web what is a vector in math a1 we can define a vector as an object that has both a direction and a magnitude geometrically we can represent a vector as a directed line segment whose length is the magnitude of the vector and with an arrow indicating the direction moreover two examples of vectors are those that characterize force and velocity

web the generalization of the number zero to vector algebra is called the null vector denoted by  $\vec{0}$  all components of the null vector are zero  $0\vec{i} + 0\vec{j} + 0\vec{k}$  so the null vector has no length and no direction two vectors a and b are equal vectors if and only if their difference is the null vector
