southeast Asia:

The calendrical systems of mainland south-east Asia John Christopher Eade,1995 This Handbook makes a comprehensive examination of calendrical systems used in mainland Southeast Asia It is designed with numerous examples from the literature to provide a grammar of the subject that will enable scholars to investigate it for themselves The Calendrical Systems of Mainland South-East Asia Chris Eade,2018-12-24 This Handbook is the first to study comprehensively how the Southeast Asian calendar was constructed and how positions for the sun moon and planets were determined It examines the differences that distinguish Burma from Thailand Laos and Cambodia and those that distinguish Northern Thailand from the rest of that country Explanation of such matters as ways of naming the years differences between the types of lunar year variations in methods used to mark times of day constructing horoscopes determining calendar dates and many other technical matters are accompanied by worked examples from the literature The intention of the study is to provide an apparatus whereby scholars will be able to analyse confidently for themselves the dates and other calendrical information to be found in abundance in their sources **Ancient Indian Leaps into Mathematics** B.S. Yadav,Man Mohan,2011-01-20

This book presents contributions of mathematicians covering topics from ancient India placing them in the broader context of the history of mathematics Although the translations of some Sanskrit mathematical texts are available in the literature Indian contributions are rarely presented in major Western historical works Yet some of the well known and universally accepted discoveries from India including the concept of zero and the decimal representation of numbers have made lasting contributions to the foundation of modern mathematics Through a systematic approach this book examines these ancient mathematical ideas that were spread throughout India China the Islamic world and Western Europe *Old Muslim Calendars of Southeast Asia* Ian Proudfoot,2018-12-24 It has been said that a modern arrogance has blocked our access to the history of the Muslim calendar in Southeast Asia Without at least the outlines of that history we simply do not understand the basis of dates found in Malay sources Also without a history of Malay calendars we are denied an understanding of the context from which the Javanese Muslim calendar arose This volume the result of combining empirical evidence with a sound understanding of the structural requirements of calendar making and of the mechanisms through which these needs could be met for the first time explains how these old octaval calendars actually worked It traces the history of Muslim calendars in Southeast Asia and attempts to put them into their historical and cultural context Understanding the old calendars will at last throw light on a number of essential aspects of older Malay science and culture An accompanying interactive CD ROM presents the reader with a tool for converting Malay and Javanese dates with access to the range of variant calendars

Abia South and Southeast Asian Art and Archaeology Index Karel R. Van Kooij,2018-10-24 This volume is the first tangible result of an international project initiated by the International Institute for Asian Studies IIAS with the aim of compiling a bibliographic database documenting publications on South and Southeast Asian art and archaeology The

bibliographic information over 1 300 records extracted from the database forms the principal part of this publication It is preceded by a list of periodicals consulted and followed by three types of indexes which help users to find their way in the ABIA South and Southeast Asian Art and Archaeology Index ABIA Index The detailed bibliographic descriptions controlled keywords and many elucidating annotations make this reference work into an indispensable guide to recent scholarly work on the prehistory and arts of South Southeast Asia

W. Watson, R. F. Ellen, 1993-01-01 Witchcraft holds a perennial fascination for scholars and the public at large In Southeast Asia malign magic and sorcery are part of the routine experience of villagers and urban dwellers alike and stories appearing in the press from time to time bear witness to a persisting public concern The essays presented in this volume describe what people believe and what actions result from those beliefs Not surprisingly given the range and variety of cultures considerable differences exist in the region Among some cultures in Thailand and Indonesia for example sorcerers are said to possess spirits that empower them to cause illness and misfortune Elsewhere in Malaysia and Sumatra the power of the dukun derives from the accumulation of arcane knowledge and mystical practice Contributors describe the witches and sorcerers they have met and suggest both how their societies look upon them and how we in turn should regard them Understanding Witchcraft and Sorcery in Southeast Asia will appeal to scholars and students of social anthropology and comparative religion Its substantial contribution to theoretical and comparative issues in a Southeast Asian context provides a fresh perspective on a stimulating topic *The Mists of Rāmañña* Michael A. Aung-Thwin, 2017-04-01 Scholars have long accepted the belief that a Theravada Buddhist Mon kingdom R ma adesa flourished in coastal Lower Burma until it was conquered in 1057 by King Aniruddha of Pagan which then became in essence the new custodian and repository of Mon culture in the Upper Burmese interior This scenario which Aung Thwin calls the Mon Paradigm has circumscribed much of the scholarship on early Burma and significantly shaped the history of Southeast Asia for more than a century Now in a masterful reassessment of Burmese history Michael Aung Thwin reexamines the original contemporary accounts and sources without finding any evidence of an early Theravada Mon polity or a conquest by Aniruddha The paradigm he finds cannot be sustained How when and why did the Mon Paradigm emerge Aung Thwin meticulously traces the paradigm s creation to the merging of two temporally causally and contextually unrelated Mon and Burmese narratives which were later synthesized in English by colonial officials and scholars Thus there was no single originating source only a late and mistaken conflation of

sources The conceptual methodological and empirical ramifications of these findings are significant The prevalent view that state formation began in the maritime regions of Southeast Asia with trade and commerce rather than in the interior with agriculture must now be reassessed In addition a more rigorous look at the actual scope and impact of a romanticized Mon culture in the region is required Other issues important to the field of early Burma and Southeast Asian studies including the process of Indianization the characterization of classical states and the advent and spread of Theravada Buddhism are also directly affected by Aung Thwin s work Finally it provides a geo political cultural and economic alternative to what has become an ethnic interpretation of Burma s history An electronic version of this book is freely available thanks to the support of libraries working with Knowledge Unlatched a collaborative initiative designed to make high quality books open access for the public good The open access version of this book is licensed under Creative Commons Attribution NonCommercial NoDerivatives 4 0 International CC BY NC ND 4 0 which means that the work may be freely downloaded and shared for non commercial purposes provided credit is given to the author Derivative works and commercial uses require permission from the publisher

