Slingshot Warbirds:

Slingshot Warbirds William Neufeld, 2003-02-10 A unique and little known chapter in World War II naval aviation history concerns the exploits of the scout observation pilots who flew from the battleships and cruisers of the U S Navy To carry out their missions they were launched from their ships by catapult On returning their float equipped aircraft landed on the water and the plane and crew were crane hoisted aboard the vessel In compiling this work the author culled from the naval archives many of the ships action reports and war diaries that detail the accounts of these airmen In addition he meticulously edited the personal records of 27 veteran airmen who related stories of intense and excruciatingly difficult missions Air Force Magazine ,2003 Air Force and Space Digest ,2003 *The One Ship Fleet* Phillip T. Parkerson, 2023-04-20 If the doings of the U S Navy in World War II are of any interest to you the book is worth a read PowerShips The Brooklyn class light cruiser USS Boise CL 47 was one of the most famous US combat ships of World War II already internationally renowned following her participation in the naval battles in the Solomons in 1942 After repairs and modifications in 1943 the Boise was sent to the Mediterranean theater there to participate in the invasions of Sicily Taranto and Salerno and enhancing her fame by destroying enemy tanks during armored counterattacks in both Sicily and Salerno From the Mediterranean Boise was sent to the Southwest Pacific theater to join the US 7th Fleet for the campaign in New Guinea in 1943 44 and then the invasion of the Philippines She fought in the battle of Leyte Gulf notably in the night engagement in the Surigao Strait where battleships faced off against each other for the last time in maritime history Boise was credited with helping to sink a Japanese battleship She also fought off the suicide planes known as kamikazes at Leyte and later at Lingayen Gulf during the invasion of Luzon MacArthur used her as his flagship for the Luzon attack thereby adding to her already considerable fame then after helping retake Corregidor and other islands in the Philippines Boise carried the general on a triumphant tour of the islands This tour was interrupted for the invasion of Borneo but completed when the beach was secured After MacArthur left the ship in June 1945 she returned to the US for overhaul which was just complete as the war ended by which time she had been awarded 11 battle stars more than any other light cruiser in her class This full account of USS Boise s war not only gives us an insight into how one ship navigated a global conflict but also an insight into the experiences of the men who served on her and a new perspective on the naval campaigns of the war *Catapult Aircraft* Leo Marriott, 2020-01-24 A concise history of this specialty aircraft used during World Wars I and II During World War I the navies of the opposing forces discovered the value of aerial reconnaissance and many experiments were made to allow larger warships to carry one or sometimes two aircraft aboard In the early days these were float planes that were lowered by crane into the sea and then lifted back aboard upon their return This was a lengthy affair and when a speedy departure was necessary time was of the essence A new system was devised so that a powerful catapult system and a short ramp could with the added speed of the ship get an aircraft airborne in a fraction of the time previously required Thus was born a highly specialised type of aircraft This book includes all the

major designs that went to war in the First and Second World Wars and includes aircraft used by all the combatants It looks at how the aircraft evolved and how the warships were modified to accommodate the aircraft and the catapult system The use of these fixed wing aircraft was abandoned when the invention of the helicopter was made in the early post WWII years

Noppen,2014-08-20 The development of the US Navy s dreadnought battleships was a pivotal part of America s evolution into a true world power By the beginning of World War I the United States possessed the world s third largest navy with ten dreadnoughts in service and four more under construction By the end of World War II the US Navy was the undoubted global superpower despite initial crippling losses to its battlefleet at Pearl Harbor Richly illustrated with archive photographs as well as a full cutaway of the world s only surviving dreadnought this comprehensive and detailed title covers the technical characteristics and combat record of the US dreadnoughts throughout their long careers

Soldiers' Pay and War Birds: Diary of an Unknown Aviator William Faulkner,John McGavock Grider,2022-09-26 Examining the reality of First World War aviators this volume features William Faulkner s astonishing first novel Soldiers Pay alongside the diary of an unknown veteran who died in action William Faulkner s Soldiers

Pay was first published in 1926 and explores the life of a severely wounded aviator when he returns from war to his small hometown. The seminal novel presents the struggles of many soldiers following the First World War and gives insight into the men's physical and psychological trauma. Accompanying Faulkner's masterpiece is the diary of an American WWI aviator. The diary's author served alongside the aviator in battle and published the text in honour of his comrade John MacGavock. Grider is commonly thought to be the diarist with his memoirs being edited and published in 1926 by his friend and fellow aviator Elliot White Springs. Detailing his life in battle from 20th September 1917 to late August 1918, Grider describes his flying experience and provides glimpses into a soldier's off-duty life. This new edition of *Soldiers Pay and War Birds: Diary of an Unknown Aviator* is complete with two introductory poems by Thomas Hardy and Wilfred Owen. A remarkable volume not to be missed by those interested in the First World War and American history. *The British National Bibliography* Arthur James Wells, 2003
