A Body Worth Defending Ed Cohen, 2009-10-16 A science studies text that reveals the legal and political origins of the concept of immunity

Pantheologies Mary-Jane Rubenstein, 2018-11-06 Pantheism is the idea that God and the world are identical that the creator sustainer destroyer and transformer of all things is the universe itself From a monotheistic perspective this notion is irremediably heretical since it suggests divinity might be material mutable and multiple Since the excommunication of Baruch Spinoza Western thought has therefore demonized what it calls pantheism accusing it of incoherence absurdity and with striking regularity monstrosity In this book Mary Jane Rubenstein investigates this perennial repugnance through a conceptual genealogy of pantheisms What makes pantheism monstrous at once repellent and seductive is that it scrambles the raced and gendered distinctions that Western philosophy and theology insist on drawing between activity and passivity spirit and matter animacy and inanimacy and creator and created By rejecting the

fundamental difference between God and world pantheism threatens all the other oppositions that stem from it light versus darkness male versus female and humans versus every other organism If the panic over pantheism has to do with a fear of crossed boundaries and demolished hierarchies then the question becomes what a present day pantheism might disrupt and what it might reconfigure Cobbling together heterogeneous sources medieval heresies their pre and anti Socratic forebears general relativity quantum mechanics nonlinear biologies multiverse and indigenous cosmologies ecofeminism animal and vegetal studies and new and old materialisms Rubenstein assembles possible pluralist pantheisms By mobilizing this monstrous mixture of unintentional God worlds Pantheologies gives an old heresy the chance to renew our thinking

Grounding God Arianne Conty, 2023-12-01 Now that we have entered the Anthropocene the geological age in which humans have altered the natural world to such an extent that nature and culture can no longer be separated the modern dichotomies of mind versus body and culture versus nature have become implausible and need to be replaced In Grounding

God Arianne Conty argues that it is in the field of religion where we can find a new ontology better suited for the Anthropocene Conty calls this new religious ontology the grounding of the sacred in that it seeks to deconstruct the binaries of modernity and provide in their place a revalorization of the immanent earth and the more than human beings that inhabit it Such a grounding of the sacred is a potent means to overcome the exploitation and desecration of the earth and its nonhuman beings and to provide in its stead an inclusive cosmopolitics that extends mind into matter and culture into nature Tracing such a grounding in the Christian Buddhist neopagan and animist traditions Conty seeks to elaborate an interdisciplinary ecosophy one that uses philosophy anthropology and religious studies to provide new values for the present age Cambridge Introductions to Philosophy and Biology: Biology, Religion, and Philosophy Peterson, Michael L.,

Symbiotic Planet Lynn Margulis, 2008-08-05 Although Charles Darwin's theory of evolution laid the foundations of modern biology it did not tell the whole story Most remarkably *The Origin of Species* said very little about all things the origins of species Darwin and his modern successors have shown very convincingly how inherited variations are naturally selected but they leave unanswered how variant organisms come to be in the first place In *Symbiotic Planet* renowned scientist Lynn Margulis shows that symbiosis which simply means members of different species living in physical contact with each other is crucial to the origins of evolutionary novelty Ranging from bacteria the smallest kinds of life to the largest the living Earth itself Margulis explains the symbiotic origins of many of evolution's most important innovations The very cells we're made of started as symbiotic unions of different kinds of bacteria Sex and its inevitable corollary death arose when failed attempts at cannibalism resulted in seasonally repeated mergers of some of our tiniest ancestors Dry land became forested only after symbioses of algae and fungi evolved into plants Since all living things are bathed by the same waters and atmosphere all the inhabitants of Earth belong to a symbiotic union Gaia the finely tuned largest ecosystem of the Earth's surface is just symbiosis as seen from space Along the way Margulis describes her initiation into the world of science and the early steps in the present revolution in evolutionary biology the importance of species classification for how we think about the living world and the way academic apartheid can block scientific advancement Written with enthusiasm and authority this is a book that could change the way you view our living Earth **For Time and Forever** Dr. Henry M.

Morris, 2005-02-01 Is all life a result of random processes We plan our lives and daily routines but is there a plan Does someone manage individual lives and the order of the universe The answer for people of faith of course is that God controls all things The logical conclusion of that belief is that He also has a plan for each individual and a plan for Earth itself Man was created to have dominion over the planet to care for it and its creatures In *For Time and Forever* Bible authority Henry Morris explores the breadth of what it means to have purpose in God's creation Besides debunking evolutionary myths Dr Morris also answers the cry of man where do I fit Does God have a purpose for me Morris recognizes that since our time is short in terms of life span we must all work to fulfill the Great Commission we must recognize the biblical truth that there is

an overall plan of salvation and we must work to implement it Answering age old questions like Why do bad things happen and Is there a heaven and a hell Morris provides a framework for laymen and scholars alike to see their true purposes