Astrology in Time and Place Nicholas Campion,Dorian Gieseler Greenbaum,2016-06-22 Astrology is the practice of relating the heavenly bodies to lives and events on earth and the tradition that has thus been generated Many cultures worldwide have practised it in some form In some it is rudimentary in others complex Culture and scholarship have categorised it as both belief and science as a form of magic divination or religious practice but in many ways it defies easy categorisation The chapters in this volume make a significant contribution to our understanding of astrology across a range of periods of cultures Based on papers presented at the annual conference of the Sophia Centre held in 2012 the contributions range from China and Japan through India the ancient Near East the classical world and early modern Europe to Madagascar and Mesoamerica The different topics include ritual and religion magic and science calendars and time and questions of textual transmission and methodology Astrology in Time and Place is essential reading for all interested in the history of humanity s relationship with the cosmos

A Companion to Global Historical Thought Prasenjit Duara,Viren

Murthy, Andrew Sartori, 2014-03-17 *A COMPANION TO GLOBAL HISTORICAL THOUGHT* A Companion to Global Historical Thought provides an overview of the development of historical thinking from the earliest times to the present directly addressing issues of historiography in a globalized context Questions concerning the global dissemination of historical writing and the relationship between historiography and other ways of representing the past have become important not only in the academic study of history but also in public arenas in many countries With contributions from leading international scholars the book considers the problem of the global in the multiplicity of traditions of narrating the past in the global dissemination of modern historical writing and of the global as a concept animating historical imaginations It explores the different intellectual approaches that have shaped the discipline of history and the challenges posed by modernity and globalization while illustrating the shifts in thinking about time and the emergence of historical thought Complementing A Companion to Western Historical Thought this book places non Western perspectives on historiography at the center of discussion helping scholars and students alike make sense of the discipline at the start of the twenty first century The Syntax of Colophons Nalini Balbir, Giovanni Ciotti, 2022-12-31 This volume is the first to attempt a comprehensive and cross disciplinary analysis of the manuscript cultures implementing the pothi manuscript form a loosely bound stack of oblong folios It is the indigenous form by which manuscripts have been crafted in South Asia and the cultural areas most influenced by it that is to say Central and South East Asia The volume focuses particularly on the colophons featured in such manuscripts presenting a series of essays enabling the reader to engage in a historical and comparative investigation of the links connecting the several manuscript cultures examined here Colophons as paratexts are situated at the intersection between texts and the artefacts that contain them and offer a unique vantage point to attain global appreciation of their manuscript cultures and literary traditions Colophons are also the product of scribal activities that have moved across regions and epochs alongside the pothi form providing a common thread binding together the many millions of pothis still today found in libraries in Asia and the world over These contributions provide a systematic approach to the internal structure of colophons i e their syntax and facilitate a vital comparative approach Confronting Christianity Sven Trakulhun, 2024-07-31 Confronting Christianity explores the history of religious encounters between Christian missionaries and Thai Buddhists during the nineteenth century a period of Western imperialism in Southeast Asia that fundamentally transformed Siamese society and religious institutions From about 1830 onward discussions on religion became a central arena of conflict between rival regimes of knowledge in Thailand confronting traditional Buddhist views on nature and man s existence with the ideals and practices of science and rationalism coming from the West Protestant missionaries mostly from the United States became important brokers of knowledge as one of their strengths was the ability to offer religion in tandem with modern science and technology Historian Sven Trakulhun explains why the intrusion of evangelical Christianity strengthened the position of Theravada Buddhism rather than undermining people s belief in traditional forms of worship

Based on a wide range of Thai and Western primary sources the volume describes how Christian missionaries unwittingly contributed to the making of what scholars of Buddhism have later rendered as Buddhist modernism In response to Christian assaults on the traditional cosmology Buddhist reformers fashioned an orthodox version of Buddhism that acknowledged the findings of modern science and at the same time deemed even more rational than Christianity This new orthodoxy became a major source of moral authority for Thai kings and an important ideology for pushing their claims for religious leadership in the Therav da Buddhist world Trakulhun offers a thorough study of the encounter between Christianity and Buddhism and places the history of Siamese Therav da Buddhism within the broad context of global intellectual history

The Maritime Frontier of Burma ,2022-08-01 Situated at the periphery of both South and Southeast Asia the maritime frontier of Burma Arakan Lower Burma and Tenasserim has long been neglected area of study In spite of its location at the outskirts of powerful Asian polities such as Taungngu Burma Ayutthaya and Mughal India it served as an important cultural and commercial crossroads connecting all the regions surrounding the Bay of Bengal For the first time in Burmese studies this volume explores the interactive elements of Coastal Burma s civilization by bringing together a unique array of scholars both historians and art historians both anglophones and francophones both South Asianists and Southeast Asianists The result is a creative and colorful pastiche that pays tribute to Burma s distinctive political cultural and commercial place in the Indian Ocean world
