According to the Centers for Disease Control and Prevention Americans aged 65 and over comprise 15 percent of the population but account for nearly 40 percent of ambulance transports

This is not surprising given that older adults experience more chronic conditions multiple diseases and polypharmacy issues than the rest of the population

Yet despite EMS practitioners experience in the field research shows that geriatric trauma patients are often undertriaged to trauma centers

High quality geriatric specific education can make a difference

With the right text EMS practitioners can gain a deeper understanding of how the body ages how multiple medications can create or exacerbate emergencies how certain communication techniques can improve assessments and more
