Higher Neal Bascomb, 2004-09-21 The Roaring Twenties in New York was a time of exuberant ambition free flowing optimism an explosion of artistic expression in the age of Prohibition New York was the city that embodied the spirit and strength of a newly powerful America In 1924 in the vibrant heart of Manhattan a fierce rivalry was born Two architects William Van Alen and Craig Severance former friends and successful partners but now bitter adversaries set out to imprint their individual marks on the greatest canvas in the world the rapidly evolving skyline of New York City Each man desired to build the city s tallest building or skyscraper Each would stop at nothing to outdo his rival Van Alen was

a creative genius who envisioned a bold contemporary building that would move beyond the tired architecture of the previous century. By a stroke of good fortune he found a larger than life patron in automobile magnate Walter Chrysler and they set out to build the legendary Chrysler building. Severance by comparison was a brilliant businessman and he tapped his circle of downtown old money investors to begin construction on the Manhattan Company Building at 40 Wall Street. From ground breaking to bricklaying Van Alen and Severance fought a cunning duel of wills. Each man was forced to revamp his architectural design in an attempt to push higher to overcome his rival in mid construction as the structures rose floor by floor in record time. Yet just as the battle was underway a third party entered the arena and announced plans to build an even larger building. This project would be overseen by one of Chrysler's principal rivals a representative of the General Motors group and the building ultimately became known as The Empire State Building. Infused with narrative thrills and perfectly rendered historical and engineering detail Higher brings to life a sensational episode in American history. Author Neal Bascomb interweaves characters such as Al Smith and Governor Franklin Delano Roosevelt leading up to an astonishing climax that illustrates one of the most ingenious and secret architectural achievements of all time. *Skilled Hands, Strong Spirits* Grace Palladino, 2018-09-05 *Skilled Hands Strong Spirits* follows the history of the Building and Construction Trades Department from the emergence of building trades councils in the age of the skyscraper through treacherous fights over jurisdiction as new building materials and methods of work evolved and through numerous Department campaigns to improve safety standards work with contractors to promote unionized construction and forge a sense of industrial unity among its fifteen and at times nineteen autonomous and highly diverse affiliates. Arranged chronologically *Skilled Hands Strong Spirits* is based on archival research in Department AFL CIO and U S government records as well as numerous union journals the local and national press and interviews with former Department officers. Grace Palladino makes the history of the building trades come alive. By investigating the sources of conflict and unity within the Building and Construction Trades Department over time and demonstrating how building trades unions dealt with problems and opportunities in the past she provides a historical context for the current generation of workers and leaders as they devise new strategies to suit their current situation. exlibris Giovanni Corbellini, 2022-05-18 Architects write a lot especially now when conceptual aspects have become central in the advanced reflections and narrative forms increasingly intersect the quest of design practices far an ultimate legitimation. The Black Skyscraper Adrienne Brown, 2017-11-15 How did writers and artists view the intersection of architecture and race in the modernist era Winner of the MSA First Book Prize of the Modernist Studies Association With the development of the first skyscrapers in the 1880s urban built environments could expand vertically as well as horizontally Tall buildings emerged in growing cities to house and manage the large and racially diverse populations of migrants and immigrants flocking to their centers following Reconstruction Beginning with Chicago's early 10 story towers and concluding with the 1931 erection of the 102 story Empire State Building Adrienne Brown's The Black Skyscraper provides a detailed account of how scale and proximity shape our understanding of race Over the next half century as city skylines grew

American writers imagined the new urban backdrop as an obstacle to racial differentiation Examining works produced by writers painters architects and laborers who grappled with the early skyscraper s outsized and disorienting dimensions Brown explores this architecture s effects on how race was seen read and sensed at the turn of the twentieth century In lesser known works of apocalyptic science fiction light romance and Jazz Age melodrama as well as in more canonical works by W E B Du Bois F Scott Fitzgerald Aaron Douglas and Nella Larsen the skyscraper mediates the process of seeing and being seen as a racialized subject From its distancing apex reducing bodies to specks to the shadowy mega blocks it formed at street level the skyscraper called attention Brown argues to the malleable nature of perception A highly interdisciplinary work *The Black Skyscraper* reclaims the influence of race on modern architectural design as well as the less well understood effects these designs had on the experience and perception of race
