Proceedings of the Spanish Relativity Meeting*, Alberto Lobo, 2003. *Cosmological Relativity*, Moshe Carmeli, 2006. In this chapter, cosmological special relativity is extended to five dimensions by adding time to the three spatial dimensions and the velocity of the Hubble expansion. As a consequence of this extension, equations of electrodynamics are considered through the extended skew symmetric tensor in which a new field is included along with the electric and magnetic fields. This new field is due to the Higgs interaction associated with the expansion of the Universe. It is unified with the electromagnetic interaction in the frame of cosmology. The field equations are developed in five dimensions. In addition to the well known Maxwell equations, new equations that describe the mix up of different fields are obtained. Publisher's website.
