G. Widdowson, 2008-04-15 Written by a leading researcher in the field this fascinating examination of the relations between grammar text and discourse is designed to provoke critical discussion on key issues in discourse analysis which are not always clearly identified and examined Written by a leading researcher in the field Continues the enquiry into discourse analysis that Zellig Harris initiated 50 years ago which raised a number of problematic issues that have remained unresolved ever since Introduces the notion of pretext as an additional factor in the general interpretative process Focuses attention specifically on the work of critical discourse analysis CDA in light of the issues discussed Society and Discourse Teun A. van Dijk, 2009-01-22 The theory is applied to the domain of politics including the debate about the war in Iraq where political leaders speeches serve as a case study for detailed contextual analysis **BOOK JACKET** **Text, Time, and Context** Richard P. Meier, Helen Aristar-Dry, Emilie Destruel, 2009-10-20 Carlota S Smith was a key figure in linguistic research and a pioneering woman in generative linguistics This selection of papers focuses on the research into tense aspect and discourse that Smith completed while Professor of Linguistics at the University of Texas at Austin Smith s early work in English syntax is still cited today and her early career also yielded key research on language acquisition by young children Starting in the mid 1970s after her move to UT she embarked on her most important line of research In numerous papers the first of which was published in 1975 and in a very important 1991 book The Parameter of Aspect Smith analyzed how languages encode time and how they encode the ways events and situations occur over time Smith s work on the expression of time in language is notable because of its careful analyses of a number of quite different languages including not only English and French but also Russian Mandarin and Navajo Inspired by a year in France in the early 1970s Smith began to analyze the differing ways in which languages encode time and how they encode the ways events and situations occur over time In doing so she developed her signature two component theory of aspect This model of temporal aspect provided an excellent framework for graduate students seeking to analyze the temporal systems of an array of languages including under described languages that are so much the focus of research in UT s Linguistics Department Selected by Carlota Smith herself and by her longtime friends and colleagues this book contains her 1980 piece on temporal structures in discourse her 1986 comparison of the English and French aspectual systems a 1996 paper on the aspect system in Navajo an increasingly endangered language which Smith worked to preserve and her 1980 and 1993 papers on the child s acquisition of tense and aspect Smith who died in 2007 was a trailblazer in her field whose broad interests fed into her scholarly research She was an avid reader who sought to bring the analytic tools of linguistics to the humanistic study of literature by examining the syntactic and pragmatic principles which underlie literary effects Her research on rhetorical and temporal effects in context was integrated into her
