Skills In The Junior School:

Skills in the Junior School Beryl Ash, Barbara Rapaport, 1960

Noncognitive Skills and Their Influencing Factors for Children Jinyan Zhou, 2021-12-19 Non cognitive skills are often used to refer to those skills that do not fall within the cognitive category but to describe a stable pattern of thought feeling and behavior in different situations and backgrounds with profitable and investable characteristics such as conscientiousness perseverance and teamwork which are critically important in education However for many years non cognitive skills have always been ignored in human capital theory The book using a multidisciplinary approach tries to uncover the noncognitive components of human capital so as to answer the question what is the skill that should be invested in The author expands the connotations of human capital by exploring the value of noncognitive skills and their production patterns constructing a measurement framework and a set of tools to measure noncognitive skills She especially carries out an empirical survey which covers primary and secondary school students from seven provinces of China s east middle and west areas With the data collected she analyzes Chinese students noncognitive development and further identifies the critical factors that may impact their noncognitive skills by applying the Bayesian Model Average approach The book will be a theoretical contribution to education economics Researchers interested in education in China children s development and policymakers in the field of education will find this book helpful and resourceful
