*Sleeping with Cats* Marge Piercy, 1986      **Let Sleeping Cats Lie - Pet Poems** Brian Bilston, 2024-09-26 A hilarious collection of pet poems by wordplay wizard Brian Bilston When you've got a bad case of the mews and are in desperate need of a pup lifting read this book is the ultimate mutt remedy The perfect gift for a dog person cat person and every pet lover in between Please don't think me lazy I'm not trying to slack it's just that I'm stuck you see under this cat *Let Sleeping Cats Lie* is a collection of poems following the funny lives of our furry and not so furry friends Stars include Wilf the hypnotist Labracadabrador a philosophically inclined goldfish penning a profound haiku a hen named Barbara receiving an adoring tribute and an octopussy cat that seems to have all its paws in plenty of odd little pies      *Logic For Dummies* Mark Zegarelli, 2025-10-06 An accessible resource to help you puzzle out logic concepts *Logic For Dummies* 2nd Edition explains all the varied ways we use logic in philosophy science and everyday life College students taking a logic course and lifelong learners alike can benefit from this accessible guide to logic concepts such as syllogisms constructing proofs and refutations propositional and predicate logic symbolic logic modal and fuzzy logic deductive and inductive reasoning and beyond With real world examples fun logic problems and fully worked out proofs you have plenty of opportunities to follow along and apply what you've learned *Logic For Dummies* 2nd Edition helps you connect the logical dots Inside Grasp formal and informal logic with clear explanations and practice problems See how logic shows up in everyday life and discover how to spot logical fallacies Work through logical proofs and refutations with answer explanations to strengthen your understanding Sharpen your ability to reason through complex issues with truth tables *Logic For Dummies* 2nd Edition is the logical choice for anyone who wants or needs to learn the concepts theories and formulas of logical reasoning      *Systemic Homeostasis and Poikilostasis in Sleep* Pier Luigi Parmeggiani, 2011 This book aims at presenting biologists and clinicians with a compact description of the physiological manifestations of sleep that are significant from the viewpoint of the principle of homeostasis In the jargon of the physiological literature the word homeostasis introduced by W B Cannon 1926 refers to the existence of a constant state of extracellular body fluids with regard to their physical and chemical properties Since normal cell function depends on the constancy of such fluids in multicellular animals there are many regulatory mechanisms under the control of the central nervous system that act to maintain the constancy of the internal environment The experimental study of homeostasis in wakefulness already revealed the nature and complexity of the underlying physiological mechanisms Many of these regulatory mechanisms trigger compensatory changes according to the principle of negative feedback In contrast the control of homeostasis across sleep states is still an issue under debate concerning its physiological persistence and significance The author's aim is to find the specific mechanistic proofs of the actual consistency or inconsistency of the principle in different states of sleep In this respect there are several interacting physiological functions that ought to be examined across the sleep states The selection of the most significant experimental data is carried out with a view to present

a simple but not simplistic approach to the issue The book brings forth the evidence that the systemic homeostatic regulation of many physiological variables underlying cellular life is not active in a particular state of the ultradian sleep cycle in mammals It also shows the theoretical and functional importance of the principle of homeostasis as a criterion of the systemic characterisation of the integrative control of physiological functions by the central nervous system during sleep in mammals

**Current Research on Sleep and Dreams** United States. Public Health Service, Gay Gaer Luce, 1966 This monograph was stimulated by the extraordinary growth now apparent in an area generally identified as sleep and dream research for this recent concentration of scientific effort offers a singular example of the power that basic research can exert in penetrating the problems of mental health and illness In the past year alone the National Institute of Mental Health supported over 60 projects related in whole or in part to studies of sleep and dreams with awards totaling over 2 million The work of many of these NIMH investigators is included in this summary which extends beyond the Institute's program insofar as necessary to indicate the major trends of work in the area The report cannot of course encompass the classical studies already summarized in published literature nor even provide comprehensive survey of present day sleep research for although much of the scientific data on sleep have been generated during the last dozen years significant references in this field now number in the many thousands The mosaic of disciplines contributing to the study of sleep contains such diverse fields as psychiatry and mathematics psychology and biochemistry physiology and anthropology Nevertheless ferment about the subject matter and a spirit of cooperation across traditional disciplinary lines have made it possible to knit together data

that might otherwise have lain unrelated in a variety of laboratories During the past year individual summaries of many of the projects cited here were distributed to scientists working in the field of sleep and dreams Many of the recipients felt that up to date reports especially in a field of such dynamic activity represented a unique solution to the problem of scientific information exchange Such communication it was felt provided a quick look at work in progress that might prevent duplication of effort and stimulate pertinent contacts among scientists thus aiding them in their work It is hoped that this monograph will be a further part of that process Foreword **Current Research on Sleep and Dreams** Gay Gaer Luce,1965