Projective Ecologies Chris Reed, 2014-07-01 The past two decades have witnessed a resurgence of ecological ideas and ecological thinking in discussions of urbanism society culture and design The field of ecology has moved from classical determinism and a reductionist Newtonian concern with stability certainty and order in favor of more contemporary understandings of dynamic systemic change and the related phenomena of adaptability resilience and flexibility But ecology is not simply a project of the natural sciences Researchers theorists social commentators and designers have all used ecology as a broader idea or metaphor for a set of conditions and relationships with political economic and social implications Projective Ecologies takes stock of the diversity of contemporary ecological research and theory embracing Felix Guattari's broader definition of ecology as at once environmental social and existential and speculates on potential paths forward for design practices Where are ecological thinking and theory now What do current trajectories of research suggest for future practice How can advances in ecological research and modeling in social theory and in digital visualization inform with greater rigor more robust design thinking and practice New original essays by Peter Del Tredici Erle Ellis Christopher Hight Sanford Kwinter Sean Lally Nina Marie Lister Chris Reed Jane Wolff Reprinted excerpted essays by Robert Cook David Fletcher Richard T T Forman C S Holling With drawings by Gross MAX James Corner Field Operations Sean Lally Anuradha Mathur and Dilip DaCunha OMA Stoss Landscape Urbanism West 8 *Counterculture Green* Andrew G. Kirk, 2007-11-19 For those who eagerly awaited its periodic appearance it was more than a publication it was a way of life The Whole Earth Catalog billed itself as Access to Tools and it grew from a Bay Area blip to a national phenomenon catering to hippies do it yourselfers and anyone interested in self sufficiency independent of mainstream America In recovering the history of the Catalog's unique brand of environmentalism Andrew Kirk recounts how San Francisco's Stewart Brand and his counterculture cohorts in the Point Foundation promoted a philosophy of pragmatic environmentalism that celebrated technological achievement human ingenuity and sustainable living By piecing together the social cultural material environmental and technological history of that philosophy's incarnation in the Catalog Kirk reveals the driving forces behind it tells the story of the appropriate technology movement it espoused and assesses its fate This book takes a fresh look at the many individuals and organizations who worked in the 1950s 1960s and 1970s to construct this philosophy of pragmatic environmentalism At a time when many of these ideas were seen as heretical to a predominantly wilderness based movement Whole Earth became a critical forum for environmental alternatives and a model for how complicated ecological ideas could be presented in a hopeful and even humorous way It also enabled later environmental advocates like Al Gore to explain our current inconvenient truth and the actions of Brand's Point Foundation demonstrated that the epistemology of Whole Earth could be put into action in meaningful ways that might foster an environmental optimism distinctly different from the

jeremiads that became the stock in trade of American environmentalism Kirk shows us that Whole Earth was more than a mere counterculture fad In an era of political protest it suggested that staying home and modifying your toilet or installing a solar collector could make a more significant contribution than taking to the streets to shout down establishment misdeeds Given its visible legacy in the current views of Al Gore and others the subtle environmental heresies of Whole Earth continue to resonate today which makes Kirk's lucid and lively tale an extremely timely one as well

Science and Spirituality Michael Ruse, 2010-03-08 Introduction The world as an organism The world as a machine Organisms as machines Thinking machines Unasked questions unsolved problems Organicism God Morality souls eternity mystery *Chinese Medicine in East Africa* Elisabeth Hsu, 2022-07-08 Based on fieldwork conducted between 2001-2008 in urban East Africa this book explores who the patients practitioners and paraprofessionals doing Chinese medicine were in this early period of renewed China Africa relations Rather than taking recourse to the placebo effect the author explains through the spatialities and materialities of the medical procedures provided why apart from purchasing the Chinese antimalarial called Artemisinin locals would try out their alternatively modern formulas for treating a wide range of post colonial disorders and seek their sexual enhancement medicines

Engendering Rationalities Nancy Tuana, Sandra Morgen, 2001-09-27 Cutting edge feminist investigations of rationality **Utopia Matters** Marinela Freitas, 2005 Participatory Practice in Space, Place, and Service Design Kelly L. Anderson, Graham Cairns, 2022-10-18 Participatory Practice in Space Place and Service Design is premised on a belief in the importance of participatory practices in finding creative solutions to the plethora of problems we face today It argues that engaging professions with the public in mutual exploration analysis and creative thinking is essential It not only ensures better quality products places services and a greater sense of civic agency but also facilitates fuller access to them and the life opportunities they can unleash This book offers a uniquely varied perspective of the myriad ways in which participatory practices operate across disciplines and how they impact the worlds and communities we create and inhabit This book suggests that participatory practices are multi disciplinary and relevant in fields as diverse as design architecture education health care sustainability and community activism to name a few of those discussed here How do designed objects and environments affect wellness creativity learning and a sense of belonging How do products and services affect everyday experience and attitudes towards issues such as sustainability How does giving people a creative voice in their own education services and built environments open up their potential and strengthen identity and civic agency Addressing these questions requires a rethinking of relations between people objects and environments it demands attention to space place and services
