Sleuthing The Divine The Nexus Of Science And Spirit:

Sleuthing the Divine Kevin J. Sharpe, 2000 Well versed in and appreciative of the latest developments in physics and cosmology biology and neuroscience Sharpe provides fascinating accounts of how contemporary knowledge expands stodgy notions of reality He also queries the new scientific gurus for the substance and religious pertinence of their visions

Transpersonal Ecosophy, Vol. 1: Theory, Methods and Clinical Assessments Mark A. Schroll, 2016-01-24 The image on the cover of this book represents the idea that brain state alterations at sacred sites allow us to re experience memories that are woven into the morphogenetic fields of that place an idea that originates with Paul Devereux s empirical enquiry into dreams at sacred sites in Wales and England This books examines how this investigation provides us with a new way of understanding consciousness and a new direction toward a reconciliation of the divorce between matter and spirit We explore the work of David Lukoff and Stanislav and Christina Grof the connections between the varieties of transformative experience in dream studies ecopsychology transpersonal psychology and the anthropology of consciousness as well as the overlap between David Bohm s interpretation of quantum theory and Rupert Sheldrake s hypothesis of formative causation

The Cosmic Breath Amos Yong, 2012-05-10 Recent thinking in the interfaith dialogue and in the theology science dialogue have taken a pneumatological turn The Cosmic Breath explores this pneumatological theology as unfolded in the Christian Buddhist dialogue alongside critical interaction with the theology and science conversation As an attempt in comparative and constructive Christian philosophical theology its central thesis is that a pneumatological approach to Buddhist traditions in further dialogue with modern science generates new philosophical resources that invigorate Christian thinking about the natural world and humanity s place in it The result is a transformation of the Buddhist Christian dialogue from insights generated in the theology and science interface and a contribution to the religion and science dialogue from a comparative theological and philosophical perspective *The Oxford Handbook of Religion and Science* Philip Clayton, Zachary

Simpson, 2006 The field of science and religion is exploding in popularity among both academics and the reading public This is a comprehensive and authoritative introduction to the debate written by the leading experts yet accessible to the general reader **Has Science Displaced the Soul?** Kevin Sharpe, Rebecca Bryant Bryant, 2005-04-29 Can science explain powerful human emotions such as love and happiness Or are these emotions something more than the action of biochemicals and electrical impulses Science is constantly uncovering the mysteries of our nature but we are uneasy about submitting our most intimate feelings to its scrutiny Religion tells us that God is love but neuroscience counters with love as a well timed trickle of transmitters and hormones In the 21st century is it necessary to discard our traditional beliefs of a loving God in favor of dopamine With doctorates in both mathematics and theology Kevin Sharpe explores these notions and asks the question Has Science Displaced the Soul Unflinching in facing these issues Sharpe provides a clear and current summary of the discoveries of science and what our spiritual traditions still have to offer in the ongoing effort to understand our deepest

urges He confronts serious unanswered questions How can the Divine direct a random process like evolution How can we reconcile the big bang with creation out of nothing Does it make sense to claim that the non biological Divine shares in human purposes and desires Sharpe s solution is controversial since it requires that we demolish and reconstruct some of our most trusted conceptions By examining the ways in which scientific and religious claims can be harmonized he offers a radical and powerful interpretation of love and happiness in the divine context

Entertaining the Triune Mystery

Jeffrey C. Pugh,2003-10-01 Drawing on one of Christianity s great mysteries the life of the Trinity Jeffrey Pugh seeks to bridge the gap between ancient faith traditions and scientific inquiry in part by celebrating that gap itself as God s essence Pugh uses the wisdom of Plato Irenaeus the Cappadocians Einstein and many others to prompt us to think of God s energies within the processes of creation and life as the presence of God s suffering love for the cosmos God not only nourishes the possibilities of the creation but is fully present in them both suffering with and extending hope for a world coming to be BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Science of God

Kevin J. Sharpe,2006 Is theology responsible to tradition or new insight Institutional church or humanity at large Spiritual or everyday existence Revelation or scientific findings In his new book Science of God Truth in the Age of Science Kevin Sharpe proposes a method for doing theology which does not divorce it from the practical applications of science Not only does this work establish that theology ought to be empirical in what it says about the world and God s relationship to it but it also outlines a clear method for doing this Science and theology can each share the same empirical method when each attempts a description of any part of reality it is relying on its own essential assumptions or lens When applied to theology the method assumes the existence of God and then seeks the nature of God using falsifiable and verifiable techniques Starting with the sciences that examine happiness particularly biology genetics psychology and social psychology Science of God seeks to understand the spiritual nature of humans and through it the nature of God

Amos Yong,2020-05-12 Amos Yong is the most prolific pentecostal theologian to date and his published works are so many that it is difficult to find an amiable entry point into his thought An Amos Yong Reader is the first introduction to Yong s theology in his own words It brings into one volume representative samples of the broad range of Yong s scholarship including theology of religions religion and science theology and disability political theology Luke Acts and theological method Christopher A Stephenson perhaps Yong s most insightful interpreter provides an introductory essay that both orients readers to Yong s extensive theological program and identifies

Becoming Divine M. David Litwa,2013-10-30 Some have called it the essence of sin others the depth of salvation Regardless of one's evaluation of it however deification throughout Western history has been a part of human aspiration From the ancient pharaohs to modern transhumanists people have envisioned their own divinity These visionaries include not only history's greatest megalomaniacs but also mystics sages apostles prophets magicians bishops philosophers atheists and monks Some aimed for independent deity others realized their eternal union with God Some anticipated godhood in heaven others walked as gods on earth Some accepted divinity by grace others achieved it by their own will to power There is no single form of deification indeed deification is as manifold as the human conception of God but the many types are united by a set of interlocking themes achieving immortality wielding superhuman power being filled with supernatural knowledge or love and through these means transcending normal human or at least earthly nature **The Spirit Poured Out on All**
